This reprint of this celebrated classic text on Zanzibar makes available again the remarkably comprehensive account of the Island of Cloves, written by W. H. Ingrams and first published in 1931. Zanzibar, Its History and Its People is essentially an historical ethnography of Zanzibar. The author describes local legends, and their important social function in recording and constituting the oral history of the island. Ingrams' extensive observations and personal experiences - both on the main island of Unguja and Pemba and the smaller islands which make up Zanzibar - provide a detailed and lively account of society at the time and make engaging reading. Zanzibar, Its History and Its People is a comprehensive work, perhaps daunting on account of its size, but a joy to read and a rich resource." Said El-Gheithy, The Sayyida Salme Foundation .

This book offers a new account of Nauru's imperial history and examines its significance in the history of international law.

Membranes for Low Temperature Fuel Cells provides a comprehensive review of novel and state-of-the-art polymer electrolyte membrane fuel cells (PEMFC) membranes. The author highlights requirements and considerations for a membrane as an integral part of PEMFC and its interactions with other components. It is an indispensable resource for anyone interested in new PEMFC membrane materials and concerned with the development, optimisation and testing of such membranes. Various composite membranes (polymer and non-polymer) are discussed along with analyses of the latest filler materials like graphene, ionic liquids, polymeric ionic liquids, nanostructured metal oxides and membrane concepts unfolding in the field of PEMFC. This book provides the latest academic and technical developments in PEMFC membranes with thorough insights into various preparation, characterisation, and testing methods utilised. Factors affecting proton conduction, water adsorption, and transportation behaviour of membranes are also deliberated upon. Provides the latest academic and technical developments in PEMFC membranes. Reviews recent literature on ex situ studies and in situ single-cell and stack tests investigating the durability (chemical, thermomechanical) and degradation of membranes. Surbhi Sharma, MSc, PhD Working on graphene oxide and fuel cells since 2007, she has published about 50 research articles/book chapters and holds a patent. She has also been awarded various research grants.

Buku Filsafat ini adalah dengan berfilsafat atau berpikir secara ilmu pengetahuan merupakan salah satu hasil dari manusi berfilsafat, penilaian filsafat dapat dilakukan melalui teori kebenaran. Filsafat membimbing manusia untuk berpikir secara luas dan mendalam, yakni dengan berpikir secara universal dengan didukung upaya untuk mencapai radix dan menemukan esensi atau suatu permasalahan. Dari adanya hasil pemikiran tersebut kebenarannya secara ilmiah, obyektif, dan sistematis. dalam proses filsafat yang telah di pelajari. Sehingga bila digabungkan antara kata sejarah pemikiran filsafat yang mana memiliki arti seorang.

This book constitutes the thoroughly refereed post-conference proceedings of the 15th International Meeting on Computational Intelligence Methods for Bioinformatics and Biostatistics., CIBB 2018, held in Caparica, Portugal, in September 2018. The 32 revised full papers were carefully reviewed and selected from 51 submissions. The

papers present current trends at the edge of computer and life sciences, the application of computational intelligence to a system and synthetic biology and the consequent impact on innovative medicine were presented. Theoretical and experimental biologists also presented novel challenges and fostered multidisciplinary collaboration aiming to blend theory and practice, where the founding theories of the techniques used for modelling and analyzing biological systems are investigated and used for practical applications and the supporting technologies.

This edited volume is based on the best papers accepted for presentation during the 1st Springer Conference of the Arabian Journal of Geosciences (CAJG-1), Tunisia 2018. The book is of interest to all researchers in the fields of Structural Geology, Stratigraphy, Ore Deposits, Regional Tectonics and Tectonic Modelling. This volume offers an overview of multidisciplinary studies on the broader Africa-Eurasia geology. Main topics include: 1. Basement Geology 2. Fluid-rock interaction, hydrothermalism and ore deposits 3. Reservoir geology, structure and stratigraphy 4. Mediterranean Tectonics 5. The Alpine-Himalayan convergence zone 6. Tectonic Modelling

This book provides a comprehensive and current source of information on fishes including systematics, zoogeography, behavior, and conservation of fishes that is often needed by professionals as background for writing accurate reports. This book covers the structure and physiology, evolution and taxonomy, zoogeography, and ecology and conservation of fishes. For fisheries biologists, conservation biologists, and aquatic ecologists that need an up-to-date reference on Ichthyology.

