The term Sciatica which dates back to 1398 AD refers to pain (neuralgia) that radiates along the path of the sciatic nerve branching or extending from your lower back through the buttocks (gluteal area) and hips and down each leg. Sciatica which normally affects one side of the body causes muscle weakness in your leg and foot, numbness in your leg, and an unpleasant tingling pins and needles sensation in your leg, foot, and toes. Sciatica is also irritation, inflammation, compression, or pinching of the sciatic nerve in your lower back. There are over 100 billion nerves in the body but the sciatic nerve is the thickest, largest and longest nerve in the human body. This book is specifically designed to serve as a resource guide to everything you ought to know about sciatica which covers the types of sciatica, the symptoms of sciatica, the causes and risk factors of sciatica, the diagnosis and tests for sciatica. The manual will also guide you on the non-surgical treatment options for sciatica, natural home remedies for sciatica, exercises and stretches for sciatica pain relief, surgical treatment options for sciatica. The book will also guide you on how you can travel with sciatica, sleeping with sciatica pain, the myths and facts about sciatica, and how to cope and stay productive with sciatica pain in your workplace, and many more.

Overviews the home care industry covering specific issues of home care visits. Four units discuss recent trends; skills and concepts such as cultural adaptability, supervision of paraprofessionals, and application of the nursing process in the home care setting; clinical activities nurses perform, including teaching and infection control; and the actual practice of home care nursing. Boxed material highlights typical dilemmas in home care, compares home and hospital care, and offers tips and suggestions. Annotation copyrighted by Book News, Inc., Portland, OR.

repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.

Geared to primary care practitioners, *The Washington Manual® of Outpatient Internal Medicine* focuses on common ambulatory medical problems encountered in each medical subspecialty. The book has a quick-reference format similar to *The Washington Manual® of Medical Therapeutics*, with a standard chapter template, a bulleted style, numerous tables and figures, and a two-color design. All chapters are written by house staff and faculty at Barnes-Jewish Hospital and Washington University School of Medicine. Coverage includes the traditional internal medicine subspecialties and other areas where problems are frequently seen in the ambulatory setting, such as dermatology, neurology, ophthalmology, otolaryngology, and psychiatry. Most subspecialties have separate symptom- and disease-based chapters. *The Washington Manual®* is a registered mark belonging to Washington University in St. Louis to which international legal protection applies. The mark is used in this publication by LWW under license from Washington University.

This handbook is a practical guide to inpatient and outpatient rheumatology consultations. The Johns Hopkins Manual of Gynecology and Obstetrics, Third Edition is the perfect on-the-spot reference for clinicians who deal with obstetric and gynecologic problems. Written by residents in obstetrics and gynecology at The Johns Hopkins University, this popular manual covers virtually every clinical situation in obstetrics, high-risk obstetrics, gynecology, reproductive endocrinology, infertility, and gynecologic oncology. The easy-to-use outline format—modeled after *The Washington Manual® of Medical Therapeutics*—helps busy clinicians find information quickly. A list of frequently used drugs with dosages is included. This edition is updated throughout and includes the latest information on hormone therapies, birth control, and drugs.

Now in its third edition, this trusted clinical guide enables both the busy practitioner and student to review or to learn about a range of pathologies, conditions, examinations, diagnostic procedures, and interventions that can be effectively used in the physical rehabilitation of older people. It presents a broad overview of age-related physiological changes as well as specific professional discipline perspectives. Organized into eleven distinct and interrelated units, the first unit begins with key anatomical and physiological considerations seen with aging which have significant impact on the older person. The second and third units go on to review important aging-related conditions and disorders of the musculoskeletal and neuromuscular/neurological systems respectively. Neoplasms commonly encountered in older people are the focus of the fourth unit; while aging-related conditions of the cardiovascular, pulmonary, integumentary and sensory systems are presented in units five through seven. Unit eight highlights a range of specific clinical problems and conditions commonly encountered with older patients. Critically, all of these units

emphasize important examination and diagnostic procedures needed for a thorough evaluation and stress interventions that can be of significant benefit to the older patient. The ninth unit presents select physical therapeutic interventions that are especially important in managing rehabilitative care. Key societal issues related to aging are discussed in the tenth unit. Finally, the concluding eleventh unit focuses on the successful rehabilitation team that includes both professional and non-professional caregiver members. A trusted guide to the conditions and problems faced when evaluating and treating geriatric patients Extensive coverage over 84 chapters, each written by an expert in the field Includes imaging, vision and the aging ear Cross-referenced - providing the complexity and inter-relatedness of co-morbidities common to aging patients Collaborative international perspective Chapters on the aging spine; frailty; safe pilates for bone health; health care for older people Additional renowned editor - Ronald W. Scott Revised title to reflect the comprehensive scope of content covered (previously entitled Geriatric Rehabilitation Manual) Designed as a diagnostic tool for non-neurologists or first-year neurology residents, this pocket guide contains the most essential information from the best-selling DeJong's The Neurologic Examination, Sixth Edition. Included are step-by-step instructions for each stage of the neurologic examination, numerous illustrations depicting examination techniques, and frequently used tests and scales such as the Boston Naming Test, Glasgow Coma Scale, and Denver Scale of Communication Function. A "toolkit" at the back of the book contains lightweight adaptations of implements used in performing the examination, such as visual acuity charts, a red lens, a multi-pinhole, an optokinetic nystagmus tape, and other devices.

This small pocket book contains all the essentials that every resident needs to know from day one on the wards. It presents practical, must-have information from the front lines of the wards in an easy-to-use quick reference format.

Pharmacology for Health Professionals, Second Edition is specifically written for students who may not directly administer drugs in their chosen health profession, but who will be involved in patient care and therefore need to understand basic pharmacological principles and practices

Nursing-focused and easy-to-read, this full-color manual delivers all the information you need to understand how tests work, interpret their results, and provide quality patient care—pre-test, intra-test, and post-test.

This is an educational resource that will help massage therapists, physical therapists, chiropractors medical doctors, psychologists and other health professionals who care for people with musculoskeletal pain.
