The remarkable story of the 2019 World Series champion Washington Nationals told by the Washington Post writer who followed the team most closely. By May 2019, the Washington Nationals—owners of baseball's oldest roster—had one of the worst records in the majors and just a 1.5 percent chance of winning the World Series. Yet by blending an old-school brand of baseball with modern analytics, they managed to sneak into the playoffs and put together the

most unlikely postseason run in baseball history. Not only did they beat the Houston Astros, the team with the best regular-season record, to claim the franchise's first championship—they won all four games in Houston, making them the first club to ever win four road games in a World Series. “You have a great year, and you can run into a buzz saw,” Nationals pitcher Stephen Strasburg told Washington Post beat writer Jesse Dougherty after the team advanced to the World Series. “Maybe this year we’re the buzz saw.” Dougherty followed the Nationals more closely than any other writer in America, and in *Buzz Saw* he recounts the dramatic year in vivid detail, taking readers inside the dugout, the clubhouse, the front office, and ultimately the championship parade. Yet he does something more than provide a riveting retelling of the season: he makes the case that while there is indisputable value to Moneyball-style metrics, baseball isn’t just a numbers game. Intangibles like team chemistry, veteran experience, and childlike joy are equally essential to winning. Certainly, no team seemed to have more fun than the Nationals, who adopted the kids’ song “Baby Shark” as their anthem and regularly broke into dugout dance parties. *Buzz Saw* is just as lively and rollicking—a fitting tribute to one of the most exciting, inspiring teams to ever take the field.

hackers and trolls' boss's likely boss. Every result but one produces desirable results for the Kremlin. Outcome one: Clinton is off the international stage. Outcome two: she wins but can't govern effectively. Outcome three: the former Secretary of State is elected and the country simply moves on, but the sabotage nonetheless has magnified cultural tensions and functioned as a pilot from which to birth later success - perhaps when she runs for a second term. The only eventuality that damages the Russian cybersoldiers and their commander-in-chief is the fourth in which, in real time, the cyberattackers are unmasked by a vigilant intelligence community, condemned by those in both major political parties and around the world, characterized by the media as spies and saboteurs, the Russian messaging is blocked or labeled as Russian propaganda, and, when included in media accounts, the stolen content is relentlessly tied to its Russian origins and sources. None of that happened. Instead, to the surprise of the Russian masterminds as well as both Hillary Clinton and Donald Trump, he won the Electoral College and with it a four-year claim on 1600 Pennsylvania Avenue. Although countrywide she bested him by almost 2.9 million votes, he unexpectedly captured an Electoral College majority by running the table. By the end of the evening of November 8, Florida as well as Wisconsin, Michigan, and Pennsylvania were in his column. The ways in which Russian hacking and social media messaging altered the content of the electoral dialogue and contributed to Donald Trump's victory are the subjects of this book. To begin my exploration, this overview chapter will highlight key findings of the US intelligence community; preview my focus on the hackers and trolls and the synergies between them; justify casting the Russian machinations as acts of cyberwar; outline ways in which susceptibilities in our system of government and media structures magnified their effects; and note five presuppositions that

This book is a comprehensive study of the development of China's nuclear-powered ballistic missile submarines (SSBNs). It offers insights into the secretive world of nuclear submarines and ballistic missiles of the Chinese (PLA) Navy and studies how these are likely to grow in the next two decades. The volume examines the technological origins of the design and development of Chinese nuclear submarines, ballistic missiles, and their naval construction capabilities. It provides an analysis of the underlying Chinese nuclear doctrine, China's maritime geographical constraints for submarine operations, and the credibility of its sea-based deterrence. It draws upon strategy, nuclear policy, technology, geography, and operational considerations to holistically predict the likely SSBN force levels of the PLA Navy for various scenarios. The book also assesses the spectrum of threats likely from the undersea domain for India and other nations in the Indo-Pacific region. A key text on an obscure but vital facet of Chinese defence studies, this book will be useful for scholars and researchers of strategic affairs, international relations and disarmament studies, peace and conflict studies, geopolitics, foreign policy, Indo-Pacific studies, and diplomacy.

