Charles C. McDougal lived in Asia for twenty years, including ten years in the Philippines from 1972 to 1982. His impeccable research stems from an academic background whose credentials include a bachelor of science degree from the University of Georgia, a master's degree from the Asian Institute of Management, and a doctorate in business from the University of the Philippines. The data he gathered for his doctoral dissertation was the genesis of his 1987 book "The Marcos File", which exposed the Marcos regime for its corruption and excesses. It was while working on a book about Marcos' hidden wealth that he stumbled on the story of a treasure hunt headed by Marcos. His close friendship with the national security director provided him access to the corridors of power. He was asked to find out the truth, both about the legendary treasure and the Marcos gold. His academic credentials, plus his military background-- he was a captain in the Green Berets in Vietnam-- made him a natural choice. He returned to the Philippones. A cave-in killed two of his men and overnight this top-secret operation made the front page of almost every major newspaper in the world.

WINNER OF THE FLETCHER PRATT AWARD FOR BEST NON-FICTION BOOK OF 2016 In a single definitive narrative, CITY OF SEDITION tells the spellbinding story of the huge-and hugely conflicted-role New York City played in the Civil War. No city was more of a help to Abraham Lincoln and the Union war effort, or more of a hindrance. No city raised more men, money, and materiel for the war, and no city raised more hell against it. It was a city of patriots, war heroes, and abolitionists, but simultaneously a city of antiwar protest, draft resistance, and sedition. Without his New York supporters, it's highly unlikely Lincoln would have made it to the White House. Yet, because of the city's vital and intimate business ties to the Cotton South, the majority of New Yorkers never voted for him and were openly hostile to him and his politics. Throughout the war New York City was a nest of antiwar "Copperheads" and a haven for deserters and draft dodgers. New Yorkers would react to Lincoln's wartime policies with the deadliest rioting in American history. The city's political leaders would create a bureaucracy solely devoted to helping New Yorkers evade service in Lincoln's army. Rampant war profiteering would create an entirely new class of New York millionaires, the "shoddy aristocracy." New York newspapers would be among the most vilely racist and vehemently antiwar in the country. Some editors would call on their readers to revolt and commit treason; a few New Yorkers would answer that call. They would assist Confederate terrorists in an attempt to burn their own city down, and collude with Lincoln's assassin. Here in CITY OF SEDITION, a gallery of fascinating New Yorkers comes to life, the likes of Horace Greeley, Walt Whitman, Julia Ward Howe, Boss Tweed, Thomas Nast, Matthew Brady, and Herman Melville. This book follows the fortunes of these figures and chronicles how many New Yorkers

seized the opportunities the conflict presented to amass capital, create new industries, and expand their markets, laying the foundation for the city's-and the nation's-growth.

How to Build a Cheap Chopper was originally written to give chopper builders of the day a way to build cool, functional choppers for cheap money. Instead of building bikes out of a catalogue, readers were encouraged to combine a donor bike with an aftermarket frame. With a Sportster or Metric bike as a foundation, and a hard-tail frame, a complete bike could be assembled for less than \$5,000, sometimes much less. Today, there's a whole new generation of riders looking to build simple, functional, unique choppers and bobbers based on everything from a 200cc Honda to the old classic Shovelhead or Panhead engines. No matter which drivetrain they choose, there remains the need to build bikes that work, bikes that are safe to ride, bikes that are fun! How to Build a Cheap Chopper-Revised starts with a look at the basics. The first chapters cover brakes, drivetrains, and frame geometry. The second half of the book shows readers how to actually assemble a bike. Four start-to-finish assemblies done at professional shops take the reader from a pile of parts to a finished, running motorcycle.

Reflects the latest applied research and features state-of-the-art software for

building and solving spreadsheet optimization models Thoroughly updated to reflect the latest topical and technical advances in the field, Optimization Modeling with Spreadsheets, Second Edition continues to focus on solving real-world optimization problems through the creation of mathematical models and the use of spreadsheets to represent and analyze those models. Developed and extensively classroom-tested by the author, the book features a systematic approach that equips readers with the skills to apply optimization tools effectively without the need to rely on specialized algorithms. This new edition uses the powerful software package Risk Solver Platform (RSP) for optimization, including its Evolutionary Solver, which employs many recently developed ideas for heuristic programming. The author provides expanded coverage of integer programming and discusses linear and nonlinear programming using a systematic approach that emphasizes the use of spreadsheet-based optimization tools. The Second Edition also features: Classifications for the various problem types, providing the reader with a broad framework for building and recognizing optimization models Network models that allow for a more general form of mass balance A systematic introduction to Data Envelopment Analysis (DEA) The identification of qualitative patterns in order to meaningfully interpret linear programming solutions An introduction to stochastic programming and the use of

RSP to solve problems of this type Additional examples, exercises, and cases have been included throughout, allowing readers to test their comprehension of the material. In addition, a related website features Microsoft Office® Excel files to accompany the figures and data sets in the book. With its accessible and comprehensive presentation, Optimization Modeling with Spreadsheets, Second Edition is an excellent book for courses on deterministic models, optimization, and spreadsheet modeling at the upper-undergraduate and graduate levels. The book can also serve as a reference for researchers, practitioners, and consultants working in business, engineering, operations research, and management science.

One omega for five alpha's to share. I don't know how long I've been in this darkness. I don't know how long I've been seeing with eyes that can't open,

speaking from a throat incapable of making sounds. All I have are my thoughts and how weary I've grown with nothing else to listen to. Perhaps I am nothing more than a state of mind. I want to die. Understanding is slow to arrive but when it does, nothing will ever be the same again. Now, with a form that moves, I uncover the meaning of my existence and the purpose for my extended solitude. I'm an omega. A rare breeding mare for the likes of alphas. With the decrease in fertility rates in able omegas, less pups means a crippled society overrun with beta's. Omega's, now born sickly and broken, are found wanting in a population steeply dying out. I'm just the beginning of change and by no means the last. Created, not born, I'm slave to the will of my makers ... and my mates. Will I survive or be torn apart by five hungry alphas? **This reverse harem, omegaverse novel is not for the faint of heart. Creature of the Dark contains graphic sexual content and dark situations that may not be suitable for everyone. Be advised, this is a #whychoose story as the main character ends up with more than one mate.

The Lily of Life: A Fairy Tale by The Crown Princess of Roumania. First published by Hodder & Stoughton, London; New York, 1913. "Graceful fancy, elevated sentiment, and simple but dignified expression ensure a high place among the fairy tales of the publishing year for the Queen of Roumania's charming work, The Lily of Life.... The merit of the telling is unusual, and it has the further advantage of being presented in an exceedingly handsome and artistic form. The coloured illustrations of Miss Helen Stratton show graceful drawing and fine gradations of tone. They are not merely a pictorial summary of the story, but genuine works of art, and a distinctive feature of the volume."-Scotsman
