The United States is among the wealthiest nations in the world, but it is far from the healthiest. Although life expectancy and survival rates in the United States have improved dramatically over the past century, Americans live shorter lives and experience more injuries and illnesses than people in other high-income countries. The U.S. health disadvantage cannot be attributed solely to the adverse health status of racial or ethnic minorities or poor people: even highly advantaged Americans are in worse health than their counterparts in other, "peer" countries. In light of the new and growing evidence about the U.S. health disadvantage, the National Institutes of Health asked the National Research Council (NRC) and the Institute of Medicine (IOM) to convene a panel of experts to study the issue. The Panel on Understanding Cross-National Health Differences Among High-Income Countries examined whether the U.S. health disadvantage exists across the life span, considered potential explanations, and assessed the larger implications of the findings. *U.S. Health in International Perspective* presents detailed evidence on the issue, explores the possible explanations for the shorter and less healthy lives of Americans than those of people in comparable countries, and recommends actions by both government and nongovernment agencies and organizations to address the U.S. health disadvantage.

In 2006, Tara June Winch's startling debut *Swallow the Air* was published to acclaim. Its poetic yet visceral style announced the arrival a fresh and exciting new talent. This 10th anniversary edition celebrates its important contribution to Australian literature. When May's mother dies suddenly, she and her brother Billy are taken in by Aunty. However, their loss leaves them both searching for their place in a world that doesn't seem to want them. While Billy takes his own destructive path, May sets out to find her father and her Aboriginal identity. Her journey leads her from the Australian east coast to the far north, but it is the people she meets, not the destinations, that teach her what it is to belong. *Swallow the Air* is an unforgettable story of living in a torn world and finding the thread to help sew it back together.

George Lamming (born 8 June 1927) is a Barbadian novelist, essayist and poet and an important figure in Caribbean literature. In 1951 he became a broadcaster for the BBC Colonial Service. His collection of essays, *The Pleasures of Exile* (1960), is a pioneering non-fiction that attempts to define the place of the West Indian in the post-colonial world, re-interpreting Shakespeare's *The Tempest* and the characters of Prospero and Caliban in terms of personal identity and the history of the Caribbean. In fact, this literary work is a postcolonialist, postrealist and postnationalist counter-discourse because it gives us Lamming's glimpse of the complex issues of identity contained within the Caribbean island-states that were largely shaped by the European colonial practice from the late-fifteenth century up to the late twentieth century. My research questions in this critical study are-"How are the nations of the Caribbean and/or the West Indies originated? How are they represented by canonical discourses and how is their identity constructed? What about its impact throughout different times and spaces? Is it possible to deconstruct and reconstruct their identity through counter-discourse?"-with a view to exploring George Lamming's endeavor in *The Pleasures of Exile* from postcolonial perspective to answer these questions with fact and fiction. In fact, the uprooting of the natives and importation of the African slaves to toil in sugar plantations, the introduction of the Indian and the Chinese indentured laborers to replace the African slaves after the abolition of slavery, as well as the presence of the European colonizers led to the creation of hybrid Caribbean communities of immigrants or exiled people, all with broken cultures and history. I have tried to establish that as the canonical discourses like *The Tempest*, the then media BBC etc. construct the Caribbean's mythologized identities negatively with biased perspectives for their colonial 'civilizing mission', Lamming has tried to deconstruct or decentralize their canonical position counter-discursively to reconstruct his national identity. I have also focused on the problems of the Caribbean hyphenated identities that imply double heredity. So, the region seems to be a no man's land where people lack an autonomous and homogenous identity. At the end of my interpretation, I have tried to establish that-by reviewing colonial history, dismantling the textual unconscious of *The Tempest* as a poststructuralist critic and rejecting the stereotype identities created by other legitimizing Western discourses, Lamming's *The Pleasures of Exile* functions as a counter-discursive signifier of the post-colonial Caribbean's metamorphosis into some cross-cultural identities, identities that are experienced between the Caribbean and the West.

Children living in poverty are more likely to have mental health problems, and their conditions are more likely to be severe. Of the approximately 1.3 million children who were recipients of Supplemental Security Income (SSI) disability benefits in 2013, about 50% were disabled primarily due to a mental disorder. An increase in the number of children who are recipients of SSI benefits due to mental disorders has been observed through several decades of the program beginning in 1985 and continuing through 2010. Nevertheless, less than 1% of children in the United States are recipients of SSI disability benefits for a mental disorder. At the request of the Social Security Administration, *Mental Disorders and Disability Among Low-Income Children* compares national trends in the number of children with mental disorders with the trends in the number of children receiving benefits from the SSI program, and describes the possible factors that may contribute to any differences between the two groups. This report provides an overview of the current status of the diagnosis and treatment of mental disorders, and the levels of impairment in the U.S. population under age 18. The report focuses on 6 mental disorders, chosen due to their prevalence and the severity of disability attributed to those disorders within the SSI disability program: attention-deficit/hyperactivity disorder, oppositional defiant disorder/conduct disorder, autism spectrum disorder, intellectual disability, learning disabilities, and mood disorders. While this report is not a comprehensive discussion of these disorders, *Mental Disorders and Disability Among Low-Income Children* provides the best currently available information regarding demographics, diagnosis, treatment, and expectations for the disorder time course - both the natural course and under treatment.

