

Access To Health By Rebecca J Donatelle 9780134516257

The Explicit Body in Performance interrogates the avant-garde precedents and theoretical terrain that combined to produce feminist performance art. Among the many artists discussed are: * Carolle Schneemann * Annie Sprinkle * Karen Finley * Robbie McCauley * Ana Mendieta * Ann Magnuson * Sandra Bernhard * Spiderwoman Rebecca Schneider tackles topics ranging across the 'post-porn modernist movement', New Right censorship, commodity fetishism, perspectival vision, and primitivism. Employing diverse critical theories from Benjamin to Lacan to postcolonial and queer theory, Schneider analyses artistic and pop cultural depictions of the explicit body in late commodity capitalism. The Explicit Body in Performance is complemented by extensive photographic illustrations and artistic productions of postmodern feminist practitioners. The book is a fascinating exploration of how these artists have wrestled with the representational structures of desire.

This loose-leaf, three-hole punched version of the textbook gives students the flexibility to take only what they need to class and add their own notes-all at an affordable price. For courses in personal health (health & kinesiology). Mindful students equal successful students The 3rd Edition of My Health delivers the latest in personal health, including a new mindfulness theme where research on the benefits of mindfulness practices and the tools to incorporate them in all aspects of health are included in new modules. The book's modular organization allows students to focus on learning the core material they need to know, while Learning Outcomes and review questions provide immediate feedback on what they've learned, allowing them to customize their study plan. Meanwhile, a concise text and a comprehensive supplements package allow instructors to zero in on what students need--without the jargon--making personal health courses more rewarding. Also available with Mastering Health Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and often improves results for each student. NOTE: You are purchasing a standalone product; Mastering(tm) Geography does not come packaged with this content. Students, if interested in purchasing this title with Mastering Geography, ask your instructor to confirm the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the loose-leaf version of the text and Mastering Geography, search for: 0134738268 / 9780134738260 My Health, Books a la Carte Plus MasteringHealth with Pearson eText -- Access Card Package, 3/e How food pantries stigmatize their clients through a discourse that emphasizes hard work, self help, and economic productivity rather than food justice and equity. The United States has one of the highest rates of hunger and food

insecurity in the industrialized world, with poor households, single parents, and communities of color disproportionately affected. Food pantries—run by charitable and faith-based organizations—rather than legal entitlements have become a cornerstone of the government's efforts to end hunger. In *Feeding the Other*, Rebecca de Souza argues that food pantries stigmatize their clients through a discourse that emphasizes hard work, self help, and economic productivity rather than food justice and equity. De Souza describes this “framing, blaming, and shaming” as “neoliberal stigma” that recasts the structural issue of hunger as a problem for the individual hungry person. De Souza shows how neoliberal stigma plays out in practice through a comparative case analysis of two food pantries in Duluth, Minnesota. Doing so, she documents the seldom-acknowledged voices, experiences, and realities of people living with hunger. She describes the failure of public institutions to protect citizens from poverty and hunger; the white privilege of pantry volunteers caught between neoliberal narratives and social justice concerns; the evangelical conviction that food assistance should be “a hand up, not a handout”; the culture of suspicion in food pantry spaces; and the constraints on food choice. It is only by rejecting the neoliberal narrative and giving voice to the hungry rather than the privileged, de Souza argues, that food pantries can become agents of food justice.

Rebecca Lee Crumpler (1831 - 1895), was an author and the first African American female physician in the United States. In 1883 she published *A Book of Medical Discourses*, which was made from notes she compiled over her medical career.

