The establishment of the IBSA as one of the principal platforms of South-South cooperation is one of the most notable developments in international politics during the first decade of the twenty-first century. While the concept is now frequently referred to in discussions about the Global South, there has not yet been a comprehensive and scholarly analysis of the history of the IBSA grouping and its impact on global order. This book: Offers a definitive reference history of the IBSA grouping (India, Brazil and South Africa) – a comprehensive, fact-focused narrative and analytical account from its inception as an ad hoc meeting in 2003 to the political grouping it is today. Situates the IBSA grouping in the wider context of South-South cooperation and the global shift of power away from the United States and Europe towards powers such as Brazil, India and South Africa. Provides an outlook and critically assesses what the IBSA grouping means for global order in the twenty-first century. Offering the first full-length and detailed treatment of the IBSA, this work will be of great interest to students and scholars of International organizations, international relations and the global south.

When voters enthusiastically turn up to cast their vote during general elections, they expect that their action would meaningfully change their lives. But in most of Africa, even when elections are held on a regular basis, voters are quite often disappointed by the performance of their leaders who use the new positions as an opportunity to loot public resources and consolidate power. It is almost as if elections are of minimal value to the populace. Notwithstanding this trend, when they are free and fair, general elections can be transformative. They can bring into the political arena men and women of integrity committed to service and account-ability. Inspired by the determination to have inclusive governance and the advancement of democracy, Kenya's 2013 General Election: Stakes, Practices and Outcomes asks important questions related to political participation, coalition building, politics of identity, the international criminal court, electoral systems and institutions, and the judiciary. The papers are written by mainly Kenyan academics and civil society actors who examine the drivers of the 2013 general elections and the sources of the mandate to lead. This book is part of publications by Twaweza Communications on democratic practice and accountable governance in Kenya.

Includes more than twelve thousand holidays, holy days, national and ethnic celebrations, astronomical phenomena, festivals, fairs, anniversaries, and other events from around the world.

This series has been developed specifically for the Cambridge International AS & A Level Mathematics (9709) syllabus to be examined from 2020. Cambridge International AS & A Level Mathematics: Pure Mathematics 2 & 3 matches the corresponding units of the syllabus. It clearly indicates materials required for P3 study only, and contains materials on topics such as logarithmic and exponential functions, trigonometry, differentiation, integration, numerical solutions of equations, vectors and complex numbers. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations and worked examples, end-of-chapter and cross-topic review exercises and 'Explore' tasks to encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.

In his trademark in-your-face style, bestselling author and top conservative talk-show host, Michael Savage has a lot to say about the state of the country in STOP THE COMING CIVIL WAR. According to Michael Savage, OUR NATION IS IN REAL TROUBLE and the seeds of a second conflagration have been sown. Not between the states - but between true patriots who believe in our nation's founding principles and those he believes are working every day to undermine them and change the very nature of the country. Michael Savage is convinced we face more than just political differences. He believes the split between right and left is possibly irreparable - unless we understand what's really happening and how we must act to stop it. This fervent warning offers the Savage truth - a call to action in the voting booth - in order to defend the freedoms our Constitution so brilliantly established.

This study examines a key aspect of regulatory policy in the field of data protection, namely the frameworks governing the sharing of data for law enforcement purposes, both within the EU and between the EU and the US and other third party countries. The work features a thorough analysis of the main data-sharing instruments that have been used by law enforcement agencies and the intelligence services in the EU and in the US between 2001 to 2015. The study also explores the challenges to data protection which the current frameworks create, and explores the possible responses to those challenges at both EU and global levels. In offering a full overview of the current EU data-sharing instruments and their data protection rules, this book will be of significant benefit to scholars and policymakers working in areas related to privacy, data protection, national security and EU external relations.

