City cycling made simple North America's cities have long been the domain of the car, but thanks to the undeniable benefits of active transport, bicycles have an increasing presence in the urban landscape. Yet our cities weren't designed for bicycles, making for intimidating, and sometimes dangerous, environments for cyclists. The Urban Cycling Survival Guide is an accessible, straight-forward pocket guide that helps cyclists new to the urban environment negotiate all the challenges, obstacles, and rules - spoken and unspoken - that come with sharing the roads. From picking the bike that's right for you to smart riding strategies, tips for drivers, and bike maintenance, Cycle Toronto founding executive director Yvonne Bambrick is your trusted guide. With illustrations to help clarify even the trickiest bike situation, The Urban Cycling Survival Guide is an indispensable, attractive set of training wheels that can make anyone a confident, joyful city rider.

Every motorcyclist, from the weekend joyrider to the everyday commuter to the aspiring racetrack pro needs this book. Have fun, ride like a pro, and keep the rubber side down. Repair & Maintenance : Tips for how to become your own repair shop—and how to avoid getting ripped off when you do need a mechanic. ÉIf my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight poles—that is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

When entrepreneur Len Forkas learned that his nine-year-old son had leukemia, his own life changed forever. In 2003, Len founded Hopecam, a nonprofit that uses technology to connect young cancer patients with their friends at school. Ten years later, Len's fight against childhood cancer rose to a new level. He qualified as a solo competitor in Race Across America, a 3,000-mile bicycle race that traverses scorching deserts and 11,000-foot mountain elevations. As Len fought to finish the race is just 12 days, an all-volunteer crew supported him around the clock. What Spins the Wheel is a true story about fatherhood and fortitude, business grit and growth ? and the power of combining the right mission with the right team to help others.

In 1983, when a friend at a party mentioned she had just returned from a bike trip in Europe - "the best trip of my life" -- Tim Leland and his wife Julie Hatfield were intrigued. Two weeks later they signed on for a guided bicycle trip to Bordeaux. So began a 30-year biking odyssey that took these two Boston Globe writers to eight countries on twelve different tours. The Globe travel section chronicled their experiences each time they went. This funny, beautifully descriptive book -- based on those articles -- captures everything unique about the joys of traveling on two wheels in foreign lands: the fragrances, the tastes, the sights, the sounds. You will fall in love, as they did, with the idea of slow travel down tiny vineyard lanes, far removed from the air-conditioned tour buses that keep you away from the real thing.