Access to HealthPearson

Learning from Disease in Pets: A ‘One Health’ Model for Discovery is the first encompassing reference guide for veterinarians, researchers and physicians on conducting studies using spontaneous models of disease in animals. The study of naturally occurring disease in (pet) animals can help model our understanding of the biology, prevention and therapy of human and animal diseases. Studies of pet dogs, for instance, can aid treatment of complex medical problems such as cancer, orthopedic, cardiopulmonary, and neuro-inflammatory diseases, and zoonotic infections. Each chapter within this novel cross-species approach is contributed by a leader, or leaders, in their field of research. Using clinical trials to learn how pets with real diseases respond to therapy can lead to breakthroughs in human medicine, as well as benefiting pets suffering from otherwise debilitating illness. Despite similarities of diseases across species, there are very few spontaneous models of disease used in research compared with models where disease is induced in healthy laboratory animals. Many medical researchers and veterinarians have a multitude of questions regarding how to use naturally occurring diseases in pets for the discovery of treatments and diagnostics: this book will demonstrate how to safely make this happen. This book encourages veterinarians to build on and disseminate existing findings for the wider

benefit of pets and humans. Many pets suffering from incurable illnesses may benefit from clinical trials; the book includes a section on the imperative communication styles necessary within the research environment and with clients, a compelling discussion on the ethics of using pets in veterinary clinical research, comprehensive tables of diseases that spontaneously occur in animals and humans, the regulatory requirements necessary to move therapy from benchside research to patient bedside, as well as intricate details on how to design a robust clinical study.

Developed in response to the theoretically driven mainstream sociology, institutional ethnography starts from people's everyday experiences, and works from there to discover how the social is organized. Starting from experience is a central step in challenging taken-for-granted assumptions and relations of power, whilst responding critically to the neoliberal cost-benefit ideology that has come to permeate welfare institutions and the research sector. This book explicates the Nordic response to institutional ethnography, showing how it has been adapted and interpreted within the theoretical and methodological landscape of social scientific research in the region, as well as the institutional particularities of the Nordic welfare state. Addressing the main topics of concern in the Nordic context, together with the way in which research is undertaken, the authors show how institutional ethnography is combined with different theories and methodologies in order to address particular problematics, as well as examining its standing in relation to contemporary research policy and university reforms. With both theoretical and empirical chapters, this book will appeal to scholars and students of sociology, professional studies and anthropology with interests in research methods and the Nordic region.

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- Health starts here! With an emphasis on

media, the new Health: The Basics, Tenth Edition features robust relatable content, bringing health topics to life and keeping you hooked on learning and living well. Now enhanced with an even more comprehensive package of easy-to-use media and supplements, this edition makes teaching and learning personal health extra dynamic. The Tenth Edition includes new ABC News videos, more online worksheets, new course management and eText options, Tweet Your Health, new student "behavior change video log (vlog)" videos, countless new teacher supplements, and more. These resources bring personal health to life in any form-in the classroom, online, or on the iPad. These tools all motivate students to be more interested in the book content and invest in their health.

The Thirteenth Edition of Access to Health makes personal health engaging for students to learn and easier for instructors to teach by focusing on the most important real-world issues and topics, highlighting a focus on technology and money. Long known for its currency, research, and strength in behavior change, Access to Health provides key information through a consistent framework for motivating you to make healthy life choices. As a teacher, mentor, and researcher, Rebecca J. Donatelle knows the issues that are important to today's students. Through her friendly writing style she addresses your concerns and teaches them to be savvy and critical consumers of health information. The Thirteenth Edition adds new features highlighting health topics centering around money and technology issues. Additionally, the book references one Video Tutor per chapter with QR codes. You simply scan the code with a reader on their phone and quickly and easily view a short video that makes a tricky concept easy to understand. As always, the book's attractive design, imaginative art, unique mini-chapters, and robust media make learning personal health more accessible. Access to Health provides hands-on practical tools that help you effect healthy changes in your life. Note: If you are purchasing the standalone text or electronic version, MasteringHealth does not come automatically packaged with the text. To purchase MasteringHealth please visit www.masteringhealthandnutrition.com or you can purchase a package of the physical text + MasteringHealth by searching for 0321982746 / 9780321982742. MasteringHealth is not a self-paced technology and should only be purchased when required by an instructor.

