"Terrifying... Eloquent... A heart-rending drama of human yearning." --New York Times

In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. Digging deeply, he takes an inherently compelling mystery and unravels the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

Maybe it was a grandparent, or a teacher, or a colleague. Someone older, patient and wise, who understood you when you were young and searching, helped you see the world as a more profound place, gave you sound advice to help you make your way through it. For Mitch Albom, that person was Morrie Schwartz, his college professor from nearly twenty years ago. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded, and the world seemed colder. Wouldn't you like to see that person again, ask the bigger questions that still haunt you, receive wisdom for your busy life today the way you once did when you were younger?

Mitch Albom had that second chance. He reconnected with Morrie in the last months of the older man's life. Knowing he was dying, Morrie visited with Mitch in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final "class:" lessons in how to live. Tuesdays with Morrie is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world. The #1 NEW YORK TIMES Bestseller The basis for the PBS Ken Burns Documentary The Gene: An Intimate History From the Pulitzer Prize-winning author of The Emperor of All Maladies—a fascinating history of the gene and “a magisterial account of how human minds have laboriously, ingeniously picked apart what makes us tick” (Elle). "Sid Mukherjee has the uncanny ability to bring together science, history, and the future in a way that is understandable and riveting, guiding us through both time and the mystery of life itself." –Ken Burns “Dr. Siddhartha Mukherjee dazzled readers with his Pulitzer Prize-winning The Emperor of All Maladies in 2010. That achievement was evidently just a warm-up for his virtuoso performance in The Gene: An Intimate History, in which he braids science, history, and memoir into an epic with all the range and biblical thunder of Paradise Lost” (The New York Times). In this biography Mukherjee brings to life the quest to understand human heredity and its surprising influence on our lives, personalities, identities, fates, and choices. “Mukherjee expresses abstract intellectual ideas through emotional stories...[and] swaddles his medical rigor with rhapsodic tenderness, surprising vulnerability, and occasional flashes of pure poetry” (The Washington Post). Throughout, the story of Mukherjee’s own family—with its tragic and bewildering history of mental illness—reminds us of the questions that hang over our ability to translate the science of genetics from the laboratory to the real world. In riveting and dramatic prose, he describes the centuries of research and experimentation—from Aristotle and Pythagoras to Mendel and Darwin, from Boveri and Morgan to Crick, Watson and Franklin, all the way through the revolutionary twenty-first century innovators who mapped the human genome. “A fascinating and often sobering history of how humans came to understand the roles of genes in making us who we are—and what our manipulation of those genes might mean for our future” (Milwaukee Journal-Sentinel), The Gene is the revelatory and magisterial history of a scientific idea coming to life, the most crucial science of our time, intimately explained by a master. “The Gene is a book we all should read” (USA TODAY).

“Henry Smith’s father told him that if you build your house far enough away from Trouble, then Trouble will never find you.” But Trouble comes careening down the road one night in the form of a pickup truck that strikes Henry’s older brother, Franklin. In the truck is Chay Chouan, a young Cambodian from Franklin’s preparatory school, and the accident sparks racial tensions in the school—and in the well-established town where Henry’s family has lived for generations. Caught between anger and grief, Henry sets out to do the only thing he can think of: climb Mt. Katahdin, the highest mountain in Maine, which he and Franklin were going to climb together. Along with Black Dog, whom Henry has rescued from drowning, and a friend, Henry leaves without his parents’ knowledge. The journey, both exhilarating and dangerous, turns into an odyssey of discovery about himself, his older sister, Louisa, his ancestry, and why one can never escape from Trouble.

"Mr. Taylor has provided an exciting story...The idea that all humanity would benefit from this special form of color blindness permeates the whole book...The result is a story with a high ethical purpose but no sermon."—*New York Times Book Review* "A taut tightly compressed story of endurance and revelation...At once barbed and tender, tense and fragile—as Timothy would say, 'outrageous good.'"—*Kirkus Reviews* * "Fully realized setting...artful, unobtrusive use of dialect...the representation of a hauntingly deep love, the poignancy of which is rarely achieved in children's literature."—*School Library Journal*, Starred "Starkly dramatic, believable and compelling."—*Saturday Review* "A tense and moving experience in reading."—*Publishers Weekly* "Eloquently underscores the intrinsic brotherhood of man."—*Booklist* "This is one of the best survival stories since