The topic of death and related issues (such as grief) often begin with questions. When the questions come from, or are about, children or adolescents, they bring an additional component...the fear some adults have of giving a "wrong" answer. In this context a wrong answer is one that can cause more harm than good for the child or adolescent who asked the question. This book provides information that can be used to address the death-related questions from children and adolescents. It also looks at questions from caring adults about the way children or adolescents view death and the grief that follows a death or any major loss. Children, Adolescents, and Death covers topics that start with early studies of childhood grief and progress to expression of grief in cyberspace. There is no one answer to most of the questions in this book. There are contributors from a number of continents, countries, cultures, and academic disciplines, each of whom brings a unique view of the topic issues they discuss. There are presentations of practical interventions that others may copy, upon which they can build. There are a number of chapters that look at death education in both family and school settings. This work contains ideas and techniques that can be of value to parents, educators, counselors, therapists, spiritual advisors, caring adults and, of course, will be of the most benefit to those who ask the most questions...the children and adolescents themselves.

Mainstream economists and Silicon Valley entrepreneurs claim that unfettered capitalism and digital technology can unlock a future of unbounded prosperity, create endless high paying jobs, and solve the world's vast social and ecological problems. Realizing this future of abundance purportedly rests in the transformation of human potential into innovative human capital through new 21st century forms of education. In this new book Alex Means challenges this view. Stagnating economic growth and runaway inequality have emerged as the 'normal' condition of advanced capitalism. Simultaneously, there has been a worldwide educational expansion and a growing surplus of college-educated workers relative to their demand in the world economy. This surplus is complicated by an emerging digital revolution driven by artificial intelligence and machine learning that generates worker displacing innovations and immaterial forms of labor and valorization. Learning to Save the Future argues that rather than fostering mass intellectuality, educational development is being constrained by a value structure subordinated to 21st century capitalism and technology. Human capabilities from creativity, design, engineering, to communication are conceived narrowly as human capital, valued in terms of economic productivity and growth. Similarly, global problems such as the erosion of employment and climate change are conceived as educational problems to be addressed through business solutions and the digitalization of education. This thought-provoking account provides a cognitive map of this condition, offering alternatives through critical analyses of education and political economy, technology and labor, creativity and value, power and ecology.

Exploring the C-SPAN Archives is a collection of path-breaking research studies that use video drawn from the C-SPAN Archives. The book, based on the papers presented at a November 2014 conference, includes chapters that explore issues in presidential debates, minority representation, the presentation of the first ladies, stem research, and innovative ways to analyze video. The book is divided into five parts: Part 1 consists of an overview of and common scholarship using the C-SPAN Archives and how this research advances the conversation after previously published studies. Featured are the ways in which the collection is indexed and tips on how individuals can find particular materials. This section is essential for increased scholarship and pragmatic applications. Part 2 contains applied research using the video collection. Topics in this section include a look at oral histories of minority members of Congress, an analysis of presidential debates, and the presentation style of Michelle Obama. Part 3 is focused on STEM research, including concepts and contradictions in the debate over STEM initiatives, expertise and evidence in science presentations in the C-SPAN Archives, and the framing of

technology issues in a C-SPAN television series, *The Communicators*. Part 4 presents innovative research using C-SPAN and new computer technology. Two scholars take different technical approaches to evaluate polarization and communication using audio levels and video images. Finally, in Part 5, David Caputo presents ideas on the value of massive open online courses (MOOCs) using C-SPAN and reflects on the use of C-SPAN for citizen education in what he terms the "postdigital world." Additionally, Patrice Buzzanell contributes a reflective essay on the future directions of research using the C-SPAN Archives based on the essays in this volume.

This work is the fourth *Small Wars Journal* anthology focusing on radical Sunni Islamic terrorists and insurgent groups. It covers this professional journals writings for 2016 and is a compliment to the earlier *Global Radical Islamist Insurgency* anthologies that were produced as Vol. I: 20072011 (published in 2015) and Vol. II: 20122014 (published in 2016) and *Jihadi Terrorism, Insurgency, and the Islamic State* spanning 2015 (published in 2017). This anthology, which offers well over six hundred pages of focused analysis, follows the same general conceptual breakdown as the earlier works and is divided into two major thematic sectionsone focusing on al-Qaeda and Islamic state activities in 2016 and the other focusing on US Allied policies and counterinsurgent strategies.

