Jun 04, 2019 · June 4, 2019. By MR COOL. MR COOL is pleased to announce it will be producing the new line of GeoCool geothermal heat pump products for the US market. Ground-source HVAC equipment can deliver great performance and terrific energy efficiency. For years, GeoCool geothermal has been a cost-leader in the US market.

Benefits of Geothermal. Geothermal heating & cooling is the most economical, clean, non-polluting, proven heating & cooling technology available today. It will save you up to 80% of the cost of heating and cooling compared to a conventional system. For every unit of energy used to operate the system, 3 to 4 units of energy are produced. Install circulating Pump (3.0 – 4.0 gpm) If the water heater is being connected to the unit with an internal desuperheater: Attach the two ½” SWT x 1” MPT copper adapters to the DHW IN and DHW OUT to the swivel connectors on the unit. (If the unit does not include swivel