"Carl Zimmer is one of the best science writers we have today." —Rebecca Skloot, author of *The Immortal Life of Henrietta Lacks* We all assume we know what life is, but the more scientists learn about the living world—from protocells to brains, from zygotes to pandemic viruses—the harder they find it is to locate life's edge. Carl Zimmer investigates one of the biggest questions of all: What is life? The answer seems obvious until you try to seriously answer it. Is the apple sitting on your kitchen counter alive, or is only the apple tree it came from deserving of the word? If we can't answer that question here on earth, how will we know when and if we discover alien life on other worlds? The question hangs over some of society's most charged conflicts—whether a fertilized egg is a living person, for example, and when we ought to declare a person legally dead. *Life's Edge* is an utterly fascinating investigation that no one but one of the most celebrated science writers of our generation could craft. Zimmer journeys through the strange experiments that have attempted to re-create life. Literally hundreds of definitions of what that should look like now exist, but none has yet emerged as an obvious winner. Lists of what living things have in common do not add up to a theory of life. It's never clear why some items on the list are essential and others not. Coronaviruses have altered the course of history, and yet many scientists maintain they are not alive. Chemists are creating droplets that can swarm, sense their environment, and multiply. Have they made life in the lab? Whether he is handling pythons in Alabama or searching for hibernating bats in the Adirondacks, Zimmer revels in astounding examples of life at its most bizarre. He tries his own hand at evolving life in a test tube with unnerving results. Charting the obsession with Dr. Frankenstein's monster and how Coleridge came to believe the whole universe was alive, Zimmer leads us all the way into the labs and minds of researchers working on engineering life from the ground up.

This indispensable volume is a lucid and faithful account of the Buddha's teachings. "For years," says the *Journal of the Buddhist Society*, "the newcomer to Buddhism has lacked a simple and reliable introduction to the complexities of the subject. Dr. Rahula's *What the Buddha Taught* fills the need as only could be done by one having a firm grasp of the vast material to be sifted. It is a model of what a book should be that is addressed first of all to 'the educated and intelligent reader.' Authoritative and clear, logical and sober, this study is as comprehensive as it is masterly." This edition contains a selection of illustrative texts from the Suttas and the Dhammapada (specially translated by the author), sixteen illustrations, and a bibliography, glossary, and index. *Siddhartha* is an allegorical novel by Hermann Hesse which deals with the spiritual journey of an Indian boy called Siddhartha during the time of the Buddha. The book was written in German, in a simple, yet powerful and lyrical style. It was first published in 1922, after Hesse had spent some time in India in the 1910s. The story revolves

around a young man who leaves his home and family on a quest for the Truth. Embarking on a journey that takes him from the austerities of renunciation to the profligacy of wealth. That leads him through the range of human experiences from hunger and want, to passion, pleasure, pain, greed, yearning, boredom, love, despair and hope. A journey that leads finally to the river, where he gains peace and eventually wisdom. This is the story of Siddhartha as told by Nobel Laureate Hermann Hesse in his most influential work.

A groundbreaking exploration of the “science of enlightenment,” told through the lens of the journey of Siddhartha (better known as Buddha), by Guardian science editor James Kingsland. In a lush grove on the banks of the Neranjara in northern India—400 years before the birth of Christ, when the foundations of western science and philosophy were being laid by the great minds of Ancient Greece—a prince turned ascetic wanderer sat beneath a fig tree. His name was Siddhartha Gautama, and he was discovering the astonishing capabilities of the human brain and the secrets of mental wellness and spiritual “enlightenment,” the foundation of Buddhism. Framed by the historical journey and teachings of the Buddha, Siddhartha’s Brain shows how meditative and Buddhist practice anticipated the findings of modern neuroscience. Moving from the evolutionary history of the brain to the disorders and neuroses associated with our technology-driven world, James Kingsland explains why the ancient practice of mindfulness has been so beneficial and so important for human beings across time. Far from a New Age fad, the principles of meditation have deep scientific support and have been proven to be effective in combating many contemporary psychiatric disorders. Siddhartha posited that “Our life is shaped by our mind; we become what we think.” As we are increasingly driven to distraction by competing demands, our ability to focus and control our thoughts has never been more challenged—or more vital. Siddhartha’s Brain offers a cutting-edge, big-picture assessment of meditation and mindfulness: how it works, what it does to our brains, and why meditative practice has never been more important.

The third of Jean Smith’s *Beginner’s Guides* focuses on the Buddha’s Eightfold Path—the concepts central to practicing the Buddha’s teachings in daily life. The eight steps on the path are: right understanding, thought, speech, action, livelihood, effort, mindfulness, and concentration. Smith explains exactly what the Buddha had in mind, using translations of his own words and then elucidating them for us. Throughout the book are wonderful quotes from a broad range of Buddhist teachers, giving a taste of the very best each of them has to offer. The *Beginner’s Guide to Walking the Buddha’s Eightfold Path* is a prescription for happiness, not just for overcoming suffering, which is how many people think of Buddhism.