An essential resource for LIS master's and doctoral students, new LIS faculty, and academic librarians, this book provides expert guidance and practical examples based on current research about quantitative and qualitative research methods and design. Conducting research and successfully publishing the findings is a goal of many professionals and students in library and information science (LIS). Using the best methodology maximizes the likelihood of a successful outcome. This outstanding book broadly covers the principles, data collection techniques, and analyses of quantitative and qualitative methods as well as the advantages and limitations of each method to research design. It addresses these research methods and design by discussing the scientific method, sampling techniques, validity, reliability, and ethical concerns along with additional topics such as experimental research design, ethnographic methods, and usability testing. The book presents comprehensive information in a logical, easy-to-follow format, covering topics such as research strategies for library and information science doctoral students; planning for research; defining the problem, forming a theory, and testing the theory; the scientific method of inquiry and data collection techniques; survey research methods and questionnaires; analyzing quantitative data; interview-based research; writing research proposals; and even time management skills. LIS students and professionals can consult the text for instruction on conducting research using this array of tools as well as for guidance in critically reading and evaluating research publications, proposals, and reports. The explanations and current research examples supplied by discipline experts offer advice and strategies for completing research projects, dissertations, and theses as well as for writing grants, overcoming writer's block, collaborating with colleagues, and working with outside consultants. The answer to nearly any question posed by novice researchers is provided in this book. Now in its sixth edition, the book provides new and updated content that is even more comprehensive than before and contains added sections featuring the voices of prominent LIS scholars, researchers, and editors "Voices of the Experts" text boxes provide researchers' advice on specific methods and identify what was most important or most valuable about using a particular method and software for analysis—e.g., NVivo, SurveyMonkey, and log capture Written by coauthors with extensive expertise in research design, securing grant funding, and using the latest technology and data analysis software

Joblessness is the root cause of the global unrest threatening American security. Fostering entrepreneurship is the remedy. The combined weight of American diplomacy and military power cannot end unrest and extremism in the Middle East and other troubled regions of the world, Steven Koltai argues. Koltai says an alternative approach would work: investing in entrepreneurship and reaping the benefits of the jobs created through entrepreneurial startups. From 9/11 and the Arab Spring to the self-proclaimed Islamic caliphate, instability and terror breed where young people cannot find jobs. Koltai marshals evidence to show that joblessness—not religious or cultural conflict—is the root cause of the unrest that vexes American foreign policy and threatens international security. Drawing on Koltai's stint as senior adviser for Entrepreneurship in Secretary Hillary Clinton's State Department, and his thirty-year career as a successful entrepreneur and business executive, *Peace through Entrepreneurship* argues for the significant elevation of entrepreneurship in the service of foreign policy; not rural microfinance or mercantile trading but the scalable stuff of Silicon Valley and Sam Walton, generating the vast majority of new jobs in economies large and small. *Peace through Entrepreneurship* offers a nonmilitary, long-term solution at a time of disillusionment with Washington's "big development" approach to unstable and underdeveloped parts of the world—and when the new normal is fear of terrorist attacks against Western targets, beheadings in Syria, and jihad. Extremism will not be resolved by a war on terror. The answer, Koltai shows, is stimulating entrepreneurial economic opportunities for the virtually limitless supply of desperate, unemployed young men and women leading lives of endless economic frustration.

In our digital world, we are confused by privacy – what is public, what is private? We are also challenged by it, the conditions of privacy so uncertain we become unsure about our rights to it. We may choose to share personal information, but often do so on the assumption that it won't be re-shared, sold, or passed on to other parties without our knowing. In the eighteenth century, philosopher Jeremy Bentham wrote about a new model for a prison called a Panopticon, where inmates surrounded the jailers, always under watch. Have we built ourselves a digital Panopticon? Are we the guards or the prisoners, captive or free? Can we be both? When Kim Kardashian makes the minutiae of her life available online, which is she? With great rigour, this important book draws on a Kantian philosophy of ethics and legal frameworks to examine where we are and to suggest steps – conceptual and practical – to ensure the future is not dystopian. Privacy is one of the defining issues of our time; this lively book explains why this is so, and the ways in which we might protect it.