Critical Medical Anthropology presents inspiring work from scholars doing and engaging with ethnographic research in or from Latin America, addressing themes that are central to contemporary Critical Medical Anthropology (CMA). This includes issues of inequality, embodiment of history, indigeneity, non-communicable diseases, gendered violence, migration, substance abuse, reproductive politics and judicialisation, as these relate to health. The collection of ethnographically informed research, including original theoretical contributions, reconsiders the broader relevance of CMA perspectives for addressing current global healthcare challenges from and of Latin America. It includes work spanning four countries in Latin America (Mexico, Brazil, Guatemala and Peru) as well as the trans-migratory contexts

they connect and are defined by. By drawing on diverse social practices, it addresses challenges of central relevance to medical anthropology and global health, including reproduction and maternal health, sex work, rare and chronic diseases, the pharmaceutical industry and questions of agency, political economy, identity, ethnicity, and human rights.

A version of Access to Health, this text emphasizes the essential health information necessary to develop a comprehensive understanding of health promotion and disease prevention. The book is presented from a behavioural management perspective, providing readers with practical health information.

Hope is central to marginal politics which speak of desires for equality or simply for a better life. Feminism might be characterised as a politics of hope, a movement underpinned by a utopian drive for equality. This version of hope has been used, for example in Barack Obama's phrase 'the audacity of hope' – a mobilisation of an affirmative politics which nevertheless implies that we are living in hopeless times. Similarly, in recent years, feminism has seen the production of a prevailing mood of hopelessness around a generational model of progress, which is widely imagined to have 'failed'. However, as a number of feminist theorists have pointed out, the temporality of feminism cannot be conceived as straightforwardly linear: feminism can only be imagined as having failed if it is understood as a particular set of relations and things. This collection grapples with the question of hope: how it figures and structures feminist theory as both a movement towards certain goals, and as inherently hopeful. Questions addressed include: Does hope necessarily imply a fantasy of perfectibility, a progression to a utopian future? Might it also be conceived in other ways: as an attachment? A lure? Does life tend towards hope, happiness, optimism? And, if so, what are the consequences when hope fails? Who decides which hopes are false? What is the cost of giving up hope? This book was published as a special issue of the Journal for Cultural Research.

Advancing the Human Right to Health offers a prospective on the global response to one of the greatest moral, legal, and public health challenges of the 21st century - achieving the human right to health as enshrined in the Universal Declaration of Human Rights (UDHR) and other legal instruments. Featuring writings by global thought-leaders in the world of health human rights, the book brings clarity to many of the complex clinical, ethical, economic, legal, and socio-cultural questions raised by injury, disease, and deeper determinants of health, such as poverty. Much more than a primer on the right to health, this book features an examination of profound inequalities in health, which have resulted in millions of people condemned to unnecessary suffering and hastened deaths. In so doing, it provides a thoughtful account of the right to health's parameters, strategies on ways in which to achieve it, and discussion of why it is so essential in a 21st century context. Country-specific case studies provide context for analysing the right to health and assessing whether, and to what extent, this right has influenced critical decision-making that makes a difference in

people's lives. Thematic chapters also look at the specific challenges involved in translating the right to health into action. *Advancing the Human Right to Health* highlights the urgency to build upon the progress made in securing the right to health for all, offering a timely reminder that all stakeholders must redouble their efforts to advance the human right to health.

Ready to transform your body and mind into the healthiest, happiest you? You're going to need enthusiasm, an open mind, and a good deal of grit. In *It Takes Grit*, fitness expert and mindset coach Rebecca Louise shares a practical no-BS guide to take your workouts, health, and motivation to the next level—along with a 30-day challenge to kick-start your results. Through her ultrapopular YouTube channel and social media, Rebecca Louise has helped millions of people improve their mindset and achieve their wellness goals. Rebecca knows what it's like to feel lost, unable to find the right career, live broke, go through a divorce, and struggle with a negative relationship with food. It wasn't until she changed her mindset and started to master high-performance habits that she truly found her way to a career she loved and a healthy lifestyle. Now, in *It Takes Grit*, Rebecca shares her tried-and-true tools to lock onto your purpose, uncover your inner grit, and get in the right mindset to go after your goals. She shares:

- Her 10-step guide to getting results in all areas of your life
- An action plan to get started, no matter where you are right now
- Tips to create a meal plan and training routine you can stick to forever
- How to get and stay motivated no matter what life throws at you
- Interactive tasks after each chapter to master your daily habits

Rebecca also shares her 30-day targeted daily workout program (with bonus online workout videos), to make sure you're never overworking your body, recipes for every meal, and daily tasks that will help you get to the next level. *It Takes Grit* will give you the tools needed to take control of your health and happiness.

