The Ivey Casebooks Series is a co-publishing partnership between SAGE Publications and the Richard Ivey School of Business, The University of Western Ontario.

"Will be welcomed by many communities--academic, federal, and industrial. With new and little-known information on high-performance computing, it is the great compendium describing the last seven years of activities and looking to the future."--Charles Bender, Director, The Ohio Supercomputer Center
"A valuable resource and an important contribution to

thinking in this area. . . . I am impressed with the scope and coherence of this material, ranging from technical projections to the political context to market and user perspectives on supercomputers and supercomputing."--James G. Glimm, State University of New York at Stonybrook

The Government is expected to respond to all reports from the Committee, within two months of publication. The Committee then makes them available to the House and publishes them as required. This report makes 35 such responses available.

A number of public enterprise (PE) executives have long felt the need for a book which would provide necessary information and analysis of various dimensions of PE management and privatisation. The book provides at one place, a precise and authoritative account of the concept, policy, and analysis of major issues confronting PEs. Public ownership per se does not make PE performance sub-optimal. The operation of the Government system, of which PE is a sub-system, has not been conducive to performance. During the last six decades, inadequate political will and vested interests have come in the way of freeing PEs from excessive and throttling controls, and demoralising accountability. Not letting the managers manage with the freedom required in the liberalised and globalised set-up is the problem. The multifarious and complex managerial problems of PEs, which get compounded by faltering moves towards privatisation, cannot be wished away. These have been considered in the book at some length. The book, first published in 1980, continues to be a standard work on the subject. This latest edition has been revised by Dr. R.K.Mishra, Director, Institute of Public Enterprise, Hyderabad.

This work examines the impact of macroeconomic conditions on public support for the government in Britain, France,

Netherlands, Denmark and Germany.

One of 8 vols. each covering a different area of the world.

The Mises Institute is thrilled to bring back this popular guide to ridiculous economic policy from the ancient world to modern times. This outstanding history illustrates the utter futility of fighting the market process through legislation. It always uses despotic measures to yield socially catastrophic results. It covers the ancient world, the Roman Republic and Empire, Medieval Europe, the first centuries of the U.S. and Canada, the French Revolution, the 19th century, World Wars I and II, the Nazis, the Soviets, postwar rent control, and the 1970s. It also includes a very helpful conclusion spelling out the theory of wage and price controls. This book is a treasure, and super entertaining!

BPP Learning Media is an ACCA Approved Content Provider. Our partnership with ACCA means that our Study Texts, Practice & Revision Kits and iPass (for CBE papers only) are subject to a thorough ACCA examining team review. Our suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

What part does technological knowledge accumulation play in modern economic growth? This book investigates and examines the predictions of new growth theory, using OECD manufacturing data. Its empirical findings portray a novel and complex picture of the features of long-term growth, where technological knowledge production and diffusion play a central part, alongside variations in capital and employment. A parallel examination of long-run trade patterns and government policy issues completes a broader account of how knowledge-based growth in industrial output is at the heart of modern economic prosperity.

Experts in public relations, marketing, and communications have created the most comprehensive textbook specifically for Canadian students and instructors. Logically organized to

lead students from principles to their application—and generously supplemented with examples and case studies—the book features chapters on theory, history, law, ethics, research methods, planning, writing, marketing, advertising, media, and government relations, as well as digital, internal, and crisis communications. Chapters open with learning objectives and conclude with lists of key terms, review and discussion questions, activities, and recommended resources. *Fundamentals of Public Relations and Marketing Communications in Canada* will be essential in post-secondary classes and will serve as a valuable reference for established professionals and international communicators working in Canada. Contributors: Colin Babiuk, Sandra L. Braun, Wendy Campbell, John E.C. Cooper, Marsha D'Angelo, Ange Frymire Fleming, Mark Hunter LaVigne, Danielle Lemon, Allison G. MacKenzie, Sheridan McVean, Charles Pitts, David Scholz, Jeff Scott, Charmane Sing, Amy Thurlow, Carolyne Van Der Meer, Ashleigh VanHouten, Cynthia Wrate, and Anthony R. Yue. Ayn Rand wrote and lectured on economic concepts and topics. This volume addresses the economic and business aspects of her writings. The authors of this anthology are from a variety of fields and all of them are enthusiastic supporters of her ideas.

This volume offers a comprehensive overview of the many ways in which the policy analysis movement has been conducted, and to what effect, in Canadian governments and, for the first time, in business associations, labour unions, universities, and other non-governmental organizations. The *Congressional Record* is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in

session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

This study fills a gap in standardization literature. It is the first academic analysis of national standardization organizations. These organizations exist in every country and may be private or governmental organizations. The first national standardization organizations were founded in the early decades of the 20 century and were aimed at rationalizing industrial production. Their mode of operation reflects the sense of cooperation at the national level and - in the telecommunications and electrotechnical field - at the international level as well. Now, however, the scene has changed, with companies operating internationally. Standards for products, processes, and services are crucial factors in determining success or failure on a fiercely competitive market, especially when functional compatibility is a prerequisite, as is the case in computer and telecommunications technologies. As a consequence, rather homogeneous needs of participants in standardization have given way to conflicting interests. This prompts a discussion about the traditional role of national standardization organizations. They increasingly depend on their

exclusive links to the international standardization organizations ISO and IEC, and, in the case of Europe, the regional organizations CEN and CENELEC. In many cases, formal standardization organizations are not the obvious bodies for developing standards to meet business needs. Is this inevitable or could they improve performance and regain their market share? Henk de Vries answers this question against the background of current developments in standardization at the international, European, and national levels. The North American Free Trade Agreement (NAFTA) is a milestone in the affairs of the continent and in international trade. The first formal arrangement of any kind between Canada, the United States, and Mexico, it is also the first trade pact including countries of such disproportionate power and levels of development. For Canada and Mexico the agr
