This handbook serves scientists and researchers interested in any aspect of spent hydroprocessing catalysts. Its aim is to assist in the analysis and assessment of refined catalyst byproducts and processing options, to determine whether spent catalysts can be processed into productive resources. For non-regenerable spent catalysts, the book takes into consideration both safety and ecological implications of utilizing landfill and other waste options. Provides comprehensive guidance and assistance to those making decisions on the fate of spent catalysts, radically improving strategic options for refining organisations Offers solutions that maximize procedural, regulatory, safety, and preparedness benefits Contains detailed information on hazardous characteristics of spent and regenerated catalysts with deployment recommendations, and acts as a benchmark document for establishing threshold limits of regulated species as well as for developing procedures for handling spent catalysts to ensure environmental acceptance Presents three novellas in which traumatic events haunt each of the characters, including in "There a Petal Silently Falls," in which a woman self-destructs after the disappearance of her brother and the death of her mother.

New York Times bestselling sportswriter John Feinstein takes readers behind the scenes at the World Series in this exciting baseball mystery. When teen sports reporters Stevie and Susan Carol are sent to cover the World Series, the talk of the tournament is Norbert Doyle—a late call-up for an underdog team. But the more they learn about him, the more conflicting stories they hear. Bit by bit they piece together the shocking truth about this rising star, but once the secret's out, there's no going back. . . . John Feinstein has been praised as "the best writer of sports books in America today" (The Boston Globe), and he proves it again in this fast-paced novel.

Only recently discovered, this is a unique and valuable record, kept by Scott, a Scotsman sent by London life insurance employer to report on an estate about to go on sale - 200,000 acres of land north of Galway, Connemara. Called by Scott this inhabited desolation, his journal provides a first-hand account, with line drawings, by Scott, of the survivors of the famine in this area, of the thieving beggars and squalid hostelryes, rent-evading tenants, and the works of the 'Papistry.' Robinson supplies very useful background material and history, as well as rich, explanatory notes and a map.

While electronic research has developed in many governments around the world, the majority of its research has focused on the supply and demand aspects of e-government instead of the focus on technology integration for successful e-government design. Technology Development and Platform Enhancements for Successful Global E-Government Design compiles the shared experiences of e-government designers and practitioners with a focus on technological design. By highlighting the different technological nuances that need to be incorporated into successful e-government designs, this book is a useful tool for professionals and researchers concerned with the organizational development in different types of e-government communities and

environments.

Is democracy possible only in homogeneous societies? Does heterogeneity - clude a stable democracy? Throughout history, ethnic, linguistic, or religious homogeneity whether by circumstance, coercion, or choice, has seemingly been conducive to democracy. In France, democracy was established after the imposition of religious uniformity and the revocation of the Edict of Nantes. The United States pulled in immigrants who renounced their original affiliations to forge a new identity in a newly born state. Still, defying assumptions, democracies have emerged in heterogeneous states such as the Swiss Confederation, the Successor States of the Holy Roman Empire and, later, those carved out of the previous colonial empires. One common feature is the failure of – often violent – attempts to enforce homogeneity, or the lack of any such attempt in the first place. In the course of time, these divided societies have learned to live in diversity, to pacify their differences, and to find a path - wards peace or at least accommodation. In sum, they went beyond forms of se- rating powers to sharing power. Whether defined by ethnicity, language, religion, or even ideology, communities agreed to a pact on participating in a joint gove- ment based on proportional or even equal representation. It is noteworthy that political systems based on power-sharing were long marg- al in mainstream political science which laid an emphasis on democratic tran- tions in homogeneous societies and on socio-economic or cultural prerequisites that facilitate the rise of democracy.

When journalist Shruti Ranjan, newly-wed wife of the Deputy Commissioner of Kishanganj in the lawless Bihar of the 1990s, is brutally raped by a 'politically sheltered local goon' all of her attempts at getting justice are crushed by a corrupt and complicit state government. That's when the charismatic Sharad Malviya a leading member of the Opposition party offers her an unlikely solution: his party's ticket to contest the Lok Sabha elections. Left with little to choose from, Shruti agrees only to realize that being catapulted to an enviable position of power in an all-man's world comes at a price. Caught between her mentor and her spouse - both upright but ultimately flawed men - and a host of envious others who continue to cast aspersions on her character - she struggles to address the larger problems of the country.