Gastra Girl Resource Guide: A collection of hard to find articles to optimize your health - naturally. Subjects include Colonics, Hyperbaric Oxygen Therapy, Ozone Therapy, Information on Environmental Toxicity and Nutritional Information including the power of providing the body with necessary nutrients such as Vitamin C, Magnesium, Boron, Niacin, and Probiotics, along with The *Gastra Girl Detox Protocol*.

NOTE: You are purchasing a standalone product; *MasteringHealth* does not come packaged with this content. Organized for Today's Busy Students The Second Edition of My Health: The MasteringHealth Edition delivers the latest in personal health with tools that help students tackle what they need to know, within their own time constraints. The book's modular organization allows students to focus on learning the core material they need to know, while Learning Outcomes and review questions provide them with immediate feedback on what they've learned and allow them to customize their study plan. Meanwhile, a concise text and a comprehensive supplements package helps students zero in on what they need to know—without the jargon—making personal health courses more rewarding. The MasteringHealth Edition is designed to work with MasteringHealth to provide students with concrete learning goals, giving instructors an invaluable tool for assessing students' progress. The book builds on the power of MasteringHealth by tying its learning goals to a variety of interactive activities and assets.

Create a healthier and happier life by treating yourself with compassion rather than shame. Imagine a graph with two lines. One indicates happiness, the other tracks how you feel about your body. If you're like millions of people, the lines do not intersect. But what if they did? This practical, inspirational, and visually lively book shows you the way to a sense of well-being attained by understanding how to love, connect, and care for yourself—and that includes your mind as well as your body. Body Kindness is based on four principles. WHAT YOU DO: the choices you make about food, exercise, sleep, and more HOW YOU FEEL: befriending your emotions and standing up to the unhelpful voice in your head WHO YOU ARE: goal-setting based on your personal values WHERE YOU BELONG: body-loving support from people and communities that help you create a meaningful life With mind and body exercises to keep your energy spiraling up and prompts to help you identify what YOU really want and care about, Body Kindness helps you let go of things you can't control and embrace the things you can by finding the workable, daily steps that fit you best. It's the anti-diet book that leads to a more joyful and meaningful life.

Photovoltaics (PV) play a vital role in an energy-conscious society where the demand for cheap, convenient, and environmentally benign sources of energy is certain to increase. The range of applications is immense, encompassing many spheres of activity, from modern consumer electronics to the supply of power. Bringing together experts in their fields, Applications of Photovoltaics provides a stimulating account of the technical and economic aspects of the many areas that PV technology has been or is soon to be implemented. The book includes chapters on terrestrial applications of PV; PV for development, placing PV in the context of an energy policy for developing countries; PV for developing countries, which discusses the techno-economics of PV applications; PV systems for professional applications, which include hybrid systems; and low-power applications of PV for consumer, leisure, and other systems. Applications of Photovoltaics is appealing to all engineers, from energy advisors and policy makers, with an interest in or need for off-

grid electrical supplies, from microwatts to megawatts. Its level of presentation makes it accessible to those without an engineering or economics background.

#1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE’S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences. Given the present, stress-inducing state of the economy and the world, there has never been a better time to provide a wake-up call on how to relax, get centered, get 8 hours of sleep and be happier and more successful. Recent research has shown us that when we get enough sleep, we are able to accomplish more in less time and with less stress and

greater health. We don't need a 26-hour day. With more efficient and effective sleep habits, in our book, 24 hours is more than adequate. Our proposition is simple and compelling. Do you want to be healthier, more productive, energetic, creative, organized, efficient, and constantly expanding your potential? Do you want to be less stressed, happier, have a better relationship with yourself and others, and a deeper sense of well-being? What if you could take a few small steps every day that would enable you to eventually achieve all these things? You can. In fact, it's easy. *Sleep for Success!*, a convincing, psychological approach to changing attitudes and behaviors, is written for anyone who wants to get a great night's sleep, feel wide-awake and be a peak performer all day. It pertains to executives, students, parents, athletes, children and senior citizens. If you're human, chances are that you are at least somewhat sleep deprived. *Sleep for Success!* can change your life – literally overnight.

