the shocking tale. In *Lamb to the Slaughter*, Roald Dahl, one of the world's favourite authors, tells a twisted story about the darker side of human nature. Here, a wife serves up a dish that utterly baffles the police . . . *Lamb to the Slaughter* is taken from the short story collection *Someone Like You*, which includes seventeen other devious and shocking stories, featuring the two men who make an unusual and chilling wager over the provenance of a bottle of wine; a curious machine that reveals the horrifying truth about plants; the man waiting to be bitten by the venomous snake asleep on his stomach; and others. 'The absolute master of the twist in the tale.' (Observer ) This story is also available as a Penguin digital audio download read by Juliet Stevenson. Roald Dahl, the brilliant and worldwide acclaimed author of *Charlie and the Chocolate Factory*, *James and the Giant Peach*, *Matilda*, and many more classics for children, also wrote scores of short stories for adults. These delightfully disturbing tales have often been filmed and were most recently the inspiration for the West End play, *Roald Dahl's Twisted Tales* by Jeremy Dyson. Roald Dahl's stories continue to make readers shiver today.

The full effects of decisions made today about many environmental policies -including climate change and nuclear waste- will not be felt for many years. For issues with long-term ramifications, analysts often employ discount rates to compare present and future costs and benefits. This is reasonable, and discounting has become a procedure that raises few objections. But are the methods appropriate for measuring costs and benefits for decisions that will have impacts 20 to 30 years from now the right ones to employ for a future that lies 200 to 300 years in the future? This landmark book argues that methods reasonable for measuring gains and losses for a generation into the future may not be appropriate when applied to a longer span of time. Paul Portney and John Weyant have assembled some of the world's foremost economists to reconsider the purpose, ethical implications, and application of discounting in light of recent research and current policy concerns. These experts note reasons why conventional calculations involved in discounting are undermined when considering costs and benefits in the distant future, including uncertainty about the values and preferences of future generations, and uncertainties about available technologies. Rather than simply disassemble current methodologies, the contributors examine innovations that will make discounting a more compelling tool for policy choices that influence the distant future. They discuss the combination of a high short-term with a low long-term discount rate, explore discounting according to more than one set of anticipated preferences for the future, and outline alternatives involving simultaneous consideration of valuation, discounting and political acceptability.

Medical articles are one of the main vehicles of knowledge translation and evidence communication in the health sciences. Their correct structure and style alone are no longer enough to convey a clear understanding of the intended message. Readers must be able to understand the very essence of the article message. That is the purpose of this book. *Writing, Reading, and Understanding in Modern Health Sciences: Medical Articles and Other Forms of Communication* will help the authors of medical articles communicate more effectively in today's practice and health research environment. It explores the most effective practices for communicating using three main medical literature formats: through scientific articles, articles where the subject is not based on the practice of the scientific method, and business reports. Describing how to think beyond the prevailing IMRAD article format, this book focuses on the nature, content, domains of thought, and meanings of medical articles. The ideas and underlying propositions in this book are complementary to specific requirements appropriate

introduction that points out the varied circumstances under which writing groups develop, the book looks into writing groups from three points of view. The first section deals with history, and contains chapters on writing groups inside academic institutions--such as college literary societies like Harvard's Spy Club and Hasty Pudding Club--and groups outside of academic institutions, which started out mainly as mutual improvement groups and are still prevalent. In the second section, which covers writing group theory, are chapters on collaborative learning (as opposed to the common image of writing in isolation) and theories of language development (mainly Marxist and structuralist). Implications of writing groups are the focus of the third section, which includes a chapter of suggestions for writing group formation and activities, and a chapter on theories of literacy that concentrates on its social aspects. Two extensive bibliographies are included: the first is an annotated list of primary sources which is organized by year, while the second is an alphabetical listing of works consulted. (SKC) PARAGRAPHS AND ESSAYS WITH INTEGRATED READINGS is the higher-level companion to SENTENCES, PARAGRAPHS, AND BEYOND in the two-book Brandon series. Instruction in this text -- comprehensive, flexible, and relevant -- is predicated on the idea that reading and writing are linked and that good writing is the product of revision and rigorous editing. The hallmarks of the Brandons' books are tell-show-engage instruction, ample demonstrations of good professional and student writing, and an abundance of reading-based, high-interest general, cross-curricular, and career-related topics and prompts. The reading-based writing presented in this book provides experience in critical thinking that enables students to write competently across the disciplines and transition smoothly to the next level of the English program. In *Writing Anthropology*, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one's writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities. Contributors. There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults. Motivation makes all the difference. And what's more motivating than the expectation of success? The instructions are clear and to the point, so students can quickly get down
