The number-one guide, internationally, to all aspects of forensic isotope analysis, thoroughly updated and revised and featuring many new case studies This edition of the internationally acclaimed guide to forensic stable isotope analysis uses real-world examples to bridge discussions of the basic science, instrumentation and analytical techniques underlying forensic isotope profiling and its various technical applications. Case studies describe an array of applications, many of which were developed by the author himself. They include cases in which isotope profiling was used in murder, and drugs-related crime investigations, as well as for pharmaceutical and food authenticity control studies. Updated with coverage of exciting advances occurring in the field since the publication of the 1st edition, this 2nd edition explores innovative new techniques and applications in forensic isotope profiling, as well as key findings from original research. More than a simple update, though, this edition has been significantly revised in order to address serious problems that can arise from non-comparable and unfit-for-purpose stable isotope data. To that end, Part II has been virtually rewritten with greater emphasis now being placed on important quality control issues in stable isotope analysis in general and forensic stable isotope analysis in particular. Written in a highly accessible style that will appeal to practitioners, researchers and students alike Illustrates the many strengths and potential pitfalls of forensic stable isotope analysis Uses recent case examples to bridge underlying principles with technical applications Presents hands-on applications that let experienced researchers and forensic practitioners match problems with success stories Includes new chapters devoted to aspects of quality control and quality assurance, including scale normalisation, the identical treatment principle, hydrogen exchange and accreditation Stable Isotope Forensics, 2nd Edition is an important professional resource for forensic scientists, law enforcement officials, public prosecutors, defence attorneys, forensic anthropologists and others for whom isotope profiling has become an indispensable tool of the trade. It is also an excellent introduction to the field for senior undergraduate and graduate forensic science students. "All students of forensic criminology, and all law enforcement officers responsible for the investigation of serious crime , will want to study this book. Wolfram highlights the value, and future potential, of Stable Isotope Forensics as an emerging powerful tool in the investigation of crime." —Roy McComb, Deputy Director, Specialist Investigations, National Crime Agency (NCA), UK "A single author text in these days is rare and the value of this book lies in the dedication and experience of the author which is evident in the clarity of prose, the honest illustration of evidence and the realistic practical application of the subject - it makes this a text of genuine scientific value." — Prof Dame Sue Black, PhD, DBE, OBE, FRSE, Leverhulme Research Centre for Forensic Science, University of Dundee, UK The book provides an excellent, vivid and comprehensible introduction into

the world of stable isotope science and analytics. Compared to the first edition, the aspects of quality control and assurance in the analysis of stable isotopes in general, and forensic application in particular, are now taking much more room. This allows the book to serve the target groups: students, academic professionals and practitioners, and serves as a solid resource of basic and applicable information about the strengths and potential pitfalls of the application of stable isotope signatures. The present high-quality book shows the great potential of stable isotopes and is a must for everyone interested in isotope forensics. M.E. Böttcher & U. The well-being of children represents a challenge not yet fully confronted and *The Handbook of Child Well-being* supplies its readers with a thorough overview of the complexities and implications regarding the scientific and practical pursuit of children's well-being. The handbook addresses the concept of well-being through an in-depth analysis of the perspectives and vocabularies of various disciplines such as, philosophy, theology, psychology and sociology. It covers important issues in child well-being and the problems of the general politics of well-being as well as the implementation of interventional programs and measures. In addition the handbook deals with the methods of measuring well-being for a scientifically grounded understanding and also for policy-making. The interdisciplinary set up of the handbook makes it a unique work that offers readers from a vast scope of child-related disciplines and professions a profound overview of the complexities and implications of the scientific and practical pursuit of children's well-being.

The book poses and explores questions about the roles of antiretroviral treatment and human rights in the global AIDS epidemic. A novel approach is used, which places treatment and human rights in the context of global debates, national struggles, and, especially, a case study of the lived experiences within a local community in South Africa.