For personal health courses. Motivating students to make healthy choices Long known for its currency, research, and strength in behavior change, *Access to Health* provides key information through a consistent framework for motivating students to make healthy life choices. As a teacher, mentor, and researcher, Rebecca J. Donatelle knows the issues that are important to today's students. Through her friendly writing style, she addresses students' concerns and teaches them to be savvy and critical consumers of health information.

This book provides experienced and detailed research-based guidance for library professionals charged with creating a comprehensive accessibility plan for their organization. This practical guide is designed to help librarians understand the challenging issues often inherent in the different types of accessibility barriers.

This innovative volume introduces Twinley's concept of 'The Dark Side of Occupation'. Focused on less explored and under-addressed occupations, it is an idea which challenges traditional assumptions around the positive, beneficial, health-promoting relationship between occupation and health. Emphasising that people's individual experiences of occupations are not always addressed and may not always be legal, socially acceptable, or conducive to good health, the book investigates how these experiences can be explored theoretically, in practice and research, and in curriculum content for those learning about occupation. Beginning with a discussion of some assumptions and misunderstandings that have been made about the concept, the substantive chapters present and analyse tangible examples of the concept's applicability. This ground-breaking and practice-changing text provides ideas for future research and highlights contemporary, internationally relevant issues and concerns, such as the coronavirus pandemic. This book is an essential purchase for students in occupational therapy and science, and valuable supplementary reading for practitioners. It is also relevant to a wide interdisciplinary audience with an interest in human occupation, encompassing anthropologists, councillors, criminologists, nurses, and human geographers.

NOTE: This loose-leaf, three-hole punched version of the textbook gives you the flexibility to take only what you need to class and add your own notes -- all at an affordable price. For loose-leaf editions that include *MyLab*(tm) or *Mastering*(tm), several versions may exist for each

title and registrations are not transferable. You may need a Course ID, provided by your instructor, to register for and use MyLab or Mastering products. For courses in personal health. Motivate students to become actively engaged in their own health Access to Health combines scientifically valid research and the most current information to encourage healthy life choices. As a teacher, mentor, and researcher, author Rebecca J. Donatelle uses her friendly writing style to address students' concerns and motivate them to be savvy, critical consumers of health information. Continuing debates over the meaning of development and awareness of the persistence of poverty have resulted in increasing concern over how to 'do' development. There are growing numbers of development organizations, undertaking different activities, at different scales, with different motivations, and differing levels of success. It is necessary to identify and evaluate these varied organizations, in order to recognize their successes and failures. Development Organizations is the first introductory text to focus specifically on the variety of organizations involved in development policy and practice. It explores the range and role of organizations, including community-based organizations and civil society actors, international non-governmental organizations, state and other national-based actors, global forms of governance, international financial institutions and transnational corporations. The historical and contemporary role of each of these actors is considered, with analysis of complex theoretical debates surrounding their existence and their activities. The book also explores the political and contested nature of development activities promoted by these organizations, and their effects on society, the economy and the environment. These issues are also considered in context of the Millennium Development Goals; the agenda which currently impacts on the operation and outcomes of the broad range of development organizations. This invaluable text is richly complimented throughout with case studies to help illustrate the operations of development organizations; from the impact of multinational oil companies in the Niger delta to the impact of IMF reforms in Latin America and the Caribbean. This clearly written and user friendly text contains a wealth of features to assist student learning, including start of chapter learning outcomes, and end of

chapter summaries, discussion topics, and suggestions for further reading and relevant websites.