This open access book presents work collected through the Liquefaction Experiments and Analysis Projects (LEAP) in 2017. It addresses the repeatability, variability, and sensitivity of lateral spreading observed in twenty-four centrifuge model tests on mildly sloping liquefiable sand. The centrifuge tests were conducted at nine different

centrifuge facilities around the world. For the first time, a sufficient number of experiments were conducted to enable assessment of variability of centrifuge test results. The experimental data provided a unique basis for assessing the capabilities of twelve different simulation platforms for numerical simulation of soil liquefaction. The results of the experiments and the numerical simulations are presented and discussed in papers submitted by the project participants. The work presented in this book was followed by LEAP-Asia that included assessment of a generalized scaling law and culminated in a workshop in Osaka, Japan in March 2019. LEAP-2020, ongoing at the time of printing, is addressing the validation of soil-structure interaction analyses of retaining walls involving a liquefiable soil. A workshop is planned at RPI, USA in 2020. .

content, but terse, relevant and accurate Michigan laws and regulations presented as a well-organized set of state ‘key point reviews’ ideal for pre-test memorization. But let’s not dismiss the importance of the national content either. MI-RELEP’s national key point reviews are a succinct compression of tested national principles and practices that comprise the national portion of state license exams from coast to coast. Our content is drawn from our own national textbook, Principles of Real Estate Practice – one of the most widely used principles textbooks in the country. Finally, our national content, as well as our question selection, is further tailored to the state testing outline promulgated by PSI for Michigan. Thus the breadth and depth of the law reviews and test questions reflect the topic emphasis of your state’s testing service and your Michigan license exam. A word about the test questions... MI-RELEP’s testing practice section consists of ten national practice tests, six state practice tests, and one state exam sample test. The practice tests are roughly 50 questions in length and the sample test is 100 questions. The test questions are designed to cover the content covered by the law reviews – which reinforces your learning of the total body of information tested by your Michigan exam. The questions are direct, to the point, and designed to test your understanding. When you have completed a given test, you can check your answers against the answer key in the appendix. You may also note that each question’s answer is accompanied by a brief explanation, or “rationale” to further reinforce your understanding. In the end, as you know, it’s all up to you. A fascinating examination of how restricting speech has continuously shaped our culture, and how censorship is used as a tool to prop up authorities and maintain class and gender disparities Through compelling narrative, historian Eric Berkowitz reveals how drastically censorship has shaped our modern society. More than just a history of censorship, *Dangerous Ideas* illuminates the power of restricting speech; how it has defined states, ideas, and culture; and (despite how each of us would like to believe otherwise) how it is something we all participate in. This engaging cultural history of censorship and thought suppression throughout the ages takes readers from the first Chinese emperor's wholesale elimination of books, to Henry VIII's decree of death for anyone who "imagined" his demise, and on to the attack on Charlie Hebdo and the volatile politics surrounding censorship of social media. Highlighting the base impulses driving many famous acts of suppression, Berkowitz demonstrates the fragility of power and how every individual can act as both the suppressor and the suppressed.

its global history, enmeshed in various political, economic, and social sites. From this embedded perspective, the book branches out to examine the rise of consumer culture theory among consumer researchers and parallel innovative developments in sociology and anthropology, with scholarship analyzing the roles that identity, social networks, organizational dynamics, institutions, market devices, materiality, and cultural meanings play across a wide variety of applications, including, but not limited to, brands and branding, the sharing economy, tastes and preferences, credit and credit scoring, consumer surveillance, race and ethnicity, status, family life, well-being, environmental sustainability, social movements, and social inequality. The volume is unique in the attention it gives to consumer research on inequality and the focus it has on consumer credit scores and consumer behaviors that shape life chances. The volume includes essays by many of the key researchers in the field, some of whom have only recently, if at all, crossed the disciplinary lines that this volume has enabled. The contributors have tried to address several key questions: What motivates consumption and what does it mean to be a consumer? What social, technical, and cultural systems integrate and give character to contemporary consumption? What actors, institutions, and understandings organize and govern consumption? And what are the social uses and effects of consumption?