Das Lehrbuch und die zugehörige Lernsoftware basieren auf erprobten Lern- und Übungskonzepten und bieten eine inhaltlich und mediendidaktisch weit entwickelte Einführung in die Grundlagen einer auf finanzmathematische Kennzahlen gestützten Investitionsentscheidung.

Since 2000 and the implementation of China's 'going abroad' policy, mainland Chinese state-owned and private companies have significantly increased their interests in the resources and investment opportunities of the Congo Basin, bringing new opportunities as well as potential social and environmental costs. This report is a synthesis of some main findings of preliminary scoping studies conducted by CIFOR and partners in Cameroon, Democratic Republic of Congo and Gabon. It focuses on how Chinese trade and investment in the forestry, mining and agricultural sectors might relate to effects on forests and forest-dependent communities in the region. All studies were conducted under the CIFOR project 'Chinese trade and investment in Africa: Assessing and governing trade-offs to national economies, local livelihoods and forest ecosystems', initiated in 2010. The scoping studies yielded useful results, including an increased understanding of the

main trends in natural resources trade between the target countries and China, and the major land-based productive sectors targeted by Chinese investors. The studies also considered the role of national agencies tasked with promoting investment and overseeing corporate adherence to environmental and social requirements, and provided a better understanding of the informal processes surrounding investment and acquisition of land and other resources.

Isaac Bashevis Singer is known for his mastery of storytelling - but it was not until 1966, at the age of sixty-two, that he published his first children's book, *Zlateh the Goat*, a Newbery Honor Book and instant classic. Singer went on to write many stories for children, most of which are included in this volume, along with a brief introduction and a special epilogue, "Are Children the Ultimate Literary Critics?" The collection presents exuberant and timeless tales for children rich in fantasy and deeply rooted in the lost cultural tradition of his native Poland. A number of the stories appear in book form for the first time - and all have been translated from the Yiddish with the author's personal supervision.

Reading fluency has been identified as a key component of proficient reading. Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement. Despite the great potential for fluency to have a significant outcome on students' reading achievement, it continues to be not well understood by teachers, school administrators and policy makers. The chapters in this volume examine reading fluency from a variety of perspectives. The initial chapter sketches the history of fluency as a literacy instruction component. Following chapters examine recent studies and approaches to reading fluency, followed by chapters that explore actual fluency instruction models and the impact of fluency instruction. Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention. Two articles on assessment, one focused on word recognition and the other on prosody, expand our understanding of fluency measurement. Finally, a study from Turkey explores the relationship of various reading competencies, including fluency, in an integrated model of reading. Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more integral part of all literacy instruction.

This book reassesses central topics in cultural economics: Public finance and public choice theory as the basis for decision-making in cultural and media policy, the role of welfare economics in cultural policy, the economics of creative industries, the application of empirical testing to the performing arts and the economics of cultural heritage. Cultural economics has made enormous progress over the last 50 years, to which Alan Peacock made an important contribution. The volume brings together many of the senior figures, whose contributions to the various special fields of cultural economics have been instrumental in the development of the subject, and others reflecting on the subject's progress and assessing its future direction. Alan Peacock has been one of the leading lights of cultural economics and in this volume Ilde Rizzo and Ruth Towse and the other contributors ably capture the import of his contributions in a broader context of political economy. In doing so, they offer an overview of progress in cultural economics over the last forty years. Tyler Cowen, Professor of Economics and Director of the Mecatus Center, George Mason University, Fairfax, Virginia, USA A fitting tribute to Professor Sir Alan Peacock's inspiring intellect leadership and his outstandingly rich and varied legacy in the domain of cultural economics, this book draws together illuminating analyses and insights from leading cultural economists about the role and value of this dynamic and increasingly policy-relevant field of enquiry. Gillian Doyle, Professor of Media Economics and Director of Centre for Cultural Policy Research, University of Glasgow, UK