Many Smart Grid books include "privacy" in their title, but only touch on privacy, with most of the discussion focusing on cybersecurity. Filling this knowledge gap, *Data Privacy for the Smart Grid* provides a clear description of the Smart Grid ecosystem, presents practical guidance about its privacy risks, and details the actions required to prote

Design for Wellbeing charts the development and application of design research to improve the personal and societal wellbeing and happiness of people. It draws together contributions from internationally leading academics and designers to demonstrate the latest thinking and research on the design of products, technologies, environments, services and experiences for wellbeing. Part I starts by conceptualising wellbeing and takes an in-depth look at the rise of the design for wellbeing movement. Part II then goes on to demonstrate design for wellbeing in practice through a broad range of domains from products and environments to services. Among others, we see emerging trends in the design of interiors and urban spaces to support wellbeing, designing to enable and support connectedness and social interaction, and designing for behaviour change to tackle unhealthy eating behaviour in children. Significantly, the body of work on subjective wellbeing, design for happiness, is increasing, and several case studies are provided on this, demonstrating how design can contribute to support the wellbeing of people. Part III provides practical guidance for designing for wellbeing through a range of examples of tools, methods and approaches, which are highly user-centric, participatory, critical and speculative. Finally, the book concludes in Part IV with a look at future challenges for design for wellbeing. This book provides students, researchers and practitioners with a detailed assessment of design for wellbeing, taking a distinctive global approach to design practice and theory in context. *Design for Wellbeing* concerns designers and organisations but also defines its broader contribution to society, culture and economy.

This supplement updates the ninth edition of the classic reference with information on children's picture books published in 2014 and 2015. It is an essential guide for collection development and readers' advisory as well as an invaluable resource for program planning.

- Offers quick access to subjects of interest to young children
- Provides easy-to-understand subject headings that can be used by patrons as well as professionals
- Helps in preparing reading lists and organizing storytime themes
- Covers a broad range of subjects to meet the needs of librarians, teachers, parents, and homeschoolers
- Features user-friendly organization
- Includes in-depth indexing and full bibliographical details

If you would like to purchase both the physical text and MasteringHealth(tm) search for: 0134161009 / 9780134161006 The Basics, The MasteringHealth Edition Plus MasteringHealth with eText -- Access Card Package, 12/e Package consists of: 0134183266 / 9780134183268 Health: The Basics, The MasteringHealth Edition 0134245687 / 9780134245683

MasteringHealth with Pearson eText -- ValuePack Access Card -- for Health: The Basics, The MasteringHealth Edition For Personal Health Courses. This package includes MasteringHealth (tm). Bringing interactivity to readers' fingertips Health: The Basics, MasteringHealth Edition focuses health coverage on real-world topics that have the greatest impact on readers' lives, keeping individuals hooked on learning and living well. Along with dynamic new interactive content and media, this book retains its hallmarks of currency, accessibility, cutting-edge research, focus on behavior change, attractive design, imaginative art, and unique mini-chapters. The Twelfth Edition addresses readers' diverse needs and learning styles by tightly weaving online assignable activities into the narrative in the text. Every chapter includes Learning Outcomes and a new study plan that ties directly into MasteringHealth activities. Assignable self-assessments and reading quizzes help instructors engage individuals in the material. Also Available with MasteringHealth This title is also available with MasteringHealth--an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Interactive, self-paced tutorials provide individualized coaching to help students stay on track. With a wide range of activities available, students can actively learn, understand, and retain even the most difficult concepts.

Written by experienced practitioners and researchers, Assessment of Cataloging and Metadata Services provides the reader with many examples of how assessment practices can be applied to the work of cataloging and metadata services departments. Containing both research and case studies, it explores a variety of assessment methods as they are applied to the evaluation of cataloging productivity, workflows, metadata quality, vendor services, training needs, documentation, and more. Assessment methods addressed in these chapters include surveys, focus groups, interviews, observational analyses, workflow analyses, and methodologies borrowed from the field of business. Assessment of Cataloging and Metadata Services will help managers and administrators as they attempt to evaluate and communicate the value of what they do to their broader communities, whether they are higher education institutions, another organization, or the public. This book will help professionals with decision making and give them the tools they need to identify and implement improvements. The chapters in this book were originally published in a special issue in Cataloging & Classification Quarterly.

An engaging look into the life of Rebecca Dickinson and the paradoxes presented by an unmarried woman who earned her own living at the time of the American Revolution