International Arbitration and the COVID-19 Revolution Edited by Maxi Scherer, Niuscha Bassiri & Mohamed S. Abdel Wahab The impact of the COVID-19 pandemic on all major economic sectors and industries has triggered profound and systemic changes in international arbitration. Moreover, the fact that entire proceedings are now being conducted remotely constitutes so significant a deviation from the norm as to warrant the designation 'revolution'. This timely book is the first to describe and analyse how the COVID-19 crisis has redefined arbitral practice, with critical appraisal from well-known practitioners of the pandemic's effects on substantive and procedural aspects from the commencement of proceedings until the enforcement of the award. With practical guidance from a variety of perspectives – legal, practical, and sector-specific – on the conduct of international arbitration during the COVID-19 pandemic and beyond, the chapters present leading practitioners' insights into the unprecedented and multifaceted issues that arise. They provide expert tips and challenges in such practical matters as the following: preventing and resolving disputes of particular types – construction, energy, aviation, technology, media and telecommunication, finance and insurance; arbitrator appointments; issues of planning, preparation and sample procedural orders; witness preparation and cross-examination; e-signature of arbitral awards; setting aside and enforcement proceedings; and third-party funding. Also included are an empirical survey of users' views and an overview of how the COVID-19 revolution has affected the arbitration rules of leading arbitral seats. With this timely and practical book, arbitration practitioners and scholars will gain up-to-date knowledge of sector-specific challenges brought about by the COVID-19 pandemic and approach arbitration proceedings with an understanding of the most important legal and practical considerations during the crisis and beyond.

Continuity and Change after Indonesia's Reforms Contributions to an Ongoing

Penerbit : Airlangga University Press ISBN: 9786024737719 Buku ini mengkaji tentang melalui ASEAN +3 untuk meneguhkan eksistensi dan kontribusi ASEAN dalam percaturan global sembari mengembangkan segala potensi yang dimiliki masing-masing negara ASEAN dan memberdayakan kapasitas antarnegara ASEAN. Melalui buku ini, diulas tentang signifikansi pasar tenaga kerja ASEAN +3 berikut kebijakan tenaga kerja, tenaga kerja migran, migrasi, serta dampak yang menyertainya. Inisiatif dan perjanjian oleh ASEAN dalam konteks perdagangan bebas pun dibahas termasuk dampak pada sektor industri yang diharapkan timbul keinsafan atas kebutuhan, manfaat, dan tantangan yang bakal atau tengah dihadapi.

In Darwin's Fishes, Daniel Pauly presents an encyclopaedia of ichthyology, ecology and evolution, based upon everything that Charles Darwin ever wrote about fish. Entries are arranged alphabetically and can be about, for example, a particular fish taxon, an anatomical part, a chemical substance, a scientist, a place, or an evolutionary or ecological concept. The reader can start wherever they like and are then led by a series of cross-references on a fascinating voyage of interconnected entries, each indirectly or directly connected with original writings from Darwin himself. Along the way, the reader is offered interpretation of the historical material put in the context of both Darwin's time and that of contemporary biology and ecology. This book is intended for anyone interested in fishes, the work of Charles Darwin, evolutionary biology and ecology, and natural history in general.

International Arbitration: Law and Practice (Third Edition) provides comprehensive and authoritative coverage of the basic principles and legal doctrines, and the practice, of international arbitration. The book contains a systematic, but concise, treatment of all aspects of the arbitral process, including international arbitration agreements, international arbitral proceedings and international arbitral awards. The Third Edition guides both students and practitioners through the entire arbitral process, beginning with drafting, enforcing and interpreting international arbitration agreements, to selecting arbitrators and conducting arbitral proceedings, to recognizing, enforcing and seeking to annul arbitral awards. The book is written in clear, accessible language, suited for both law students and non-specialist practitioners, as well as more experienced readers. This highly regarded work addresses both international commercial arbitration and the related fields of investment and state-to-state arbitration and is essential reading for any student of international arbitration and any practitioner seeking a complete introduction to the field. The Third Edition has been comprehensively updated to include recent legislative amendments, judicial decisions and arbitral awards. Among other things, the book provides detailed treatment of the New York Convention, the UNCITRAL Model Law on International Commercial Arbitration, all leading institutional arbitration rules (including ICC, SIAC, LCIA, AAA and others), the ICSID Convention and ICSID