Help students appreciate texts and write about them with conviction. Responding to a comprehension question is a surprisingly complex task. It draws on multiple skills: students must be able to read and analyze a text passage; consider what aspect of the text the question addresses; and then quickly and concisely write about their ideas, citing evidence to support them. Hence the prominence of constructed-response questions in standardized testing. In this refreshingly clear and upbeat guide, literacy consultant Nancy Boyles gives a step-by-step demonstration of how to help students achieve success with this task—and in the process of unpacking the steps involved, demonstrates how the instruction can inspire teachers' creativity as well as deepen students' literacy skills. Filled with ready-to-use scaffolds for every stage of instruction—sets of sample questions, anchor charts, cue cards, answer frames—this is a one-stop resource for teaching students how to organize their thoughts about what they've read, and then set them down in writing. *Service-Learning Essentials* is the resource you need to help you develop high-quality service-learning experiences for college students. Written by one of the field's leading experts and sponsored by Campus Compact, the book is the definitive work on this high-impact educational practice. Service-learning has been identified by the Association of American Colleges and Universities as having been widely tested and shown to be beneficial to college students from a wide variety of backgrounds. Organized in an accessible question-and-answer format, the book responds clearly and completely to the most common questions and concerns about service-learning. Each chapter addresses issues

related to individual practice as well as to the collective work of starting and developing a service-learning center or program, with examples drawn from a variety of disciplines, situations, and institutional types. The questions range from basic to advanced and the answers cover both the fundamentals and complexities of service-learning. Topics include: Determining what service-learning opportunities institutions should offer How to engage students in critical reflection in academic courses and in cocurricular experiences Best practices for developing and sustaining mutually beneficial campus-community partnerships Integrating service-learning into the curriculum in all disciplines and at all levels, as well as various areas of student life outside the classroom Assessing service-learning programs and outcomes The dilemmas of service-learning in the context of power and privilege The future of service-learning in online and rapidly globalizing environments Service-learning has virtually limitless potential to enable colleges and universities to meet their goals for student learning while making unique contributions to addressing unmet local, national, and global needs. However, in order to realize these benefits, service-learning must be thoughtfully designed and carefully implemented. This easy-to-use volume contains everything faculty, leaders, and staff members need to know about service-learning to enhance communities, improve higher education institutions, and educate the next generation of citizens, scholars, and leaders.

The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent, it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light, even if the latter's aim has been to shift the burden of adjustment onto citizens. This book explains how and why, using a critical political economic perspective and focusing on the case of Ireland. Throughout, Ireland is compared with contemporary and historical examples to contextualise the arguments made. The book covers the housing bubble that led to the crash, the rescue of financial institutions by the state, the role of the European institutions and the International Monetary Fund, austerity, and the possibility of leaving the eurozone for Europe's peripheral countries. Through a systematic analysis of Ireland's main newspapers, it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis.

This edited volume aims to unpack the digitisation of art and media within the dynamics of participatory culture, and how these changes affect the power relations between the production and consumption of these new forms in a globalised Asia. This follows the rise of new art forms and social media platforms in wake of rapid and ongoing digitisation, which has, in turn, produced far-reaching implications for changing media ownership and its role in social, cultural, economic, as well as political activities. New challenges arise every day in relation to digital art and design practices and social media communications, and their respective impact on identity politics. This book showcases a diverse range of interdisciplinary research on these concomitant changes and challenges associated with digital media and technologies within the context of a globalised Asia. The case studies included present perspectives on Asia's evolving digital humanities landscape from Hong Kong, China, India, Korea and from across Southeast Asia, with topics that tackle organisational digital marketing, brand advertising and design, mobile gaming, interactive art, and the cultural activities of ethnic and sexual minority communities in the region. This book will of interest to scholars in digital humanities focused on new media and cultural studies.

Sandu-Daniel Kopp investigates whether carbon reduction targets are compatible with market-driven competition in gas (and power) industries, and whether security of supply is compatible with competitive markets. He examines the policy trade-offs which need to be made between the three different elements, and whether these policy judgements should be economically or politically based. The analysis shows the need for a complex set of politically determined options to protect (competitive) markets from price risks and emergency events and demonstrates that this has thus far failed the policy test. Overall, the author argues that the three major elements of EU energy policy are incompatible in important respects and thereby challenges much of the conventional wisdom of EU and Member State policies of the past decade.