What's the secret to making schoolwide SEL work? Growing numbers of people recognize that social-emotional learning (SEL) is central to a well-rounded education and to success in life outside and beyond the school building. What's missing is the know-how and framework for weaving SEL into the fabric of the school. In this highly practical and eminently readable book, Thomas R. Hoerr shows teachers, administrators, and other school staff how to integrate the Formative Five success skills (empathy, integrity, self-control, embracing diversity, and grit) with school culture essentials by answering these questions: 1. How can you ensure that your school or district is helping students develop their SEL skills across disciplines? Address your values, vision, mission. 2. What effective programs and activities support student development of SEL skills at the classroom, school, and district levels? Consider your practices. 3. How can you leverage personal relationships within the school and in the community to cultivate students' appreciation of how the differences among us make us stronger? Involve your people. 4. How can you weave an SEL narrative into your

"I would give myself an A+" —Donald Trump, on his first 100 days in office. Americans increasingly agree on one thing: Every day that Trump stays in office, he diminishes the United States and its people. In *Trump Must Go*, TV and radio host Bill Press offers 100 reasons why Trump needs to be removed from office, whether by impeachment, the 25th Amendment, or the ballot box. Beginning with the man himself and moving through Trump's executive action damage, Press covers Trump's debasement of the United States political system and degrading of the American presidency. Ranging from banning federal employees' use of the phrase "climate change," to putting down Haiti, El Salvador, and African nations as "shithole" countries, we have to wonder what he'll do next. He has a bromance with Putin that enables several meetings between Trump staffers and Russian officials, and he has a wrecking crew administration: Attorney General Jeff Sessions, Education Secretary Betsy DeVos, and Housing Secretary Ben

Carson, to name a few. Extensive “executive time” marks Trump’s calendar so he can golf, watch TV, and eat fast food. Trump has done it all...badly. But, in a political climate where the world has learned to expect the unexpected, Press offers readers a twist: one reason not to ditch Donald Trump.

We live in strange times. Old borders are vanishing just before our astonished eyes, while new ones are rapidly emerging. Nearly three decades after the publication of Francis Fukuyama's *The End of History and the Last Man*, the zeitgeist that predicted a bright future for mankind to a large extent turned out to be rather more of a dystopia. Crises in and outside Europe multiplied the number of border controls, triggered the construction of walls and fences and widened ideological gaps. The book *Discussing Borders, Escaping Traps* is a transdisciplinary and transspatial approach to investigating these vanishing, emerging and changing material and immaterial borders. It is the result of a two-year project by AreaS, a research group in area studies located at Østfold University College in Norway, and by AreaS’ partners.

This edited volume bridges the "analytical divide" between studies of transatlantic relations, democratic peace theory, and foreign policy analysis, and improves our theoretical understanding of the logic of crises prevention and resolution. The recent rise of populism and polarization in both the U.S.A and Europe adds to a host of foreign policy crises that have emerged in transatlantic relations over the last two decades. Through examining how democracies can manage to sustain and maintain mechanisms of crisis resilience that are embedded in the democratic peace, and particularly transatlantic relations, this book helps enhance the understanding of inter-democratic crisis resolution across issue areas. In doing so, it addresses some of the most important and prevalent crises of our time, such as anti-terrorism intervention in Afghanistan; Iran's nuclear

program, burden-sharing within North Atlantic Treaty Organization NATO; key aspects of the international order, such as binding norms for cyber security and the integration of China into the Western-led international economic order; as well as domestic order shifts, such as the British vote to leave the European Union (EU) and the impact of the Trump administration populist foreign policy on transatlantic crisis resolution. This book will be of key interest to students and scholars of International Relations, Transatlantic Studies, Foreign Policy Analysis, and Comparative Politics.

