Free logic - i.e., logic free of existential presuppositions in general and with respect to singular terms in particular- began to come into its own as a field of research in the 1950s. As is the case with so many developments in Western philosophy, its roots can be traced back to ancient Greek philosophy. It is only during the last fifty years, however, that it has become well established as a branch of modern logic. The name of Karel Lambert is most closely connected with this development: he gave it its name and its profile as a well defined field of research. After a development of fifty years, it is time to look back and take stock while at the same time scanning for new perspectives. This is the purpose of the papers collected in this volume. The first paper is written by Karel Lambert himself who also comments on all the papers of the other authors. In an introductory essay we give a survey of the present status of and new directions in free logic.

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Sir Arthur Ignatius Conan Doyle DL (22 May 1859 - 7 July 1930) was a Scottish physician and writer who is most noted for his fictional stories about the detective Sherlock Holmes, which are generally considered milestones in the field of crime fiction. He is also known for writing the fictional adventures of a second character he invented, Professor Challenger, and for popularising the mystery of the *Mary Celeste*. He was a prolific writer whose other works include fantasy and science fiction stories, plays, romances, poetry, non-fiction, and historical novels. Sherlock Holmes is a fictional detective created by Scottish author and physician Sir Arthur Conan Doyle, a graduate of the University of Edinburgh Medical School. A London-based "consulting detective" whose abilities border on the fantastic, Holmes is famous for his astute logical reasoning, his ability to adopt almost any disguise, and his use of forensic science skills to solve difficult cases. Holmes, who first appeared in publication in 1887, was featured in four novels and 56 short stories. The first novel, *A Study in Scarlet*, appeared in *Beeton's Christmas Annual* in 1887 and the second, *The Sign of the Four*, in *Lippincott's Monthly Magazine* in 1890. The character grew tremendously in popularity with the first series of short stories in *The Strand Magazine*, beginning with "A Scandal in Bohemia" in 1891; further series of short stories and two novels published in serial form appeared between then and 1927. The stories cover a period from around 1880 up to 1914. All but four stories are narrated by Holmes's friend and biographer, Dr. John H. Watson; two are narrated by Holmes himself ("The Blanched Soldier" and "The Lion's Mane") and two others are written in the third person ("The Mazarin Stone" and "His Last Bow"). In two stories ("The Musgrave Ritual" and "The Gloria Scott"), Holmes tells Watson the main story from his memories, while Watson becomes the narrator of the frame story. The first and fourth novels, *A Study in Scarlet* and *The Valley of Fear*, each include a long interval of omniscient narration recounting events unknown to either Holmes or Watson.

In *United We Stand Divided We Fall* Garn Press has gathered together essays by great scholars and renowned teachers who oppose the direction in which President Trump is leading the country. These are essays, to quote George Lakoff, which frame American values accurately and systemically day after day, telling truths by American majority moral values. These are essays of protest against and resistance to Trump's presidency, to his billionaire cabinet, to the privileging in the White House of white supremacists, the promulgation of "alternate facts," the denigration of media sources, the purges of State Department personnel, the gag orders at the EPA and scientists placed on "watch lists," the travel bans on people from wide swaths of U.S. society and on refugees ... the list is long. They are also essays that tackle the question of what we can do to stop Trump from becoming a fast moving catastrophe. When the hands of the Doomsday Clock were moved closer to midnight, President Trump was named specifically as an existential risk to humanity. There is no doubt that we must all act. The writers of conscience who have written this collection of essays are all actively engaged in opposing President Trump and their writings encourage us to participate in the resistance movement. Read with a pencil in hand. Make notes on what you can do to join aspects of the movement that reflects the needs and concerns of your community.
