

Fundamentos De Enfermeria Kozier

Esta obra ofrece al estudiante o profesional una visión completa, pero no exhaustiva, de los fundamentos teóricos y metodológicos de la enfermería. Se divide, por tanto, en dos secciones: La primera contiene las bases teóricas que contribuyen a definir a la enfermería como ciencia y profesión, a clarificar qué tipo de ciencia es, cuáles son sus características como profesión sanitaria y conocer las bases teóricas y filosóficas en las que se fundamenta la enfermería, así como los principales modelos teóricos que guían la práctica y la investigación en enfermería. La segunda sección se centra en las bases metodológicas de la enfermería, que ayudan al profesional a trabajar y pensar como enfermero o enfermera. Cualquier profesional trabaja siguiendo un método o un proceso bien definido; en el caso de la enfermería recibe el nombre de proceso de atención de enfermería (PAE). En esta sección se describe el PAE, dedicando uno o varios capítulos a cada una de sus etapas, para que el alumno sea capaz de recoger datos relevantes, organizarlos, interpretarlos para elaborar un juicio diagnóstico y terapéutico, ejecutar cuidados, evaluarlos y registrarlos.

Road traffic collisions kill about 1.2 million people around the world every year but they are largely neglected as a health and development issue, perhaps because they are still viewed by many as being beyond human control. Efforts to prevent road traffic injuries are hampered by a lack of human capacity. Policy-makers, researchers and practitioners need information on effective prevention measure and on how to develop, implement and evaluate such interventions. There is a need to train more specialists in road traffic injury prevention in order to address the growing problem of road traffic injuries at international levels.