In *Birthing Black Mothers* Black feminist theorist Jennifer C. Nash examines how the figure of the “Black mother” has become a powerful political category. “Mothering while Black” has become synonymous with crisis as well as a site of cultural interest, empathy, fascination, and support. Cast as suffering and traumatized by their proximity to Black death—especially through medical racism and state-sanctioned police violence—Black mothers are often rendered as one-dimensional symbols of tragic heroism. In contrast, Nash examines Black mothers’ self-representations and public performances of motherhood—including Black doulas and breastfeeding advocates alongside celebrities such as Beyoncé, Serena Williams, and Michelle Obama—that are not rooted in loss. Through cultural critique and in-depth interviews, Nash acknowledges the

complexities of Black motherhood outside its use as political currency. Throughout, Nash imagines a Black feminist project that refuses the lure of locating the precarity of Black life in women and instead invites readers to theorize, organize, and dream into being new modes of Black motherhood. *Resisting Rape Culture through Pop Culture: Sex After #MeToo* provides audiences with constructive models of affirmative consent, tender masculinity, and pleasure in popular culture that work to challenge toxic dominant and hegemonic constructions. While numerous scholars have illustrated the many ways mediated culture shape social understandings of sexual violence, this book analyzes texts that might serve to resist rape culture. This project locates how these texts manufacture cinematic or televisual narratives and in turn work to create new realities that encourage cultural and social change. Kelly Wilz analyzes the ways in which we, as a culture, tend to understand sex through visual media and dominant cultural myths, while highlighting productive texts which might serve as a possible corrective to the ways in which sex is ritualized by rules that legitimize violence. Through the lens of productive criticism, Wilz examines how language and dominant ideologies around rape culture and rape myths reinforce systemic violence, and how visual texts might work to reimagine how we might disrupt those ideologies and create new ways to engage in

conversations around intimacy and violence. By centering the voices within the #MeToo movement, who actively work to de-normalize sexual assault and abuse, these models provide a useful counter to the deluge of dehumanizing narratives about survivors and sexualized violence. Scholars of pop culture, women's studies, media studies, and social justice will find this book particularly useful. With recent changes in social and political landscapes around the world the focus of preventive counter-terrorism has shifted in many places from government to civil society. The contributors analyze the different approaches of Civil Society Organizations in preventing and countering violent extremism in various countries in South and Southeast Asia. The cases examined include, Malaysia, Indonesia, Myanmar, Sri Lanka and Bangladesh. The key emphasis is on understanding the context within which each example was initiated, and the factors that determined their relative success or failure. The evidence from these cases suggests that much can be achieved through empowering communities to engage in aiding both the indoctrinated and those who pose the greatest risk of radicalization. A valuable contribution to the literature on preventing and countering violent extremism.

and entitled brats claiming “victim” status. The country is under siege and America’s most ferocious enemy is already here: our privileged victims. On university campuses, in the news media, and in Hollywood, race, gender, and sexuality determine who should advance and who should be taken down a peg. Driven by “social justice” and governed by “intersectionality,” out-of-control college students, school administrators, journalists, and titans of the entertainment industry divide and rank us on an infinite scale of grievance—the more of them, the better. And God have mercy on any individual deemed to benefit from “privilege.” Privileged Victims zealously exposes the lies and myths behind:

- The #MeToo movement that redefined sexual assault and rape to include simple regret, ruining the lives and careers of countless men
- Hoax hate crimes, a key feature of the privileged victim class
- The debate over our jungle-like immigration system, dumbed down by a scheming national news media to ugly charges of racism and xenophobia
- Hollywood, which no longer aims to produce high-quality entertainment, but to virtue signal and promote "social justice" And so much more.
