For the first time in English a book has been published that tells the complete story of the beautiful Japanese erotic art Kinbaku (Japanese erotic bondage): its historical roots, artistic development, key personalities and intriguing techniques. ¿The Beauty of Kinbaku¿, a new book by renowned authority and teacher Master "K", is the result of a lifetime of study and four years of intensive research, much of it in Japan, making it the most comprehensive volume on its subject in English. Included in its 192 lavishly illustrated pages are chapters on:\* The origins and history of this fascinating subject - from ancient times to the present day.\* Its evolution as an art form, from medieval martial art to modern erotic pleasure. \* Twenty five mini biographies of its most notable artists and practitioners throughout the years.\* A photo gallery with 109 brand new and stunningly beautiful photographs by shibari artist and teacher Master "K"!\* For the first time in English, an extensive glossary that describes and defines all of the classic kinbaku ties used from the past to the present.\* A clearly illustrated "How-to" section showing you how to complete three of the most important ties upon which many tying patterns are based.\* An extensive bibliography.

Although many books have been written about T E Lawrence and the Arab Revolt, none before has fully explored the pivotal role of the Royal Navy in the Red Sea at the time. This is the first book to be written about the Navy's role in the success of the Arab Revolt in the creation of the legendary figure of Lawrence of Arabia. Following extensive and detailed research into the activities of the ships of the Red Sea Patrol by the author, a maritime historian and former Merchant Navy officer, it has become evident that, without the work of those ships, the Arab revolt would have failed and T E Lawrence would have remained an obscure officer in the military bureaucracy of Cairo.??Lawrence was very aware of the importance and relevance of the Royal Navy in their operations in the Red Sea and commented on it on many occasions, notably in 1918, saying 'The naval side of the operations, when the time comes to tell of it, will provide a most interesting case of the value of command of the sea..'. Until now, nobody has investigated this angle in any detail. By doing this so comprehensively, this book gives a fresh dimension to the Lawrence of Arabia legend.

In his illustrious career as a cartoonist for the New Yorker and other publications, Joseph Farris has created dozens of hilarious cartoons about “the best game in the world at which to be bad.” A.A. Milne had it right, and Farris’s cartoons get to the heart of the game’s wonderful contradiction: over the course of eighteen holes, golf has the capacity to bring great joy and drive you crazy. Farris treats us to the sight of a blissfully happily newlywed with “Just Married” emblazoned on the back of his golf cart; of an archaeologist who discovers a hieroglyph featuring an annoyed-looking pharaoh breaking a golf club over his knee; and a TV-watching husband who rebuffs his naked wife’s amorous advances in no uncertain terms: “Not now, I’m watching Tiger Woods.” It’s been said that real golfers don’t cry. That may or may not be true. Joseph Farris’s cartoons are sure to make any golfer laugh.

Tom Brokaw of NBC Nightly News once said of the American icon Fred Rogers, "Mister Rogers was an ordained minister, but he never talked about God on his program. He didn't need to." Eight years before his death, Fred Rogers met author, educator, and speaker Amy Hollingsworth. What started as a television interview turned into a wonderful friendship spanning dozens of letters detailing the driving force behind this gentle man of extraordinary influence. Educator? Philosopher? Psychologist? Minister? Here is an intimate portrait of the real Mister Rogers. The Simple Faith of Mr. Rogers focuses on Mr. Rogers' spiritual legacy, but it is much more than that. It shows us a man who, to paraphrase the words of St. Francis of Assisi, "preached the gospel at all times; when necessary he used words."

Principles of Physics is a well-established popular textbook which has been completely revised and updated.

With hundreds of books on the market today urging readers to develop mindfulness, pointing to the condition of "awakening" that most religious/philosophical traditions aim toward, this new addition by Red Hawk stands head and shoulders above the crowd. It offers detailed practical guidelines that allow one to know with certainty—not from imagination, theory, thought, or lying—when one is Present and Awake; it details the objective feedback mechanisms available to everyone for attaining this certainty: Am I awake now? How do I know? Sincere readers will find that help in answering these two questions is invaluable and life-changing. Written from the perspective of a practitioner of more than thirty years—one who has studied the significant work of his predecessors, received instruction from two spiritual masters (Osho Rajneesh and Mister Lee Lozowick), and trained rigorously within daily life. This book is the first detailed examination of the Practice-of-Presence (called "self remembering" in the Gurdjieff tradition). The author's aim is to give general guidelines in this practice, discuss its implications, and then offer specific instruction. Self Remembering: The Path to Non-Judgmental Love is meant to be a companion piece, volume ii, to the author's previous book Self Observation: The Awakening of Conscience, which is fast becoming a classic. Taken together, they present the most detailed examination of the practice available in English. He clearly points out that self remembering is only one half of a foundational spiritual practice called "self observation/self remembering." Where other authors/teachers have gone wrong in the past is to take only one half of this practice and consider it the whole, entire unto itself. Mister Gurdjieff's student, A.R. Orage (1873-1934), made this mistake with self observation; contemporary teacher Robert Burton made a similar error with his book, also titled Self Remembering. While P.D. Ouspensky speaks of the practice of self remembering in his seminal book In Search of the Miraculous, and Rodney Collin in The Theory of Celestial Influence, there has not been a book-length study on self remembering that examines the practice from the many angles that Red Hawk's does. His chapters cover such diverse yet integrated topics as The Removal of Self Importance; Kaya Sadhana or the wisdom of the body; and Separation Grief, i.e., addressing the terror of our current situation without denial or dramatics.

