Human society is full of would-be "change agents," a restless mix of campaigners, lobbyists, and officials, both individuals and organizations, set on transforming the world. They want to improve public services, reform laws and regulations, guarantee human rights, get a fairer deal for those on the sharp end, achieve greater recognition for any number of issues, or simply be treated with respect. Striking then, why so many universities lack programs for social activists, to which students can turn for advice and inspiration. Instead, scholarly discussions of change are fragmented with few conversations crossing disciplinary boundaries, rarely making it onto the radar of those actively seeking change. This book bridges the gap between academia and practice, bringing together the best research from a range of academic disciplines and the evolving practical understanding of activists to explore the topic of social and political change. Drawing on many first-hand examples from the global experience of Oxfam, one of the world's largest social justice NGOs, as well as the author's insights from studying and working on international development, it tests ideas on how change happens and offers the latest thinking on what works to achieve progressive change.

Booker Taliaferro Washington began life as a slave in Virginia shortly before emancipation, but rose to become one of the most celebrated leaders the African American community has ever had. His principal occupation was as president of the Tuskegee Institute, which he founded in 1881, but he earned national renown as an orator, writer and political advisor. His address at the Atlanta Exposition was a pivotal moment in race relations in America. Washington believed deeply in the dignity of physical labor, and that merit and talent are eventually rewarded regardless of race or class. The Tuskegee Institution was primarily a technical college, and aimed to teach industrial skills in addition to academic training. Students built many of the buildings on

the campus, grew the food that was eaten there, and even made the furniture, tools and vehicles used by the school. Up from Slavery was originally published as a serialized work in The Outlook, a Christian magazine based in New York, before being collected in a single volume in 1901. This edition includes an introduction by Walter H. Page, a future U.S. ambassador to the United Kingdom. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

We all hear tales about the Knights Templar, but who are they, and what purpose do they have in a modern world? She goes further to make suggestions to those wishing to tread the path towards discovery. The Little Book of Templar Philosophy is just that, a little book with a wealth of belief systems.

During the muscle car wars of the 1960s, Holley carburetors emerged as the carbs to have because of their easy-to-tune design, abundance of parts, and wide range of sizes. The legendary Double Pumper, the universal 600-cfm 1850 models, the Dominator, and now the Avenger have stood the test of time and are the leading carburetors in the high-performance engine market. To many enthusiasts, the operation, components, and rebuilding procedures remain a mystery. Yet, many carburetors need to be rebuilt and properly set up for a particular engine package. Veteran engine building expert and automotive author Mike Mavrigian guides you through each important stage of the rebuilding process, so you have the best operating carburetor for a particular engine and application. In addition, he explains carb identification as well as idle, mid-range and high-speed circuit operation, specialty tools, and available parts. You often need to replace gaskets, worn parts, and jets for the prevailing weather/altitude conditions or a different engine setup. Mavrigian details how to select parts then disassemble, assemble, and calibrate all of the major Holley carburetors. In an easy-to-follow step-by-step format, he shows you each critical stage for cleaning sensitive components and installing parts, including idle screws, idle air jets, primary/secondary main jets, accelerator pumps, emulsion tubes, and float bowls. He also includes the techniques for getting all of the details right so you have a smooth-running engine. Holley carburetor owners need a rebuilding guide for understanding, disassembling, selecting parts, and reassembling their carbs, so the carb then delivers exceptional acceleration, quick response, and superior fuel economy. With Holley Carburetors: How to Rebuild you can get the carb set up and performing at its best. And, if desired, you can move to advanced levels of tuning and modifying these carbs. If you're looking for the one complete book that helps you quickly and expertly rebuild your Holley and get back on the road, this book is a vital addition to your performance library.

The Kama Sutra is a Hindu treatise on the art of love, composed sometime during the 1st and 4th centuries AD. Written in Sanskrit, it is attributed to Vatsyayana, also known as Mallanaga. 'Kama' is the Hindu word for love, pleasure, and sensual gratification; and 'sutra' are aphorisms. The work is partly a marriage manual containing specific sexual information, including the arts of scratching, biting, and pinching. But the enormous influence of the Kama Sutra stems from its wider discussion of women, courtship, and the place of erotic pleasure in the urbane life of a man or woman of leisure. It was first translated into English in 1883 by the famous explorer, Sir Richard Francis Burton. Kama Sutra of Vatsyayana in Pop-up uses excerpts from the original text, as translated by Richard Burton, and color plates from the authentic Indian illustrations that show how to perfect your lovemaking skills. There are also six pop-up sections, showing a selection of the most interesting positions from the Kama Sutra in three-dimensions, using the latest in paper-engineering techniques. This is a fun but artistic look at the images and advice of the Kama Sutra.

Food reliability matters more than ever. Joseph Lofthouse taught landrace gardening at conferences hosted by the Rocky Mountain Seed Alliance, National Heirloom Expo, Organic Seed Alliance, Northeast Organic Farming Association (NOFA-NY), and Utah Farm & Food Conference. He serves as World Tomato Society ambassador. "Landrace Gardening is brilliant. It's a love story! And 2 parts gardening handbook. There are so many revelations I don't know where to begin? AMAZING. In every way this is a book for the ages. Bravo Joseph." Dan Barber, Blue Hill At Stone Barns, and Row 7 Seed Company. "There is magic in the way Joseph Lofthouse marries his no-stress approach to gardening with such deep love and passion. This book is as much a gardening manual as it is a re-framing of our relationship with each other and the world. Landrace Gardening gives us a roadmap to the kind of joyful food security that we need for healing many of the most important wounds of our time." Jason Padvorac "Joseph Lofthouse has a focus upon something that all gardeners should know: Landrace varieties are the way to sustainability. The best part is that everything in his book is adaptable for any gardener. No high level knowledge of botany or chemistry is required. The versatility and diversity of growing landrace plants speaks for themselves." Jere Gettle- Baker Creek Heirloom Seed Company. "The western sustainable agriculture movement has long needed its own version of the 'One Straw Revolution'. Joseph Lofthouse provides just that. With revolutionary gusto based on heretical thought and age old human gnosis. In Landrace Gardening, Food Security... Lofthouse steps firmly into the role of Iconoclast and elder seed shaman." Alan Bishop, Alchemist at Spirits Of French Lick

What if Robert E. Lee won the Battle of Gettysburg and his army went on to capture Philadelphia? What if the United States government was forced to recognize Confederate independence? In this acclaimed work of alternative history, the wealthy and prosperous Confederacy is a superpower, locked into a bitter struggle with its European rival, the German Union. The United States, conversely, is utterly destitute, a sinkhole of lawlessness and corruption. Technology, too, has taken a different turn, as the twentieth-century world travels by stagecoach, communicates by telegraph, and reads by gaslight. But when a young inventor who's experimenting with time travel encounters an amateur historian, the stage is set for a return to a critical point in American history.