From New York Times and USA Today bestselling author Lisa Mondello... HIS DAKOTA HEART, book 7 of DAKOTA HEARTS  
How do you say goodbye to a love when it had no ending? Gray McKinnon has spent two years struggling with moving on when the woman he loved suffered an accident that left her in a coma and no hope of recovery. Everyone urged Gray to move on. He's had plenty of offers to help him mend his broken heart on and off the rodeo circuit. But moving on is easier said than done when your heart belongs to someone else. At least, he thinks so until he sees Nina Hendrix again. Nina couldn't help falling in love with her big sister's cowboy any more than she could bring her sister, Jen, back from her coma. She's kept her distance from Gray out of respect for her sister. But when her family decides to move Jen to another medical facility a few states away, she can't help but reach out to Gray, even though she has no illusions that he could love her the way she loves him. She won't let herself be just another woman passing through his life, helping him forget. But one night in his arms makes her realize there is no future for them if every time he looks at her he sees the one woman he can never have. This book validates the prolific contribution of Dr. Vera John-Steiner to the social sciences and extends her scholarship, teaching, and mentoring to a new generation of thinkers. Compiled as a companion volume to her Selected Works, the text highlights this scholar's gifts to psychology, education, linguistics, and the arts through a collection of letters composed by students, colleagues, collaborators, and mentees. In keeping with Dr. John-Steiner's collaborative and innovative approach, the epistolary genre invites readers into a larger thought community through personal connections, biographical vignettes, and academic expansions of her work. In sharing her commitment to social justice, readers will find themselves compelled to join the collective initiatives established by this notable scholar during the past fifty years to achieve an equitable, enriched education for all.

Papers presented at a conference jointly organized by Indian Institute of Foreign Trade, and Jagan Institute of Management Studies, on 27 September, 1997.

Goguen categories extend the relational calculus and its categorical formalization to the fuzzy world. Starting from the fundamental concepts of sets, binary relations and lattices, this book introduces several categorical formulations of an abstract theory of relations such as allegories, Dedekind categories and related structures. It is shown that neither theory

is sufficiently rich to describe basic operations on fuzzy relations.

Laurel takes her sisters—Rose, Daisy, and Lily—for granted, and she thinks nothing can go wrong. But when tragedy strikes, it feels like her family is falling apart, and she needs somewhere to turn. Luckily, there's Jack...

For a Kentucky girl, coming of age takes a leap of faith in a novel that “will knock you sideways with its Southern charm” (O, The Oprah Magazine). It's summer in Kentucky. The low ceiling of August is pressing down on the religious town of East Winder, and on thirteen-year-old Charmaine Peake who can't shake the feeling that she's being tested. She and her mother get along better with a room between them, but circumstances have forced them to relocate to a tiny trailer by the river. The last in a line of local holy men, Charmaine's father has turned from prophet to patient, his revelation lost in the clarifying haze of medication. Her sure-minded grandmother has suffered a stroke. And at church, where she has always felt most certain, Charmaine discovers that her archrival, a sanctimonious missionary kid, carries a dark, confusing secret. Suddenly Charmaine's life can be sorted into what she wishes she knew and what she wishes she didn't. In a moving, hilarious portrait of mothers and daughters, “one of the most astonishingly talented writers today,” brings us into the heart of a family weathering the toughest patch of their lives. But most of all, Angela Pneuman marks out the seemingly unbearable realities of growing up, the strength that comes from finding real friendship, and the power of discovering—and accepting—who you are (Julie Orringer). “Pneuman captures the voice of adolescence and the uncertainty of faith in this endearing novel.” —Minneapolis Star-Tribune “Pneuman is a master of dark comedy, and the grimmer the material, the funnier it becomes in her twisted but capable hands. Like her literary ancestor, Flannery O'Connor, she shows how myopic allegedly religious people can be, but she doesn't take cheap shots at religion either.” —San Francisco Chronicle

Finalist for the National Book Award! In this beautifully wrought memoir, award-winning writer John Philip Santos weaves together dream fragments, family remembrances, and Chicano mythology, reaching back into time and place to blend the story of one Mexican family with the soul of an entire people. The story unfolds through a pageant of unforgettable family figures: from Madrina--touched with epilepsy and prophecy ever since, as a girl, she saw a dying soul leave its body--to Teofilo, who was kidnapped as an infant and raised by the Kikapu Indians of Northern Mexico. At the heart of the book is Santos' search for the meaning of his grandfather's suicide in San Antonio, Texas, in 1939. Part treasury of the elders, part elegy, part personal odyssey, this is an immigration tale and a haunting family story that offers a rich, magical view of Mexican-American culture.

