ANA and the American College of Cardiology Foundation convened an array of cardiovascular health experts to develop this succinct and practical guide. This completely updated document is unique, in fact, as a unifying effort due to participation and contribution of 16 nursing organizations whose constituency includes cardiovascular nurses. Reflecting the cumulative work of three previous iterations (and including their content), this book is a foundational volume. It articulates the essentials of the specialty, its accountabilities and activities - the who, what, when, where, and how of its practice - for both specialists and generalists. The standards themselves - six for nursing practice and nine for nursing professional performance - are those by which all nurses in this specialty practice. Together, along with each standard's set of measurement criteria, these reflect the perspectives and priorities of cardiovascular nursing. The book's summary discussion of the scope of such practice - its characteristics, development and trends, education and training, its practice environments and settings, its general and specialized practice roles, its ethical and conceptual bases - lends a broad context for understanding and using these standards. While Cardiovascular Nursing: Scope and Standards of Practice is a reference and guide primarily for practicing nurses and nursing faculty and students, it is also an essential source document for other cardiovascular specialists, healthcare providers, researchers, and scholars, along with those involved in funding, legal, policy, and regulatory activities.

Designed to meet the needs of today's students, Lowdermilk's Maternity Nursing, 8th Edition - Revised Reprint addresses the fundamentals of maternity nursing with a concise, focused presentation of the care of women during the childbearing years. Integrating considerations for family, culture, and health promotion into the continuum of care, it also addresses community-based care to emphasize that nursing care takes place in many settings. Maternity Nursing focuses on childbearing issues and concerns, including care of the newborn, as well as wellness promotion and management of common women's health problems. Critical thinking exercises present case studies of real-life situations and corresponding critical thinking questions to help you develop your analytical skills. NEW! A helpful appendix identifies text content that reflects the QSEN competencies - patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics - to assist you in developing competencies to provide safe and effective nursing care. NEW! Focus on the family recognizes the nurse's need to integrate the family in the care of the mother and newborn and the importance of the role of the mother to the wellbeing of the family. NEW! Content updates throughout, including information on the late preterm infant and associated concerns such as feeding; guidelines on prioritization and delegation where relevant; and centering pregnancy, a new model of health care that brings women together in groups for their care. NEW! Evidence-based practice content focuses your attention on how to use current research to improve patient outcomes. NEW! Improved readability helps you learn more efficiently with shorter, more focused content discussions. NEW! 21st Century Maternity Nursing: Culturally Competent, Community Focused chapter combines introductory material, culture, and community into one chapter to help you focus on key content and concepts. NEW! Streamlined content highlights the most essential, need-to-know information.

This illustrated textbook is an essential and invaluable guide to young clinicians and researchers of Trauma and Orthopaedics, reporting all classification systems which are currently utilised in the clinical setting. It includes classifications relevant to both Elective Orthopaedic Practice and Orthopaedic Trauma. Clear graphic illustrations accompany the description of all different classification schemes in a comprehensive manner, together with a structured presentation of existing clinical evidence. In this manner each chapter of the different anatomical sites and pathologies assists the decision making of the readers regarding treatment strategy as well as informed consent of their patients. It is envisaged that this textbook will be a point of reference not only to the surgeons in training (residents) but also to senior surgeons and academic clinicians.