Glucosinolates, the latest volume in the Advances in Botanical Research series, presents in-depth and up-to-date reviews on a wide range of topics in the plant sciences, with this edition focusing on glucosinolates. The individual chapters cover all aspects of glucosinolate research from biosynthesis, degradation, regulation, and ecology, to the mechanisms of their health benefits. The chapters are written by the world leaders of glucosinolate research. Provides in-depth, up-to-date reviews on a wide range of topics in plant sciences, with this edition focusing on glucosinolates Contains commentary by recognized experts on all aspects of plant genetics, biochemistry, cell biology, molecular biology, physiology, and ecology

Indonesia contains some of Asia's most biodiverse and threatened forests. The challenges result from both long-term management problems and the political, social, and economic turmoil of the past few years. The contributors to *Which Way Forward?* explore recent events in Indonesia, while focusing on what can be done differently to counter the destruction of forests due to asset-stripping, corruption, and the absence of government authority. Contributors to the book include anthropologists, economists, foresters, geographers, human ecologists, and policy analysts. Their concerns include the effects of government policies on people living in forests, the impact of the economic crisis on small farmers, links between corporate debt and the forest sector, and the fires of the late 1990s. By analyzing the nation's dramatic circumstances, they hope to demonstrate how Indonesia as well as other developing countries might handle their challenges to protect biodiversity and other resources, meet human needs, and deal with political change. The book includes an afterword by Emil Salim, former Indonesian Minister of State for Population and the Environment and former president of the Governing Council of the United Nations Environment Programme. A copublication of Resources for the Future and the Center for International Forestry Research (CIFOR) and the Institute for Southeast Asian Studies (ISEAS).

An authoritative teacher resource and widely adopted text, this book provides a comprehensive overview of adolescent literacy instruction in the era of the Common Core State Standards (CCSS). Leading educators describe effective practices for motivating diverse learners in grades 5-12, building comprehension of multiple types of texts, integrating literacy and content-area instruction, and teaching English language learners and struggling readers. Case examples, lesson-planning ideas, and end-of-chapter discussion questions and activities enhance the utility of the volume. New to This Edition *Extensive CCSS content incorporated throughout the book. *Chapters on disciplinary literacy, text complexity, and differentiated instruction. *Chapters on academic language, writing instruction, history and English/language arts classrooms, and coaching.

The only book on the market that provides current, necessary, and comprehensive technical knowledge of extruded cables and high-voltage direct-current transmission This is the first book to fully address the technical aspects of high-voltage direct-current (HVDC) link projects with extruded cables. It covers design and engineering techniques for cable lines, insulation materials, and accessories, as well as cable performance and life span and reliability issues. Beginning with a discussion on the fundamentals of HVDC cable transmission theory, *Extruded Cables for High-Voltage Direct-Current Transmission: Advances in Research and Development* covers: Both the cable and the accessories (joints and

terminations), each of which affects cable line performance The basic designs of HVDC cables—including a comparison of mass insulated non-draining cables with extruded HVDC cables The theoretical elements on which the design of HVDC cables is based—highlighting the differences between HVAC and HVDC cables Space charge-related problems that have a critical impact on extruded insulation for HVDC application Recent advances in extruded compounds for HVDC cables such as additives and nano-fillers The improved design of extruded HVDC cable systems—with emphasis on design aspects relevant to accessories Cable line reliability problems and the impact on cable system design Including more than 200 illustrations, Extruded Cables for High-Voltage Direct-Current Transmission fills a gap in the field, providing power cable engineers with complete, up-to-date guidance on HVDC cable lines with extruded insulation.