Arbitration Rules, and judicial decisions from leading jurisdictions. The Third Edition is integrated with the author's classic International Commercial Arbitration and with the online Born International Arbitration Lectures, enabling students, teachers and practitioners to explore particular topics in more detail. About the Author: Gary B. Born is the world's leading authority on international arbitration and litigation. He has practiced extensively in both fields in Europe, the United States, Asia and elsewhere. He is the author of International Commercial Arbitration (Kluwer Law International 3rd ed. 2021), International Arbitration and Forum Selection Agreements: Drafting and Enforcing (Kluwer Law International 6th ed. 2021), International Commercial Arbitration: Cases and Materials (Aspen 3rd ed. 2021) and International Civil Litigation in United States Courts (Aspen 6th ed. 2018).

This book contains 35 papers from the Tourism Outlook Conference held in Lombok, Indonesia in July 2015. The book presents comprehensive discussions on sustainability in the tourism industry. It includes research on various constituents of the tourism sector and analyses of each of them from a sustainability standpoint. Case studies that are global in nature are presented to show how sustainable applications can be used and how concerns can be addressed. The book is a response to rapid change in contemporary tourism trends brought about by global economic and social forces such as development pressures, population growth, major resource extraction, industrial fishing, global climate change and steadily rising sea levels. Balancing Development and Sustainability in Tourism Destinations serves as a platform for students and educators, government agency employees, hospitality and tourism industry practitioners, public and private land managers, community development workers, and others interested in identifying practical solutions, charting new directions, and creating opportunities for sustainable tourism development. Women Judges in the Muslim World: A Comparative Study of Discourse and Practice offers a socio-legal account of public debates and judicial practices surrounding the performance of women as judges in eight Muslim-majority countries.

"This thesis is a study of traditional narratives which are recited and received both by villagers and pilgrims in regard to the local pilgrimage (ziarah) tradition in Pamijahan, particularly at Shaykh Abdul Muhyi's sacred site. The narratives will be examined as part of the popular beliefs of Priangan Timur or the eastern part of West Java. Locating them in the wider context of Sundanese oral and written traditions, my investigation will illuminate the nature and function of such traditions in the particular case of Pamijahan. The research will elucidate the role of the kuncen, the custodians of sacred sites, as guides and spiritual brokers who maintain the narratives. It will also be important to investigate the villagers' as well as visitors' view of the kuncen in regard to local pilgrimage. The study will also enhance comparative studies concerned with networks of holy men or saints (wali) on the island of Java (Pemberton 1994; Fox 1991: 20). I want to argue that people respond to, and participate in, saint veneration on pragmatic grounds. However, these grounds are subject to interpretation and contestation in time and space. In redefining their narratives, various individuals, such as custodians, Sufis, and even to some extent government functionaries, are considered to be authoritative persons by virtue of their capacity to conduct and manipulate narratives. As this argument develops, it will be important to understand the modes of signification in the village."--Provided by publisher.

The second edition of *The Diversity of Fishes* represents a major revision of the world's most widely adopted ichthyology textbook. Expanded and updated, the second edition is illustrated throughout with striking color photographs depicting the spectacular evolutionary adaptations of the most ecologically and taxonomically diverse vertebrate group. The text incorporates the latest advances in the biology of fishes, covering taxonomy, anatomy, physiology, biogeography, ecology, and behavior. A new chapter on genetics and molecular ecology of fishes has been added, and conservation is emphasized throughout. Hundreds of new and redrawn illustrations augment readable text, and every chapter has been revised to reflect the discoveries and greater understanding achieved during the past decade. Written by a team of internationally-recognized authorities, the first edition of *The Diversity of Fishes* was received with enthusiasm and praise, and incorporated into ichthyology and fish biology classes around the globe, at both undergraduate and postgraduate levels. The second edition is a substantial update of an already classic reference and text. Companion resources site This book is accompanied by a resources site: [www.wiley.com/go/helfman](http://www.wiley.com/go/helfman) The site is being constantly updated by the author team and provides:

