This book is the seventh volume in this series which explores the life of Nobel Prize-winning economist F.A. Hayek (1899-1992). The volume uses archival material, juxtaposed with Hayek's published work to challenge the existing perceptions of his life and thought. It examines the methods by which Hayek interacted with – and schemed against – the knowledge communities that he encountered during his very long life. Chapters explore the 'rules of engagement' that Hayek employed when interacting with fifth leading knowledge communities, including the Nobel Prize selection committee who were led to believe his claim about having predicted the Great Depression. It also explores his interactions with William Beveridge, the founder of the modern British Welfare State, A. C. Pigou, the founder of the market school, J. M. Keynes, Sir Arthur Lewis, and Abba Lerner.

The Pursuit of Justice is a realistic yet hopeful analysis of how the law works in practice rather than in theory. The multi-chapter discussion recognizes that decision makers in the law - judges, lawyers, juries, police, forensic experts and more - respond systematically to the incentive structures with which they are confronted.

In early modern Europe it has been estimated that up to one in two children did not survive to the age of ten. In the light of this high mortality rate, some historians have argued that parents did not form close relationships with their children, especially the very young. This is clearly refuted by the testimony of bereaved parents such as Martin Luther, and by the volume of consolatory writings produced for grieving families in early modern Lutheran Germany. The authors, clergymen and lay people, regarded grief as a deep wound which required treatment, and they applied the balm of consolation through sermons, tracts and occasional poetry. This study analyses these writings, focusing particularly on the neglected genre of the epicedium (funeral poem). It asks how and why poetry was used to counter the affective impact of parental bereavement, and considers what makes it a suitable vehicle for consolation. The poems, which are analyzed against the contemporary theological, philosophical, and poetological background, are taken from *Leichenpredigten* (printed funeral booklets), as well as from collections by two contrasting poets, Paul Fleming (1609-40), an unmarried man who wrote to console others, and Margarethe Susanna von Kuntsch (1651-1717), who lost thirteen of her fourteen children. The study seeks to rehabilitate a neglected genre and participates in discussions on the sociology of death, Lutheran teachings about death and mourning, literary presentations of mortality and loss, and the depiction of children and parent-child relations in literature.

Madmen, Intellectuals, and Academic Scribblers presents a simple, economic framework for understanding the systematic causes of political change. Wayne A. Leighton and Edward J. López take up three interrelated questions: Why do democracies generate policies that impose net costs on society? Why do such policies persist over long periods of time, even if they are known to be socially wasteful and better alternatives exist? And, why do certain wasteful policies eventually get repealed, while others endure? The authors examine these questions through familiar policies in contemporary American politics, but also draw on examples from around the world and throughout history. Assuming that incentives drive people's decisions, the book matches up three key ingredients—ideas, rules, and incentives—with the characters who make political waves: madmen in authority (such as Franklin Delano Roosevelt and Margaret Thatcher), intellectuals (like Jon Stewart and George Will), and academic scribblers (in the vein of Friedrich Hayek and John Maynard Keynes). Political change happens when these characters notice holes in the structure of ideas, institutions, and incentives, and then act as entrepreneurs to shake up the status quo.

This work challenges the common consensus that Luther, with his commitment to St. Paul's articulation of justification by faith, leaves no room for the Letter of St. James. Against this one-sided reading of Luther, focused only his criticism of the letter, this book argues that Luther had fruitful interpretations of the epistle that shaped the subsequent exegetical tradition. Scholarship's singular concentration on Luther's criticism of James as "an epistle of straw" has caused many to overlook Luther's sermons on James, the many places where James comes to full expression in Luther's writings, and the influence that Luther's biblical interpretation had on later interpretations of James. Based primarily on neglected Lutheran sermons in the sixteenth and seventeenth centuries, this work examines the pastoral hermeneutic of Luther and his theological heirs as they heard the voice of James and communicated that voice to and for the sake of the church. Scholars, pastors, and educated laity alike are invited to discover how Luther's theology was shaped by the Epistle of James and how Luther's students and theological heirs aimed to preach this disputed letter fruitfully to their hearers.

This bold and original book examines in detail a relatively new genre of film--the erotic thriller. Linda Ruth Williams traces the genre's exploitation of pornography and noir, discusses mainstream stars (including Michael Douglas and Sharon Stone) as well as genre-branded direct-to-video stars, charts the work of key producers and directors, and considers home videos as a distinct form of viewing pleasure. She maps the history of the genre, analyzing hundreds of movies from blockbusters such as *Basic Instinct*, *Fatal Attraction*, and *In the Cut* to straight-to-video film titles such as *Carnal Crimes*, *Sins of Desire*, and *Night Eyes*. Williams's witty and illuminating readings tell the story of this sensational genre and contribute to the analysis of mainstream screen sex--and its censorship--at the beginning of the 21st century. She shows that as the erotic thriller plays out the sexual fantasies of contemporary America, it also provides a vehicle for marketing those fantasies globally.

