The booklet will not be available for sale after 31/12/2020.

EDUCATION AND SOCIETY For BA 1st Semester (As per the syllabus of University of Jammu)

Engineering Mathematic

Why should mindfulness and meditation be taught at universities? What impact could the establishment of such programs have on students and on the education system itself? Andreas de Bruin showcases the remarkable results of the first ten years of the Munich Model »Mindfulness and Meditation in a University Context« - a program started in the year 2010 in which 2000 students have already participated. Through meditation-journal entries featured in the book, students describe the effects of mindfulness and meditation on their studies and in their daily lives. In addition to an overview of cutting-edge research into mindfulness and meditation, along with in-depth analyses and explanations of key terms, the book also contains numerous practical exercises with instructions.

Learning contracts are agreements negotiated between students and staff (and sometimes employers) regarding the type and amount of study to be undertaken and the concomitant assessment or credit to be gained. The use of such contracts is increasing rapidly in further and higher education and this reflects their effectiveness not only as a mechanism for managing the great variety of learning activities but as a valuable experience for students. In this book, Mike Laycock and John Stephenson present a range of case studies demonstrating best practice in the use of learning contracts. Reassessing the wide-ranging examples cited, they point up the issues raised the lessons to be learnt and the potential for future development. Topics covered in detail include negotiation as a learning tool for tutors and students, learning contracts and the development of skills and competences, student-driven learning contracts in work-based learning, custom-built learning contracts for corporate clients, and the place and potential of learning contracts in higher education. This broad and authoritative analysis of a topical theme will make stimulating reading for lecturers, heads of department and policy-makers in further and higher education.

This textbook has been designed to meet the needs of B.Sc. First Semester students of Botany as per the UGC Choice Based Credit System (CBCS). It acquaints students with

general characteristics, classification and economic importance of various divisions of biodiversity i.e., Microbes, Algae, Fungi and Archegoniate. While it provides strong conceptual understanding of the subject, it also helps in developing scientific outlook of the student.

This edited book provides professionals in the field of English Language Teaching (ELT) with a situated and culturally-responsive account of diversity and inclusion in English language education, from primary to higher education and in a wide range of settings. The volume focuses on three overlapping areas: interculturality, special education needs, and gender. The chapters in each section seek to help readers reflect on the opportunities and challenges of diversity as a step towards inclusive practices, and raise awareness of critical topics across the curriculum and beyond by engaging in wider social issues. This book will be of interest to language teachers and teacher trainers, as well as scholars working in applied linguistics, higher education, intercultural studies, and related fields. Dario Luis Banegas is a Lecturer in TESOL in the University of Strathclyde and an Associate Fellow with the University of Warwick, UK. His main teaching and research interests are CLIL, action research, and initial English language teacher education. Griselda Beacon is a Lecturer in Literature at Universidad de Buenos Aires and at several teacher training colleges in Buenos Aires, Argentina. A NILE (Norwich Institute for Language Education) trainer in the UK, she has an MA in Literature from Philipps-Universitat Marburg, Germany. Her interests include literature and intercultural education. Mercedes Perez Berbain is a former Lecturer in Teaching Practice at Joaquin V. Gonzalez College of Education, Argentina. She holds an MA in Education from Oxford Brookes University, UK and is involved in CPD (ESSARP, OUP, Pilgrims). Her main interests include teaching young learners and teacher development.

This book presents the state-specific dimensions of the governance of higher education in Bihar, India, based on a real-case perspective. It discusses the policies of the center and state governments, and their implications on the state's higher education system. It addresses the issues and challenges faced by the higher education sector from the point of view of multiple stakeholders at center, state, university and college levels, while examining influential power centers. The volume focuses on select universities in the state and looks at how they manage policies, schemes and regulations. It deals with key themes such as the role of state and regulatory bodies such as the University Grants Commission; the balance of power; resource scarcity; the inadequacy of top-down governance models; governance failure; and the autonomy of universities. It explores the conflict between the politics and economics of governance and efficiency; the promotion and recruitment of senior office-bearers and teachers; the privatization of colleges; and financing, admission and examination systems. Through an in-depth study using empirical unit-level data from the All-India Survey of Higher Education, examples and theoretical frameworks, the book analyzes the reasons for the underperformance of the governance system of higher education in Bihar. It also offers suggestions and policy recommendations to help improve its planning and management via

participative and responsible governance and informed institutional leadership. This book will be of interest to students, teachers and researchers of education, higher education, economics, governance and public administration, and development studies. It will also be useful to educationists and experts, education administrators, policymakers, bureaucrats and the governing bodies of higher education institutions.

This book examines planning education provision and approaches globally, through a comparative and longitudinal perspective. It explores the emergence of planning education in the 20th century, with its rich variation and yet a remarkable degree of cross-fertilization. Each of the sections of the book is framed by an overview essay which has been prepared by the editors to provide the reader with a critical exposure to relevant scholarship drawing on the detailed case studies and exploratory essays on key issues in planning education. The first part of this volume focuses on the emergence of planning education programs in the twentieth century as a way to understand the current planning education environment. Then we explore how education in urban, regional and spatial planning has developed in different ways in different countries and continents. The final part of this volume aims to envision how planning can adapt and develop to remain relevant to the development of human environments in the 21st century. Urban planning education has become a pervasive practice throughout the world as urbanization and development pressures have increased over the past half century, and as demand increased for professional trained experts to guide those processes. The approaches vary widely, based in part upon the discipline from which the planning program developed as well as the context-specific challenges within the country or region where the program resides. Just as a guide leads an inquisitive traveller to his goal and while escorting him, narrated the salient features of the object, so does a good guide-book offers the students all the essential information for easy comprehension of the subject to prepare for the Final-Based Examination of Semester-II. 'Self-Help to I.C.S.E. Semester 2 Topic wise Revision Book of Physics Class 10th' has been specially written meticulously to contain a comprehensive knowledge of Physics in detail. Its main objective is to prepare the young scholars aspiring for brilliant success in the I.C.S.E. Examination. The material in the text includes chapters incorporating all the divisions of this branch of science. It has been laboriously enriched with the informative summary of each chapter at the outset important points, Expected questions and answers and previous years' questions besides noteworthy suggestions for important questions. The contents of this book have been extensively interspersed with diagrams for accurate practical insight. If studies attentively, 'Self-Help to I.C.S.E. Semester 2 Topic wise Revision Book of Physics Class 10th' will greatly help the students in acquiring the fullest knowledge of the subject. It not only inspires you to become budding scientists, scholars and doctors but also helps to sharpen your focus, concentration, creativity and inquisitiveness. The authors feel indebted in their task to the original masters of the subject and their predecessors in the field who as authors have given their most valuable contribution in helping students acquire a robust grip on this branch of science. All new suggestions for further embellishment of this Self-Help will be considered not only useful but will also be highly appreciated and incorporated in subsequent editions.