In 1955, a conference was held in Bandung, Indonesia that was attended by representatives from twenty-nine nations. Against the backdrop of crumbling European empires, Asian and African leaders forged new alliances and established anti-imperial principles for a new world order. The conference came to capture popular imaginations across the Global South and, as counterpoint to the dominant world order, it became both an act of collective imagination and a practical political project for decolonization that inspired a range of social movements, diplomatic efforts, institutional experiments and heterodox visions of the history and future of the world. In this book, leading

international scholars explore what the spirit of Bandung has meant to people across the world over the past decades and what it means today. It analyzes Bandung's complicated and pivotal impact on global history, international law and, most of all, justice struggles after the end of formal colonialism.

Dalam kurun waktu satu dasawarsa terakhir, Ikhwanul Muslimin menjadi fenomena paling menarik perhatian para pengkaji Islam Politik di Timur Tengah. Bergerak sebagai oposisi selama hampir 50 tahun, Ikhwan tampil ke permukaan setelah Hosni Mubarak jatuh pada tahun 2011. Pada Pemilu 2012, secara mengejutkan mereka memenangi Pemilu bersama kelompok Islamis lain, Salafi. Dari memenangi Pemilu, mereka melanjutkan petualangan politik ke Pemilihan Presiden, dan dengan sukses mendudukkan Mohammad Morsy, kader terbaik mereka, sebagai Presiden Mesir. Kemenangan politik Ikhwan menjadi bahan uji bagi para pengkaji Islam dan demokrasi. Benarkah Islam bisa kompatibel dengan demokrasi? Selama ini, para pengkaji Islam Politik pesimistis gerakan Islam akan menyerap gagasan tentang demokrasi atau masyarakat sipil. Kajian-kajian Samuel Huntington, Bassam Tibi, dan Bernard Lewis cenderung melihat Islamisme sebagai ekspresi penolakan sebagian umat Islam terhadap modernisasi yang dibawa oleh masyarakat Barat. Kajian-kajian semacam itu melupakan satu fakta penting bahwa kemunculan banyak gerakan Islam, termasuk Ikhwan di Mesir, adalah bentuk artikulasi identitas yang mereka yakini dan mereka perjuangkan. Buku ini menawarkan perspektif yang berbeda tentang Islamisme, Islam Politik, dan Gerakan Islam. Ia melihat Islamisme sebagai sebuah proyek hegemoni yang hendak mengganti tatanan politik sebelumnya. Dalam proyek hegemoni itu, perjuangan gerakan Ikhwanul Muslimin dikupas melalui analisa-analisa kritis sejak mula-mula ditubuhkan hingga kejatuhannya pada tahun 2013.

Indonesia's President Soeharto led one of the most durable and effective authoritarian regimes of the second half of the twentieth century. Yet his rule ended in ignominy, and much of the turbulence and corruption of the subsequent years was blamed on his legacy. More than a decade after Soeharto's resignation, Indonesia is a consolidating democracy and the time has come to reconsider the place of his regime in modern Indonesian history, and its lasting impact. This book begins this task by bringing together a collection of leading experts on Indonesia to examine Soeharto and his legacy from diverse perspectives. In presenting their analyses, these authors pay tribute to Harold Crouch, an Australian political scientist who remains one of the greatest chroniclers of the Soeharto regime and its aftermath.

The book deals with engineering aspects of the two emerging and intertwined fields of synthetic and systems biology. Both fields hold promise to revolutionize the way molecular biology research is done, the way today's drug discovery works and the way bio-engineering is done. Both fields stress the importance of building and characterizing small bio-molecular networks in order to synthesize incrementally and understand large complex networks inside living cells. Reminiscent of computer-aided design (CAD) of electronic circuits, abstraction is believed to be the key concept to achieve this goal. It allows hiding the overwhelming complexity of cellular processes by encapsulating network parts into abstract modules. This book provides a unique perspective on how concepts and methods from CAD of electronic circuits can be leveraged to overcome complexity barrier perceived in synthetic and systems biology.