It includes a discussion of filtering, modulation and feedback by building on the fundamentals of signals and systems covered in earlier chapters of the book.

If Jesus had lived to my age (90 years) I think he might have written his autobiography. Unfortunately, however, he was killed by those he had come to save. Fortunately four of his disciples wrote up the story of his life, and gave us the four Gospels which are a marvelous account of his life and his teaching. We are tremendously indebted to Matthew, Mark, Luke and John who have given us an inspired account of all that Jesus did and taught. Recognizing the great value that a biography or autobiography may have, I decided to write and publish my autobiography. From a thirty day retreat I made back in 1977 I learned that an autobiography may not only be a blessing to the readers of it, but also to the author. The healing I experienced through the 800 pages I wrote at that time and shared with my director convinced me that the writing of an autobiography can be a blessing to the author, perhaps more than to later readers. I am so convinced of the benefit the author of an autobiography may receive that I would encourage parents and teachers to teach children, perhaps, by the age of eight or ten to begin to write a diary or journal. Very helpful to me in writing my autobiography was the practice I began about 1949 (When I was 22 years old) of keeping a journal or appointment book in which I kept a record of all the persons I met or places where I travelled, and things I saw, and reflections that seemed to be significant. In the course of writing my autobiography I became more aware of the many people who have had a significant role in my life and development. More important, I have discovered at a deeper level how important in my life has been the friendship I have developed with Jesus. I am convinced that Jesus has had a very important

part in bringing into my life the many people who have touched and transformed my life. That is why I consider Jesus the first and greatest of all my friends. I heartily agree with St. Paul when he wrote to the Corinthians: Brothers, you are among those called. Consider your situation. Not many of you are wise, as men account wisdom, not many are influential, and surely not many are well born. God chose those whom the world considers absurd to shame the wise; he singled out the weak of this world to shame the strong. He chose the world's lowborn and despised, those who count for nothing, to reduce to nothing those who were something: so that mankind can do no boasting before God. God it is who has given you life in Christ Jesus. He has made him our wisdom and also our justice, our sanctification, and our redemption. This is just as you find it written, Let him who would boast, boast in the Lord. ( I Cor. 1:26 - 31)

"How do I know I covered all the requirements? Where do I begin? When should I stop? Did I miss something that will result in unpleasant surprises down the road?" If you are a Business Analyst, these questions will certainly mean something to you. You've probably asked yourself these questions at one point or another when you were assigned your early requirements development tasks. In this book, I introduce a requirements development roadmap that will guide you from start to finish. It is a plan carefully prepared and organized around consecutive stations. At each station, I tell you: 1. The target objective, and why you need to think about that particular objective at that specific point in time 2. Which elicitation techniques will best serve the objective, and which questions to ask in order to capture the information you need 3. Which analysis tools to apply in order to analyze the information from different angles 4. How to document the output of the exercise that you just performed

Introductory kinetics for the undergrad materials scientist *Materials Kinetics Fundamentals* is an accessible and interesting introduction to kinetics processes, with a focus on materials systems. Designed for the undergraduate student, this book avoids intense mathematics to present the theory and application of kinetics in a clear, reader-friendly way. Students are first introduced to the fundamental concepts of kinetics, with illustrated diagrams, examples, text boxes, and homework questions that impart a unified, intuitive understanding. Further chapters cover the application of these concepts in the context of materials science, with real-world examples including silicon processing and integrated circuit fabrication, thin-film deposition, carbon-14 dating, steel degassing, energy conversion, and more. Instructor materials including PowerPoint presentations, a test bank, and more are available through the companion website, providing a complete resource for the undergraduate materials science student. At its core, kinetics deals with rates, telling us how fast something will take place – for example, how fast water will evaporate, or how fast molten silicon will solidify. This book is designed to provide students with an introduction to kinetics' underlying principles, without rigorous math to distract from understanding. Understand universally important kinetic concepts like diffusion and reaction rate Model common kinetic processes both quantitatively and qualitatively Learn the mechanisms behind important and interesting materials systems Examine the behaviors, properties, and interactions of relevant solid materials There are a large number of books on chemical kinetics, but there are far fewer that focus on materials kinetics, and virtually none that provide an accessible, introductory-level treatment of the subject. *Materials Kinetics Fundamentals* fills that need, with clear, detailed explanations of these universal concepts.

A legendary painting by Rembrandt forms the centerpiece of this exploration of self-portraits by leading artists of the twentieth and twenty-first centuries. Published to commemorate an exhibition presented by Gagosian in partnership with English Heritage, this stunning volume centers on Rembrandt's masterpiece *Self-Portrait with Two Circles* (c. 1665), from the collection of Kenwood House in London. The painting is considered to be Rembrandt's greatest late self-portrait and is accompanied here by examples of the genre from leading artists of the past one hundred years. These include works by Francis Bacon, Jean-Michel Basquiat, Lucian Freud, and Pablo Picasso, as well as contemporary artists such as Georg Baselitz, Glenn Brown, Urs Fischer, Damien Hirst, Howard Hodgkin, Giuseppe Penone, Richard Prince, Cindy Sherman, and Rudolf Stingel, among others. Also featured is a new work by Jenny Saville, created in response to Rembrandt's masterpiece. Full-color plates of the works, generous details, and installation views of the exhibition accompany an expansive essay by art historian David Freedberg that provides a close look at the self-portraits created by Rembrandt throughout his life and considers the role of the Dutch master as the precursor of all modern painting.
