This book showcases cutting-edge research papers from the 7th International Conference on Research into Design (ICoRD 2019) – the largest in India in this area – written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'19 has been "Design for a Connected World". While Design traditionally focused on developing products that worked on their own, an emerging trend is to have products with a smart layer that makes them context aware and responsive, individually and collectively, through collaboration with other physical and digital objects with which these are connected. The papers in this volume explore these themes, and their key focus is connectivity: how do products and their development change in a connected world? The volume will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the use of emerging technologies such as IOT, IIOT, Digital Twins, I4.0 etc. as well as new and emerging methods and tools to design new products, systems and services.

Sometimes all a woman needs is a great pair of shoes – sometimes chocolate is the swiftest route to happiness. House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

Concise Encyclopedia of Languages of the World is an authoritative single-volume reference resource comprehensively describing the major languages and language families of the world. It will provide full descriptions of the phonology, semantics, morphology, and syntax of the world's major languages, giving insights into their structure, history and development, sounds, meaning, structure, and language family, thereby both highlighting their diversity for comparative study, and contextualizing them according to their genetic relationships and regional distribution. Based on the highly acclaimed and award-winning Encyclopedia of Language and Linguistics, this volume will provide an edited collection of almost 400 articles throughout which a representative subset of the world's major languages are unfolded and explained in up-to-date terminology and authoritative interpretation, by the leading scholars in linguistics. In highlighting the diversity of the world's languages — from the thriving to the endangered and extinct — this work will be the first point of call to any language expert interested in this huge area. No other single volume will match the extent of

language coverage or the authority of the contributors of Concise Encyclopedia of Languages of the World. * Extraordinary breadth of coverage: a comprehensive selection of just under 400 articles covering the world's major languages, language families, and classification structures, issues and disputes * Peerless quality: based on 20 years of academic development on two editions of the leading reference resource in linguistics, Encyclopedia of Language and Linguistics * Unique authorship: 350 of the world's leading experts brought together for one purpose * Exceptional editorial selection, review and validation process: Keith Brown and Sarah Ogilvie act as first-tier guarantors for article quality and coverage * Compact and affordable: one-volume format makes this suitable for personal study at any institution interested in areal, descriptive, or comparative language study - and at a fraction of the cost of the full encyclopedia

Based on the Palauan-English dictionary by Fr. Edwin G. McManus, S.J. (UH Press, 1977), this revision is designed to be an easily accessible reference for identifying vocabulary items of Palauan, which are often culture bound, semantically rich, and structurally quite complex. Thousands of Palauan entries are new or greatly expanded. Users will benefit from a much wider range of vocabulary, especially in the areas of flora and fauna, Palauan legend, and borrowed words from both English and Japanese. The expanded English-Palauan finder list allows for quick reference to the Palauan equivalents of many English words.

This book constitutes the refereed proceedings of the 11th IFIP WG 5.5/SOCOLNET Advanced Doctoral Conference on Computing, Electrical and Industrial Systems, DoCEIS 2020, held in Costa de Caparica, Portugal, in July 2020. The 20 full papers and 24 short papers presented were carefully reviewed and selected from 91 submissions. The papers present selected results produced in engineering doctoral programs and focus on technological innovation for industry and service systems. Research results and ongoing work are presented, illustrated and discussed in the following areas: collaborative networks; decisions systems; analysis and synthesis algorithms; communication systems; optimization systems; digital twins and smart manufacturing; power systems; energy control; power transportation; biomedical analysis and diagnosis; and instrumentation in health.

This second edition volume expands on the previous edition with new sections describing the characterization of peptides bound to major histocompatibility complexes (MHC) on the surface of the cell. Chapters also cover topics such as using SERPA for antigen identification; antigen content of electroimmunoprecipitates; whole genome-phage display libraries; antigens in immune complexes; and immunoproteomic biomarkers. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and thorough, *Immunoproteomics: Methods and Protocols, Second Edition* is a valuable resource that presents novice and expert researchers with techniques that are easily transferrable to laboratories and provides enhanced hands-on insights into this evolving field.

