

Cox Cable Program Guide

is the essential source for in-depth travel and relocation information to this popular South Carolina vacation destination. Written by a local (and true insider), it offers a personal and practical perspective of Myrtle Beach and environs. Fully revised and updated, the 10th edition also features a new interior layout and a new cover treatment.

The authors address claims that vertical ownership ties reduce programming diversity, restrict entry of competitors to cable, or have other socially undesirable effects

No advertisers to please, no censors to placate, no commercial interruptions every eleven minutes, demanding cliffhangers to draw viewers back after the commercial breaks: HBO has re-written the rules of television; and the result has been nothing short of a cultural ground shift. The HBO Effect details how the fingerprints of HBO are all over contemporary film and television. Their capability to focus on smaller markets made shows like Sex and the City, The Sopranos, The Wire, and even the more recent Game of Thrones and Girls, trigger shows on basic cable networks to follow suit. HBO pioneered the use of HDTV and the widescreen format, production and distribution deals leading to market presence, and the promotion of greater diversity on TV (discussing issues of class and race). The HBO Effect examines this rich and unique history for clues to its remarkable impact upon television and popular culture. It's time to take a wide-angle look at HBO as a producer of American culture.

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

An illustrated history of the Jefferson Parish, Louisiana, paired with histories of the local companies.

This is a comprehensive guide of the law at every level as it applies to cable networks, to cable's satellite competitors, and to the convergence of these technologies with the broadband Internet.

Four specific trends are driving the DVR industry: consumer content choice, consumer content control, personalization of content libraries, and the ability to transfer content from device-to-device and person-

to-person. "Digital Video Recorders" features a macro and micro views of the already established yet still burgeoning DVR industry. As part of the NAB Executive Technology Briefing series, this book gives you a wealth of market knowledge, business models, case studies, and industry insights explained in a non-technical fashion. "Digital Video Recorders" discusses the impact of the technology across many different industries and platforms, explains hardware, software and technology of set-top boxes, DVR infrastructure, on-screen guides, planning and scheduling, content security, and more. Whether you are an executive in the broadcast, telecommunications, consumer electronic, or advertising space, you will expand your knowledge on DVR impact, explore new business opportunities, and get a brief overview of the technical terms needed. You will also be able to accurately analyze and understand the trends, projections and other data, all of which will help lead to the expedited growth and development of DVR industry.

This new almanac will be your ready-reference guide to the E-Commerce & Internet Business worldwide! Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. While we all use remote controls, we understand little about their history or their impact on our daily lives. Caetlin Benson-Allot looks back on the remote control's material and cultural history to explain how such an innocuous media accessory has changed the way we occupy our houses, interact with our families, and experience the world. From the first wired radio remotes of the 1920s to infrared universal remotes, from the homemade TV controllers to the Apple Remote, remote controls shape our media devices and how we live with them. Object Lessons is published in partnership with an essay series in The Atlantic.

Orange Coast Magazine

Since its initial publication in 1978, Stay Tuned has been recognized as the most comprehensive and useful single-volume history of American broadcasting and electronic media available. This third edition has been thoroughly revised and updated to bring the story of American broadcasting forward to the 21st century, affording readers not only the history of the most important and pervasive institution affecting our society, but also providing a contextual transition to the Internet and other modern media. The enthusiasm of authors Christopher H. Sterling and John Michael Kittross is apparent as they lead readers through the development of American electronic mass media, from the first electrical communication (telegraph and telephone); through radio and television; to the present convergence of media, business entities, programming, and delivery systems, including the Internet. Their presentation is engaging, as well as informative, promoting an interest in history and making the connections between the developments of yesterday and the industry of today. Features of this third edition include: *chronological and topical tables of contents; *new material reflecting modern research in the field; *a new chapter describing historical developments from 1988 through to the current day; *an expanded bibliography, including Web site and museum listings; *an updated and expanded glossary and chronology; and *extensive statistical data of the development of television and radio stations, networks, advertising, programming, audiences, and other aspects of broadcasting. Designed for use in undergraduate and graduate courses on the history of American mass media, broadcasting, and electronic media, Stay Tuned also fits well into mass communication survey courses as an introduction to electronic media topics. As a chronicle of American broadcasting, this volume is also engaging reading for anyone interested in old radio, early television, and the origins and development of American broadcasting.

Promotion and marketing are key to communicating the attractiveness of media goods and services to the public in a free society. Promotion and Marketing for Broadcasting, Cable and the Web, Fourth Edition explores the scope and goals of media promotion from the perspective of radio, network and local television, and cable and public broadcasting. The third edition of this highly-regarded textbook was updated to encompass the immense structural, technological, and economic changes in the industry since the early 1990s. The role of the World Wide Web and of global and international promotion and marketing were introduced to bring the most current theory and practice to students and media professionals. The fourth edition brings the ever-evolving mission of the web into even greater focus with a new chapter on internet commerce and competition, and the widespread use of the internet as an advertising medium. Other topics covered in this book include: goals of promotion; research in promotion; on-air, print, and web message design; radio promotion, TV network and station promotion, and news campaigns; noncommercial radio and TV promotion; cable marketing and promotion; research and budgeting for promotion; and syndicated program marketing. Promotion and Marketing for Broadcasting, Cable and the Web has been endorsed by Promax, the national association for marketing executives in electronic media. Promax has provided a companion video for classroom use, containing examples of the many ways in which the media promote themselves.