This book constitutes the refereed conference proceedings of the 11th International

Conference on Multi-disciplinary Trends in Artificial Intelligence, MIWAI 2017, held in Gadong, Brunei, in November 2017. The 40 revised full papers presented were carefully reviewed and selected from 82 submissions. They are organized in the following topical sections: knowledge representation and reasoning; data mining and machine learning; deep learning and its applications; document analysis; intelligent information systems; swarm intelligence.

"This is a coursebook and reference guide for ichthyology courses that will also serve as a tool for ichthyologists, fisheries scientists, marine biologists, and vertebrate zoologists. It will cover the basic anatomy and diversity of all 62 orders of fishes, focusing on the distinguishing characteristics of approximately 180 of the most commonly encountered fish families. Each family will be diagnosed with easily observed characteristics and clear photos--many in color and from living specimens. This guide will be distinctive through the use of photographs of preserved specimens primarily from the Scripps Institution of Oceanography Marine Vertebrate Collection, supplemented by radiographs and additional illustrations of key characters. The goal is to give ichthyology students, fisheries scientists, marine biologists, vertebrate zoologists, and others with an interest or stake in the diversity of fishes a broad overview of the morphological diversity of fishes, arranged in a modern classification system. For students, it's a natural complement to primary ichthyology textbooks, which don't cover the breadth of morphological characteristics necessary to identify fish"--Provided by publisher.

Until now, books addressing Halal issues have focused on helping Muslim consumers decide what to eat and what to avoid among products currently on the marketplace. There was no resource that the food industry could refer to that provided the guidelines necessary to meet the Halal requirements of Muslim consumers in the U.S. and abroad.

### Halal

Wireless and mobile communications, networking and internet technology, telematics and applications, radar technology and systems, telecommunication services and management regulation

Using the high-profile 2017 blasphemy trial of the former governor of Jakarta, Basuki 'Ahok' Tjahaja Purnama, as its sole case study, this book assesses whether Indonesia's liberal democratic human rights legal regime can withstand the rise of growing Islamist majoritarian sentiment. Specifically, this book analyses whether a 2010 decision of Indonesia's Constitutional Court has rendered the liberal democratic human rights guarantees contained in Indonesia's 1945 Constitution ineffective. Key legal documents, including the indictment issued by the North Jakarta Attorney-General and General Prosecutor, the defence's 'Notice of Defence', and the North Jakarta State Court's convicting judgment, are examined. The book shows how Islamist majoritarians in Indonesia have hijacked human rights discourse by attributing new, inaccurate meanings to key liberal democratic concepts. This has provided them with a human rights law-based justification for the prioritisation of the religious sensibilities and religious orthodoxy of Indonesia's Muslim majority over the fundamental rights of the country's religious minorities. While Ahok's conviction evidences this, the book cautions that matters pertaining to public religion will remain a site of contestation in contemporary Indonesia for the foreseeable future. A groundbreaking study of the Ahok trial, the blasphemy law, and the contentious politics of religious freedom and cultural citizenship in Indonesia, this book will be of interest to academics working in the fields of religion, Islamic studies, religious studies, law and society, law and development, law reform, constitutionalism, politics, history and social change, and Southeast Asian studies.

"This book addresses one of the most crucial questions in Southeast Asia: did the election in Indonesia in 2014 of a seemingly populist-oriented president alter the hegemony of the political and economic elites? Was it the end of the paradox that the basic social contradictions in the country's substantial capitalist development were not reflected in organized politics by any independent representation of subordinated groups, in spite of democratization? Beyond simplified frameworks, grounded scholars have now come together to discuss whether and how a new Indonesian politics has evolved in a number of crucial fields. Their critical insights are a valuable contribution to the study of this question." — Professor Olle Törnquist, Department of Political Science, University of Oslo "A most valuable book for understanding the underpinnings of Indonesian politics in 2019 and beyond. A great range of themes are included: political parties, ideologies, political Islam, leadership legitimacy, the political middle class, the politics of centre–local relations, corruption, limited foreign policy reform, Papua, and youth activism. The book has eleven chapters, mostly by Indonesia-based analysts, plus a couple of wise old hands. Max Lane's overview chapter is excellent." — Professor David Reeve, School of Humanities and Languages, University of New South Wales

The middle classes of Indonesia's provincial towns are not particularly rich yet nationally influential. This book examines them ethnographically. Rather than a market-friendly, liberal middle class, it finds a conservative petty bourgeoisie just out of poverty and skilled at politics. Please note that Sylvia Tidey's article (pp. 89-110) will only be available in the print edition of this book (9789004263000).

