Noting that some figures are glamorized in popular culture (Jesse James), while others are demonized (Charles Manson), this encyclopedic collection explores the legends' emotional truths as depicted in movies, stories, and songs. Facts of the real cases behind these notorious criminals are also presented, including the landmark rulings that pioneered new approaches to criminal justice.

He took it upon himself personally to prove those murderous fugitives wrong, and he was there to collect his payments. And being the fastest draw in the west he never had much trouble. Kafiristan, or "The Land of the Infidels," was a region of eastern Afghanistan where the inhabitants had retained their traditional pagan culture and religion and rejected conversion to Islam. The Káfirs of the Hindu-Kush is a detailed ethnographic account of the Kafirs, written by George Scott Robertson (1852-1916), a British administrator in India. With the approval of the government of India, Robertson made a preliminary visit

to Kafiristan in October 1889, and then lived among the Kafirs for almost a year, from October 1890 to September 1891. Robertson describes his journey from Chitral (in present-day Pakistan) to Kafiristan and the difficulties he encountered in traveling about the country and in gaining information about the Kafir culture and religion. The latter, he writes, "is a somewhat low form of idolatry, with an admixture of ancestor-worship and some traces of fire-worship also. The gods and goddesses are numerous, and of varying degrees of importance or popularity." Robertson describes religious practices and ceremonies, the tribal and clan structure of Kafir society, the role of slavery, the different villages in the region, and everyday life and social customs, including dress, diet, festivals, sport, the role of women in society, and much else that he observed first-hand. The book is illustrated with drawings, and it concludes with a large fold-out topographical map, which shows the author's route in Kafiristan. In 1896 the ruler of Afghanistan, Amir 'Abd al-Rahman Khan (reigned 1880-1901), conquered the area and brought it under Afghan control. The Kafirs became Muslims and in 1906 the region was renamed Nuristan, meaning the "Land of Light," a reference to the enlightenment brought by Islam.

Recounts the author's experiences with the reclusive Tarahumara Indians, whose techniques allow them to run long distances with ease, and describes his training for a fifty-mile race with the tribe and a number of ultramarathoners.

The Sicilian Mafia, or Cosa Nostra, is one of the most intriguing criminal phenomena in the world. It is an unparalleled organised criminal grouping that over almost two centuries has been able not only to successfully permeate licit and illicit economy, politics and civil society, but also to influence and exercise authoritative power over both the underworld and the upper-world. This criminal phenomenon has been a captivating conundrum for scholars of different disciplines who have tried to explain with various paradigms the reasons behind the emergence and consolidation of the mafia. *Challenging the Mafia Mystique* provides an analysis of the changes the Sicilian mafia has undergone, from legitimisation to denunciation. Rino Coluccello highlights how, from the very emergence of the organised criminal groups in Sicily, a culture existed that was protective and tolerant of the mafia. He argues that the various conceptualisations of the mafia that dominated the public and scientific debate in the nineteenth and more than half of the twentieth century created a mystique, which legitimised the mafia and contributed to their success.

Play is "an occasion of pure waste: waste of time, energy, ingenuity, skill, and often of money." It is also an essential element of human social and spiritual development. In this study, Roger Caillois defines play as a voluntary activity that occurs in a pure space, isolated and protected from the rest of life. Within limits set by rules that provide a level playing field, players move toward an unpredictable outcome by responding to their opponents' actions. Caillois qualifies types of games and ways of playing, from the improvisation characteristic of children's play to the disciplined pursuit of solutions to gratuitously difficult puzzles. He also examines the means by which games become part of daily life, ultimately giving cultures their most characteristic customs and institutions.

John Steinbeck wrote *The Grapes of Wrath* during an astonishing burst of activity between June and October of 1938. Throughout the time he was creating his greatest work, Steinbeck faithfully kept a journal revealing his arduous journey toward its completion. The journal, like the novel it chronicles, tells a tale of dramatic proportions—of dogged determination and inspiration, yet also of paranoia, self-doubt, and obstacles. It records in intimate detail the conception and genesis of *The Grapes of Wrath* and its huge though controversial success. It is a unique and penetrating portrait of an emblematic American writer creating an essential American masterpiece.

For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

the Mafia (The Times, London). This landmark work offers a completely new approach to the history and psychology of human violence. Its sweep is broad, its research meticulous and detailed. Colin Wilson explores the bloodthirsty sadism of the ancient Assyrians and the mass slaughter by the armies led by Genghis Khan, Tamerlane, Ivan the Terrible, and Vlad the Impaler. He delves into modern history, exploring the genocides practiced by Stalin and Hitler. He then takes a chilling look into the sex crimes and mass murders that have become symbols of the neuroses and intensity of modern life. With breathtaking audacity and stunning insight, Wilson puts criminality firmly in a wide, illuminating historical context. "A work of massive energy, compulsively readable, splendidly informative . . . it establishes Wilson in a European tradition of thought that includes H. G. Wells, Sartre and Shaw." —Time Out London "A tremendous resource for crime buffs as well as a challenging exposition for some of the more subtle criminological thinking of our time." —Kirkus Reviews This unique book closes the gap between psychology books and the research that made them possible. Its journey through the "headline history" of psychology presents 40 of the most famous studies in the history of the science, and subsequent follow-up studies that expanded their findings and relevance. Readers are granted a valuable insider's look at the studies that continue to be cited most frequently, stirred up the most controversy when they were published, sparked the most subsequent related research, opened new fields of psychological exploration, and changed most dramatically our knowledge of human behavior. For individuals with an interest in an introduction to psychology.
