### andAnatomy and PhysiologyPassbooks

Lists achievement, aptitude, intelligence, personality, and sensorimotor skill tests, and offers information on test levels, subject matter, and scoring

The College Proficiency Examination Program (CPEP) enables those who lack formal college course work to demonstrate their competency in various subject areas on a credit-by-examination basis.

Customers who place a standing order for the Tests in Print series or the Mental Measurements Yearbook series will receive a 10% discount on every volume. To place your standing order, please call 800-755-1105 (in the U.S.) or 402-472-3581 (outside the U.S.). Designed to complement the Mental Measurements Yearbooks, Tests in Print fills a pressing need for a comprehensive bibliography of all tests in print. Although these volumes are useful in and of themselves, their maximum usefulness requires the availability and use of the Mental Measurements Yearbooks. Although information on available tests and specific test bibliographies is valuable, the greatest service which Tests in Print can perform is to encourage test users to choose tests more wisely by consulting the MMY test reviews, the excerpted test reviews from journals, and the professional literature on the construction, use, and validity of the tests being considered.

Researchers and educators agree that it takes more than academic knowledge to be prepared for college—intrapersonal competencies like conscientiousness have been proven to be strong determinants of success. WileyPLUS Learning Space for Anatomy & Physiology helps you identify students' proficiency early in the semester and intervene as needed. Developed for the two-semester course, Anatomy & Physiology is focused on aiding critical thinking, conceptual understanding, and application of knowledge. Real-life clinical stories allow for a richer investigation of content, ensuring that students understand the relevance to their lives and future careers.

Issues for 1975 (v. 61) include the Annual report of the New York State Education Department previously issued as a separate title (call no. 370.9747/N48r)

“Medical knowledge is not communicable to the natives of this country.” With these words, James McAdam, Secretary of the Medical Board of Bombay, sounded the death-knell in 1832 of the pioneering medical school set up in Bombay by Governor Mountstuart Elphinstone. Sir Robert Grant, appointed Governor of Bombay in 1834, disagreed, however. He aimed at ‘the general improvement of medical and surgical science and practice among the native practitioners’. With Dr Charles Morehead, he created a medical college superior

to those in Calcutta, and Madras. Parsi philanthropist Sir Jamsetjee Jejeebhoy single-handedly donated an entire hospital to complement this college. Graduates from these institutions, trained in scientific medicine of the highest standards, went on to serve their fellow countrymen with distinction. This book narrates how against great odds, Grant Medical College went on to rival medical colleges in Europe and America, and Dr Morehead was invited to help improve medical education at the University of London.