Sentiment analysis and opinion mining is the field of study that analyzes people's opinions, sentiments, evaluations, attitudes, and emotions from written language. It is one of the most active research areas in natural language processing and is also widely studied in data mining, Web mining, and text mining. In fact, this research has spread outside of computer science to the management sciences and social sciences due to its importance to business and society as a whole. The growing importance of sentiment analysis coincides with the growth of social media such as reviews, forum discussions, blogs, micro-blogs, Twitter, and social networks. For the first time in human history, we now have a huge volume of opinionated data recorded in digital form for analysis. Sentiment analysis systems are being applied in almost every business and social domain because opinions are central to almost all human activities and are key influencers of our behaviors. Our beliefs and perceptions of reality, and the choices we make, are largely conditioned on how others see and evaluate the world. For this reason, when we need to make a decision we often seek out the opinions of others. This is true not only for individuals but also for organizations. This book is a comprehensive introductory and survey text. It covers all important topics and the latest developments in the field with over 400 references. It is suitable for students, researchers and practitioners who are interested in social media analysis in general and sentiment analysis in particular. Lecturers can readily use it in class for courses on natural language processing, social media analysis, text mining, and data mining. Lecture slides are also available online. Table of Contents: Preface / Sentiment Analysis: A Fascinating Problem / The Problem of Sentiment Analysis / Document Sentiment Classification / Sentence Subjectivity and Sentiment Classification / Aspect-Based Sentiment Analysis / Sentiment Lexicon Generation / Opinion Summarization / Analysis of Comparative Opinions / Opinion Search and Retrieval / Opinion Spam Detection / Quality of Reviews / Concluding Remarks / Bibliography / Author Biography

Beekun and Badawi, both professors of management and strategy, have written this primer on leadership integrating contemporary business techniques with traditional Islamic knowledge. The leadership paradigm is changing, and a leadership model based on ethical principles is finally emerging—a position that Islam has taken from the start. The synthesis of the authors results in a highly practical and inspiring manual for developing leadership skills.

As an annual event, The 3rd INTERNATIONAL CONFERENCE ON ADVANCE & SCIENTIFIC

INNOVATION (ICASI) 2020 continued the agenda to bring together researcher, academics, experts and professionals in examining selected theme by applying multidisciplinary approaches. In 2020, this event will be held in 20 June at Garuda Plaza Hotel Medan. The conference from any kind of stakeholders related with Management, Economy, Administration Business, Tourism, Policy, Law, Operation Management and all research in Social Science and Humanities. Each contributed paper was refereed before being accepted for publication. The double-blind peer reviewed was used in the paper selection.

This is a revision of Jose Rollin de la Torre-Bueno's A Glossary of Entomology published in 1937. For more than half a century it has served as the most important reference for entomological terms in the English language. This is a much needed updated and revised edition of the original glossary.