This volume, in honour of Evry Schatzman, contains in-depth reviews on central topics of modern astrophysics, such as stellar physics, covering stellar evolution, solar neutrinos, stellar rotation and spin down, convection transport processes,

neutron stars, white dwarfs, and novae. All the talks were given by leading experts who had time both to develop the basics of their subject and to cover recent work. The volume is meant for both graduate students and researchers. Jaded cop Oliver Sullivan moved to picturesque Kettle Bend to leave behind bad memories. Locals leave him alone—until a video of him rescuing a drowning puppy goes viral, making him a celebrity! Sarah McDougall sees it as a perfect opportunity to promote the struggling town. But when she interviews the gruff cop, he's not the warm, caring hero she expects. Instead he claims to dislike dogs and distrust love. He's wrong on both counts—and she plans to prove it to him! According to the people of the Mueda plateau in northern Mozambique, sorcerers remake the world by asserting the authority of their own imaginative visions of it. While conducting research among these Muedans, anthropologist Harry G. West made a revealing discovery—for many of them, West's efforts to elaborate an ethnographic vision of their world was itself a form of sorcery. In *Ethnographic Sorcery*, West explores the fascinating issues provoked by this equation. A key theme of West's research into sorcery is that one sorcerer's claims can be challenged or reversed by other sorcerers. After West's attempt to construct a metaphorical interpretation of Muedan assertions that the lions prowling their villages are fabricated by sorcerers is disputed by his Muedan research collaborators, West realized that ethnography and sorcery indeed have much in common. Rather than abandoning ethnography, West draws inspiration from this connection, arguing that anthropologists, along with the people they study, can scarcely avoid interpreting the world they inhabit, and that we are all, inescapably, ethnographic sorcerers.

These simply but beautifully expressed prayers convey an awareness of the presence of God within the everydayness of

our lives. Topping's prayers face the realities of daily contemporary life and tap into a sense of awe at the great mysteries our lives place before us. He helps us see the sacred in the familiar, and so connects with the longing for "more" that even religious persons regularly express as desirable. also available Lord of the Morning #0687045029 and Lord of the Evening #0687044928

Every one of the many millions of cars manufactured annually worldwide uses shock absorbers, otherwise known as dampers. These form a vital part of the suspension system of any vehicle, essential for optimizing road holding, performance and safety. This, the second edition of the Shock Absorber Handbook (first edition published in 1999), remains the only English language book devoted to the subject.

Comprehensive coverage of design, testing, installation and use of the damper has led to the book's acceptance as the authoritative text on the automotive applications of shock absorbers. In this second edition, the author presents a thorough revision of his book to bring it completely up to date. There are numerous detail improvements, and extensive new material has been added particularly on the many varieties of valve design in the conventional hydraulic damper, and on modern developments such as electrorheological and magnetorheological dampers. "The Shock Absorber Handbook, 2nd Edition" provides a thorough treatment of the issues surrounding the design and selection of shock absorbers. It is an invaluable handbook for those working in industry, as well as a principal reference text for students of mechanical and automotive engineering.

This book constitutes the refereed proceedings of the 13th Asian Symposium on Programming Languages and Systems, APLAS 2015, held in Pohang, South Korea, in November/December 2015. The 24 regular papers presented together with 1 short paper were carefully reviewed and selected from 74 submissions. The papers cover a variety of foundational and practical issues in programming languages and systems and have been organized in topical sections on compilers, separation logic, static analysis and abstract interpretation, Hoare logic and types, functional programming and semantics, model checking, program analysis, medley, and programming models.

This is the b format version of the critically acclaimed book on the singer. In "Waiting for Kate Bush", the reader will not only laugh out loud at Herskovits' attempt to make sense of his life in an alien culture, but also learn in detail what Kate Bush - known alternately as 'the barmiest bird in pop', 'the pre Raphaelite nymph with Minnie Mouse's soprano' and the 'greatest artist of the last 30 years' has been up to in the silent decade - plus - since the release of her last album.

Where have all the gargoyles gone? Cambridge's number one supersleuth, Sesame Seade, is back and out to catch a thief! When several ferocious gargoyles go missing from the Cambridge university rooftops, Sesame is soon looking for clues at dangerous and dizzying heights. But there's plenty for her to investigate at ground level too, as a spooky set of footprints, a midnight tsunami of scurrying mice, and a bout of strange behavior from Sesame's cat, Peter Mortimer, all point to even more nefarious activity around town. Can Sesame sort it all out before more gargoyles go AWOL? In this riotous follow-up to Sleuth on Skates, the whole gang -- including Mr. Halitosis -- is back as Sesame pits her wits against a truly devious burglar and a second troublemaker who's been up to no good--right under Sesame's nose!

Demand for food has increased exponentially while the availability of arable land for agriculture has decreased, due to increased urbanization and industrial growth. Among various stresses, drought is a major constraint to rain-fed crop production. It is estimated that nearly 3.7 billion hectares of global land area is affected by drought, which is equal in area to the global drought-free land. There are various perspectives from

which we can view drought, but those that impinge upon human and animal life directly by adversely affecting availability of water, agricultural (food/fodder-feed/fibre and medicinal crops) production, ecology and industry are the ones of major concern.