Por primera vez en 20 años, el Estado Mundial de la Infancia de UNICEF examina la cuestión de los niños, los alimentos y la nutrición, aportando una nueva perspectiva sobre un problema que evoluciona rápidamente. A pesar de los progresos realizados en las dos últimas décadas, una tercera parte de los niños menores de 5 años están malnutridos (con retraso en el crecimiento, emaciación o sobrepeso), mientras que dos terceras partes corren el riesgo de padecer emaciación y hambre oculta a causa de la deficiente calidad de su alimentación. Estos patrones reflejan una profunda triple carga de malnutrición -desnutrición (retraso en el crecimiento y emaciación), hambre oculta y sobrepeso - que amenaza la supervivencia, el crecimiento y el desarrollo de los niños y de los países. En el núcleo de este desafío se encuentra un sistema alimentario deficiente que no proporciona a los niños los alimentos que necesitan para crecer sanos. Este informe ofrece datos y análisis exclusivos sobre la malnutrición en el siglo XXI y ofrece recomendaciones para situar los derechos de la infancia en el centro de los sistemas alimentarios.

Career changes are becoming common among professionals in recent years. Many physicians may want to change direction, but often do not know whether it is the right thing to do or if pursuing a career outside of clinical practice would achieve their professional goals. Doctors have the training and education to contribute to society in many beneficial ways in addition to traditional clinical practice. Yet, there is no formal mapped-out route for doctors who want to pursue alternative careers, which is where Careers Beyond Clinical Medicine comes in. Doctors at any stage, from early in training to mid-career, to nearing retirement, can use Careers Beyond Clinical Medicine to clearly evaluate the issues involved when considering a career change. This book shows physicians how they can serve society and patients in innovative ways, and make a notable impact on health care delivery, policy and quality when they use their medical background in a non-traditional career pursuit. The numerous unadvertised opportunities for physicians are explored and a step-by-step route with practical advice for finding the best career is described. Recent advances in healthcare technology, medical science, patient education require physicians to play new roles that have not traditionally been well-defined. Doctors can innovate and have a long-term productive impact on healthcare in the United States and throughout the world if they learn to seize the non-traditional career opportunities available to physicians, or even create a new way to fill a void in health care. Careers Beyond Clinical Medicine helps illuminate that path.

Originating in India, the Gypsies arrived in Europe around the 14th century, spreading not only across the entirety of the continent but also immigrating to the Americas. The first Gypsy migration included farmworkers, blacksmiths, and mercenary soldiers, as well as musicians, fortune-tellers, and entertainers. At first, they were generally welcome as an interesting diversion to the dull routine of that period. Soon, however, they attracted the antagonism of the governing powers, as they have continually done throughout the following centuries. The second edition of the Historical Dictionary of the Gypsies (Romanies) seeks to end such prejudice by clarifying the facts about this nomadic people. Through a list of acronyms, a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on significant persons, places, events, institutions, and aspects of culture, society, economy, and politics, the history of the Gypsies and their culture is told.

The second edition of this volume has been updated with chapters on scar treatment using laser, microneedling, tissue engineering, adipose tissue and lipofilling. It compiles the perspectives of a multi-author team, examining the entire spectrum of burn reconstruction and long-term treatment. Individual updated chapters cover basic aspects of wound healing and scarring, and plastic surgery relating to tissue rearrangement and the use of flaps, as well as the long-term use of skin and skin substitutes. Furthermore, it addresses topics such as rehabilitation and scar management in detail. It provides comprehensive reconstruction guidelines organized by anatomic region (e.g. face, hands, ...) as well as future trends and prospects in burn reconstruction, such as allotransplantation and bionics. Please also have a look at the volume "Handbook of Burns Volume 1 - Acute Burn Care 2nd edition"

Youth Politics in Urban Asia examines how young people's political actions in Asia are the product of their urban realities, and at the same time, appreciates that young people are striving to remake these urban spaces in a myriad of tangible and intangible ways. The book explores the ways in which urban development and urban governance in Asia enable or constrain young people's citizenship, aspirations, and responses to a variety of socioeconomic and political issues in the region. Informed by qualitative and ethnographic approaches, featuring locales ranging from Pune to Shanghai, the chapters broadly address three themes: the variegated ways in which youth politics is constituted and has manifested in Asian cities; the role of cities in shaping and mediating youth politics in Asia; and whether it is possible to conceive of youth politics across urban Asia as diverse and specific, but also structurally entangled. In examining how young people's political performances and social actions are shaped by, and conversely, shape, Asian urban spaces, this collection advances a deeper understanding of the interplay of youth politics and urban environments. It will be an essential text for scholars and students interested in young people's politics, urban studies, and social change in Asia. The chapters in this book were originally published as a special issue of the journal *Space and Polity*.