After neutrality and international enforcement, the next most valued feature of international commercial arbitration is confidentiality. For reasons easy to imagine, businessmen do not want their trade secrets, business plans, strategies, contracts, financial results or any other types of business information to be publicly accessible, as would commonly happen in court proceedings. Yet the case law of arbitration shows that in practical terms confidentiality is not to be taken for granted – in fact, it has become one of the most undetermined matters in international arbitration. Although ‘the emperor of arbitration may have clothes,’ as one scholar has quipped, his raiments of secrecy can be ‘torn with surprising ease’. This book deciphers the current degree of confidentiality in international commercial arbitration as reflected by the most important arbitration rules, national laws, other arbitration-related enactments, and practices of arbitral tribunals and domestic courts globally. Drawing on this data and analysis, the author then sets forth criteria to assess the breach of confidentiality in international arbitration and the proper rules for protecting or sanctioning such breaches. What do we understand by confidentiality in arbitration? What are its limitations? Who is bound to observe it? How can we quantify its breach? In addressing these questions, the book engages such issues as the following: reasons for disclosure – e.g., for the establishment of a defence, for the enforcement of rights, in the public interest or in the interests of justice disclosure by consent, express or implied; circumstances triggering statutory obligation of disclosure; recent trends towards greater transparency in investor-State arbitration; court measures in support of arbitral confidentiality such as award of damages for breach of confidentiality; and categories of persons bound by confidentiality, including third parties such as witnesses and experts. Structured along the main stages of the arbitral process, the analysis covers the duty of confidentiality from the initiation of arbitral proceedings through their unfolding to the issuance of the award and after. The scope of confidentiality is reviewed in the practice of arbitral tribunals and domestic courts, and from the perspective of international arbitration institutions, with detailed attention to various arbitration rules and numerous significant cases. In its elucidation of the amount of confidentiality that ‘veils’ each phase of the arbitral process, and its ground-breaking identification of ‘patterns of disclosure’, this book is sure to raise awareness about the various facets and problems posed by confidentiality in arbitration. Although its scholarly contribution to the law of international commercial arbitration cannot be gainsaid, corporate counsel worldwide will quickly prize its more practical value.

This book continues as volume 5 of a multicompendium on Edible Medicinal and Non-Medicinal Plants. It covers edible fruits/seeds used fresh, cooked or processed as vegetables, cereals, spices, stimulant, edible oils and beverages. It covers selected species from the following families: Apiaceae, Brassicaceae, Chenopodiaceae, Cunoniaceae, Lythraceae, Papaveraceae, Poaceae, Polygalaceae, Polygonaceae, Proteaceae, Ranunculaceae, Rhamnaceae, Rubiaceae, Salicaceae, Santalaceae, Xanthorrhoeaceae and Zingiberaceae. This work will be of significant interest to scientists, medical practitioners, pharmacologists, ethnobotanists, horticulturists, food nutritionists, botanists, agriculturists, conservationists,

lecturers, students and the general public. Topics covered include: taxonomy; common/English and vernacular names; origin and distribution; agroecology; edible plant parts and uses; botany; nutritive/pharmacological properties, medicinal uses, nonedible uses; and selected references.

This text is for students who are entering graduate-level studies in their academic fields and/or who need to write research results in the form of technical papers, journal articles, theses, or dissertations.

In September 2013, Indonesia officially signed a Voluntary Partnership Agreement (VPA) to guarantee the legality of all timber products exported to the EU. Under the Indonesian VPA, a timber legality assurance system known as SVLK (Sistem Verifikasi Legalitas Kayu) has already been developed and has been in effect since 1 January 2013 for woodworking, wood panels, and pulp and paper. When the VPA is fully implemented, SVLK will become FLEGT legality license and will meet European Union Timber Regulation (EUTR) requirements for legal timber. The objective of this paper is to analyze the challenges of implementing SVLK in the small-scale forestry sector of Indonesia. The paper also assesses whether a mandatory approach to legality verification will be more effective in terms of assuring legality than voluntary approaches, such as certification. The analysis involved desk-based analysis of government statistics, policy documents, key stakeholder interviews, and field surveys in three major timber-producing provinces of Indonesia — Central Java, East Kalimantan and Papua. The paper discusses a number of challenges facing the implementation of SVLK, among others the cost of timber legality verification, limited societal awareness of SVLK, business legality issues among small-scale enterprises, and high levels of illegality in their timber supply chains. The paper closes by presenting a detailed set of policy options to address the observed challenges.