Investigating the entanglement of industry, politics, culture, and economics at the frontier of ocean excavations through an innovative union of art and science. The oceans are crucial to the planet's well-being. They help regulate the global carbon cycle, support the resilience of ecosystems, and provide livelihoods for communities. The oceans as guardians of planetary health are threatened by many forces, including growing extractivist practices. Through the innovative lens of artistic research, *Prospecting Ocean* investigates the entanglement of industry, politics, culture, and economics at the frontier of ocean excavation. The result is a richly illustrated study that unites science and art to examine the ecological, cultural, philosophical, and aesthetic reverberations of this current threat to the oceans. *Prospecting Oceans* takes as its starting point an exhibition by the photographer and filmmaker Armin Linke, which was commissioned by TBA21–Academy, London, and first shown at the Institute of Marine Science (CNR-ISMAR) in Venice. Linke is concerned with making the invisible visible, and here he unmask the technologies that enable extractions from the ocean, including future seabed mining for minerals and sampling of genetic data. But the book extends far beyond Linke's research, presenting the latest research from a variety of fields and employing art as the place where disciplines can converge. Integrating the work of artists with scientific, theoretical, and philosophical analysis, *Prospecting Ocean* demonstrates that visual culture offers new and urgent perspectives on ecological crises.

Funded by the tobacco and fossil fuel industries, the Mises- and Hayek-inspired 'free' market has adopted 'The Slogan of Liberty' - but should their faith-based assertions be accorded the same epistemological status as a science? If Austrian economics is a branch of divinely revealed 'knowledge' - as the epigone Godfather, Hans Sennholz, insists - what validity do its policy recommendations have? Should those who falsely claim to have PhDs be tax-funded as 'Post-Doctoral Fellows' and 'Professors'? This volume examines the consequences of the 'free' market colonisation of economics – climate change, financial crises and the corruption of academic discourse

Recent years have seen a marked increase in cardiovascular computed tomography (CT) imaging, with the technique now integrated into many imaging guidelines, such as those published by ESC and NICE. Rapid clinical and technological progress has created a need for guidance on the practical aspects of CT image acquisition, analysis and interpretation. The Oxford Specialist Handbook of Cardiovascular CT, now revised for the second edition by practising international experts with many years of hands-on experience, is designed to fulfil this need. The Handbook is a practical guide on performing, analysing and interpreting cardiovascular CT scans, covering all aspects from patient safety to optimal image acquisition to differential diagnoses of tricky images. It takes an international approach to both accreditation and certification, highlighting British, European, and American examinations and courses. The format is designed to be accessible and is laid out in easy to navigate sections. It is meant as a quick-reference guide, to live near the CT scanner, workstation, or on the office shelf. The Handbook is aimed at all cardiovascular CT users (Cardiologists, Radiologists and Radiographers), particularly those new to cardiovascular CT, although even the advanced user should find useful tips and tricks within.

At least since the Romantic era, poetry has often been understood as a powerful vector of collective belonging. The idea that certain poets are emblematic of a national culture is one of the chief means by which literature historicizes itself, inscribes itself in a shared cultural past and supplies modes of belonging to those who consume it. But what, then, of the exiled, migrant or translingual poet? How might writing in a language other than one's mother tongue complicate this picture of the relation between poet, language and literary system? What of those for whom the practice of poetry is inseparable from a sense of restlessness or unease, suggesting a condition of not being at home in any one language, even that of their mother tongue? These questions are crucial for four French-language poets whose work is the focus of this study: Armen Lubin (1903-74), Ghérasim Luca (1913-94), Edmond Jabès (1912-91) and Michelle Grangaud (1941-). Ranging across borders within and beyond the Francosphere – from Algeria to Armenia, to Egypt, to Romania – this book shows how a poetic practice inflected by exile, statelessness or non-belonging has the potential to disrupt long-held assumptions of the relation between subjects, the language they use and the place from which they speak.

When world-class biblical scholar Bart Ehrman first began to study the texts of the Bible in their original languages he was startled to discover the multitude of mistakes and intentional alterations that had been made by earlier translators. In *Misquoting Jesus*, Ehrman tells the story behind the mistakes and changes that ancient scribes made to the New Testament and shows the great impact they had upon the Bible we use today. He frames his account with personal reflections on how his study of the Greek manuscripts made him abandon his once ultraconservative views of the Bible. Since the advent of the printing press and the accurate reproduction of texts, most people have assumed that when they read the New Testament they are reading an exact copy of Jesus's words or Saint Paul's writings. And yet, for almost fifteen hundred years these manuscripts were hand copied by scribes who were deeply influenced by the cultural, theological, and political disputes of their day. Both mistakes and intentional changes abound in the surviving manuscripts, making the original words difficult to reconstruct. For the first time, Ehrman reveals where and why these changes were made and how scholars go about reconstructing the original words of the New Testament as closely as possible. Ehrman makes the provocative case that many of our cherished biblical stories and widely held beliefs concerning the divinity of Jesus, the Trinity, and the divine origins of the Bible itself stem from both intentional and accidental alterations by scribes -- alterations that dramatically affected all subsequent versions of the Bible.

On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? *Owners of the Map* provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers' everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis. Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, *Owners of the Map* advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its