Gambling monkeys, dancing zombies and mountain lions on treadmills are just a few projects exposed in Wastebook 2014 – highlighting \$25 billion in Washington's worst spending of the year. Wastebook 2014 — the report Washington doesn't want you to read — reveals the 100 most outlandish government expenditures this year, costing taxpayers billions of dollars. “With no one watching over the vast bureaucracy, the problem is not just what Washington isn't doing, but what it is doing.” Dr. Coburn said. “Only someone with too much of someone else's money and not enough accountability for how it was being spent could come up some of these projects.” “I have learned from these experiences that Washington will never change itself. But even if the politicians won't stop stupid spending, taxpayers always have the last word.” Congress actually forced federal agencies to waste billions of dollars for purely parochial, political purposes. For example, lawmakers attached a rider to a larger bill requiring NASA to build a \$350 million launch pad tower, which was mothballed as soon as it was completed because the rockets it was designed to test were scrapped years ago. Similarly, when USDA attempted to close an unneeded sheep research station costing nearly \$2 million every year to operate, politicians in the region stepped in to keep it open. Examples of wasteful spending highlighted in “Wastebook 2014” include:

- Coast guard party patrols – \$100,000
- Watching grass grow – \$10,000
- State department tweets @ terrorists – \$3 million
- Swedish massages for rabbits – \$387,000
- Paid vacations for bureaucrats gone wild – \$20 million
- Mountain lions on a treadmill – \$856,000
- Synchronized swimming for sea monkeys – \$50,000
- Pentagon to destroy \$16 billion in unused ammunition -- \$1 billion
- Scientists hope monkey gambling unlocks secrets of free will – \$171,000
- Rich and famous rent out their luxury pads tax free – \$10 million
- Studying “hangry” spouses stabbing voodoo dolls – \$331,000
- Promoting U.S. culture around the globe with nose flutists – \$90 million

Das Buch beschäftigt sich mit der Überprüfung wissenschaftlicher Kausalhypothesen mithilfe experimenteller Ansätze. Gegenstand sind zunächst die begrifflichen Voraussetzungen (Hypothese, Variable, Validität). Danach wird differenziert auf die Versuchsplananlagen und die Versuchspläne eingegangen. Besondere Beachtung finden Überlegungen zu den

verschiedenen Validitätsaspekten und der Präzision. Diese vornehmlich versuchsplanerischen Aspekte werden ergänzt durch die zugehörigen Überlegungen zur statistischen Auswertung der erhobenen Daten. Weitere Ergänzungen betreffen die Varianten des Experiments (Feldexperiment, Quasi-Experiment usw.), die Überlegungen zur ethischen Problematik von empirischen Untersuchungen und die Einbindung der experimentellen Hypothesenprüfung in den Zusammenhang der Erstellung, Prüfung und Veränderung von Theorien. Das Buch ist in erster Linie für Studierende der Psychologie und verwandter Sozialwissenschaften gedacht. Ziel ist es, die Studierenden theoretisch und praktisch mit der experimentellen Hypothesenprüfung vertraut zu machen. Zu diesem Zweck wird z.B. die Durchführung der besprochenen statistischen Auswertungsverfahren auch mithilfe des Programmpakets SPSS besprochen.

Arbitration is an essential component in business. In an age when transparency is a maxim, important issues which the laws governing arbitration currently fail to address are the extent to which disclosure of information can be constrained by private agreement along with the extent to which the duty to preserve confidentiality can be stretched. Absent a coherent legal framework and extensive qualitative and quantitative data, it is equally difficult to suggest and predict future directions. This book offers a tool for attaining centralised access to otherwise fragmentary and dispersed material, as well as a comprehensive analysis and detailed exposition of the position in relation to confidentiality in arbitration in the jurisdictions of England, USA, France and Germany.

The Practice of Qualitative Research guides readers step by step through the process of collecting, analyzing, designing, and interpreting qualitative research. Written by Sharlene Nagy Hesse-Biber in an engaging style, this student-centered text offers invaluable insights into the practice of qualitative research, with coverage of in-depth interviewing, focus groups, ethnography, case study, and mixed methods research. The Third Edition features even more integrated attention to online research and implications of social media throughout all methods chapters; updates on qualitative analysis software; and significantly expanded coverage of ethics.