This special volume is dedicated to the contributions of women ichthyologists. Three colleagues were selected to represent all women ichthyologists, Ethelwynn Trewavas (ET), Rosemary Lowe-McConnell (Ro) and Eugenie Clark (Genie). All have had distinguished professional careers and have contributed in their own ways to their science. The career of each is highlighted by a personal interview with one of the editors of the volume, a bibliography of their lifetime publications, and a biography of their careers. Questions of historical inequities and current controversies in the treatment of women ichthyologists by their peers are raised and addressed by the women themselves. The personal and professional influences of these three women, and other women ichthyologists, are highlighted. A survey article by Pat Brown brings a number of women ichthyologists to the attention of a broader audience, and points the way for a more comprehensive historical consideration of the accomplishments and contributions of women ichthyologists. The volume continues with 16 solicited and contributed papers. ET's studies of taxonomy and life history are echoed in papers on the taxonomy and systematics of marine angelfishes, and of freshwater bitterlings, a review of reproduction in the North Atlantic ichthyofauna, and a comparison of reproductive styles and systematics of African minnows. Ro's studies on ecology, life history and behaviour are paralleled by papers on growth and metabolism in piranha, the community structure in tide pool fishes, and the social system and reproductive patterns in groupers. Genie's pioneering work on sexual roles and sex change, and her field studies of the behaviour of marine fishes are reflected in papers on gonadal structure and environmental sex determination in brook lamprey, sexual patterns in hawkfish, reproduction and systematics in phallostethids, gonadal structure and systematics in gobiids, reproductive and predator avoidance behaviour in razorfish, early ontogeny of an African mouth brooder, and alternative life histories in killifish.

This book is a collection of ethnographies of transnational migration and border crossings in Asia. Interdisciplinary in scope, it addresses issues of mobility and Diaspora from various vantage points. Unique to this volume is an emphasis of studying globalisation from below,

privileging the narratives and views of “people on the move” – or the transnational underclass – and their sense of belonging to places and communities. The collection is further distinguished by its focus on the sources of authority and the social configurations that are created in the intersections between legality and illegality across Asia. Though previous studies on transnational flows have deconstructed the notion of nation-states as having fixed political boundaries, and have engaged in spaces beyond the nation-states, seldom has an entire region, Asia, been privileged in one integrated volume. We emphasize hitherto marginalized debates that have significant policy relevance. Other than a serious academic interest from lecturers and students, we are confident that book will be of significant interest for development practitioners and NGOs.

The past fifteen years have seen Indonesia move away from authoritarianism to a thriving yet imperfect democracy. During this time, the archipelago attracted international attention as the most-populated Muslim-majority country in the world. As religious issues and actors have been increasingly taken into account in the analysis and conduct of international relations, particularly since the 9/11 events, Indonesia’s leaders have adapted to this new context. Taking a socio-historical perspective, this book examines the growing role of transnational Islamic Non-State Actors (NSAs) in post-authoritarian Indonesia and how it has affected the making of Indonesia’s foreign policy since the country embarked on the democratization process in 1998. It returns to the origins of the relationship between Islamic organisations and the Indonesian institutions in order to explain the current interactions between transnational Islamic actors and the country’s official foreign policies. The book considers for the first time the interactions between the “parallel diplomacy” undertaken by Indonesia’s Islamic NSAs and the country’s official foreign policy narrative and actions. It explains the adaptation of the state’s responses, and investigates the outcomes of those responses on the country’s international identity. Combining field-collected data and a theoretical reflexion, it offers a distanced analysis which deepens theoretical approaches on transnational religious actors. Providing original research in Asian Studies, while filling an empirical gap in international relations theory, this book will be of interest to scholars of Indonesian Studies, Islamic Studies, International Relations and Asian Politics.

The Faculty of Education and Teaching Institut Agama Islam Negeri (IAIN) Bukittinggi, West Sumatera Indonesia, organized the 2nd International Conference on Education (BICED 2020) on 14-15 September 2020 in Bukittinggi, West Sumatera, Indonesia. The number of participants who joined the zoom room was recorded at 736 participants. 224 participants attended the conference via the zoom application and 539 participants via YouTube Channel. Participants came from 5 countries, namely Indonesia, Malaysia, Kuala Lumpur, Brunei Darussalam, Thailand and Australia. BICED 2020 is implemented with the support of a stable internet network system and a zoom application. In the implementation there were several technical obstacles encountered by the participants, namely the difficulty of joining the zoom application due to the unstable internet signal. The holding of a virtual conference felt less meaningful, due to the lack of interaction between speakers and participants. The BICED 2020 committee 29 papers were presented and discussed. The papers were authored by researchers from Australia, Brunei Darussalam, Thailand, Malaysia, United Kingdom, and Indonesia. All papers have been scrutinized by a panel of reviewers who provide critical comments and corrections, and thereafter contributed to the improvement of the quality of the papers.