With their tidal imagination, the poems in this debut collection sweep between old worlds and new, seeking the lost and recovering the found among shipwrecks, underwater zoos and discovered lands. Emma Jones brings her inventive worlds dramatically to life in a series of vividly distilled meetings - of settlers and indigenous peoples, of seawaters and shore, of humanity and the wilds of nature. Here, tigers stalk the captive and the free, while Death encounters his own double and Daphne tells of her new leaves, 'They sing, and make the world.' The same might be said of the poems themselves in this restless and memorable search for

belonging.

A history of Britain in the violent and unruly era between the first Scandinavian raids in 789 and the final expulsion of the Vikings from York in 954. In 865, a great Viking army landed in East Anglia, precipitating a series of wars that would last until the middle of the following century. It was in this time of crisis that the modern kingdoms of Britain were born. In their responses to the Viking threat, these kingdoms forged their identities as hybrid cultures: vibrant and entrepreneurial peoples adapting to instability and opportunity. Traditionally, Alfred the Great is cast as the central player in the story of Viking Age Britain. But Max Adams, while stressing the genius of Alfred as war leader, law-giver, and forger of the English nation, has a more nuanced narrative approach to this conventional version of history. The Britain encountered by the Scandinavians of the ninth and tenth centuries was one of regional diversity and self-conscious cultural identities, depicted in glorious narrative fashion in *The Viking Wars*.

With chapters written by experts in the field, this book engages with numerous forms of assessment: from classroom-level formative assessment practices to national accountability and international comparative testing practices all of which are significantly influenced by social and cultural conditions. A unique and timely contribution to the field of Educational Psychology, the Handbook of Human and Social Conditions in Assessment is written for researchers, educators, and policy makers interested in how social and human complexity affect assessment at all levels of learning. Organized into four sections, this volume examines assessment in relation to teachers, students, classroom conditions, and cultural factors. Each section is comprised of a series of chapters, followed by a discussant chapter that synthesizes key ideas and offers directions for future research. Taken together, the chapters in this volume demonstrate that teachers, test creators, and policy makers must account for the human and social conditions that shape assessment if they are to implement successful assessment practices which accomplish their intended outcomes.

Winner of the 1998 Victorian Premier's Literary Award for Non-Fiction, *Romulus, My Father* is an iconic and deeply loved book. Romulus Gaita fled his home in his native Yugoslavia at the age of thirteen, and came to Australia with his young wife Christina and their infant son Raimond soon after the end of World War II. Tragic events were to overtake the boy's life, but Raimond Gaita has an extraordinary story to tell about growing up with his father amid the stony paddocks and flowing grasses of country Australia. Written simply and movingly, *Romulus, My Father* is about how a compassionate and honest man taught his son the meaning of living a decent life. It is about passion, betrayal and madness, about friendship and the joy and dignity of work, about character and fate, affliction and spirituality. No one will read this wonderful book without an enhanced sense of the possibilities of being alive. 'I know of no other book where the love between father and son has been more beautifully expressed.' Robert Manne In October 1928 Virginia Woolf was asked to deliver speeches at Newnham and Girton Colleges on the subject of 'Women and Fiction'; she spoke about her conviction that 'a woman must have money and a room of her own if she is to write fiction'. The following year, the two speeches were published as *A Room of One's Own*, and became one of the foremost feminist texts. Knitted into a polished argument are several threads of great importance – women and learning, writing and poverty – which helped to establish much of feminist thought on the importance of education and money for women's independence. In the same breath, Woolf brushes aside critics and sends out a call for solidarity and independence – a call which sent ripples well into the next century. 'Brilliant interweaving of personal experience, imaginative musing and political clarity' — Kate Mosse, *The Guardian* 'Probably the most influential piece of non-fictional writing by a woman in this century.' — Hermione Lee, *The Financial Times* Education and knowledge have never been more important to society, yet research is segmented by approach, methodology or topic. Legitimation Code Theory or 'LCT' extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an international and multidisciplinary group of scholars, *Knowledge-building* offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by: - enabling dialogue between theory and data in qualitative research - bringing together quantitative and qualitative methodologies in mixed-methods research - relating theory and practice in praxis - conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge-building in education and beyond, encompassing: - diverse subject areas, including physics, English, cultural studies, music, and design - educational sites: schooling, vocational education, and higher education - practices of research, curriculum, pedagogy and assessment - both education and informal learning contexts, such as museums and masonic lodges Carefully sequenced and interrelated, these chapters form a coherent collection that gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about knowledge-building in education and society to have emerged this century. This book is essential reading for all serious students and scholars of education, sociology and linguistics.

Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.
