This kit contains all the materials needed to teach one child for an entire year. It contains a teacher's manual, student textbook, and introductory CD. The teacher's manual is the heart of the program at every level. Each lesson in the manual begins with a planning box, which contains lesson objectives. Scripted lessons provide you with the exact words for the Question & Answer Flows, questioning strategies, and the teaching techniques that make this program consistent for all grade levels. The script is especially helpful for parents who are new to homeschooling or are new to Shurley English. The Teacher's Manual is set up in chapters. There are five lessons in each chapter, and each chapter can be finished in one week. Each lesson takes approximately twenty to forty-five minutes to complete. Grammar, language skills, and writing are taught in each chapter. The pages in the student textbook will give your child a visual aid as he or she is learning new skills. Your child can use his or her pages as a reference for information about concepts that have been taught. This will be helpful as your child completes skill tests, application tests, and writing assignments. The introductory CD provides the jingles and the Question & Answer Flows for the Introductory Sentences. It may be used to demonstrate jingles and Question & Answer Flows to children, or it may be used as a resource for the parents. Grade 7.

Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in The Well-Trained Mind to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. The Well-Trained Mind will give you the tools you'll need to teach your child with confidence and success.

The Teacher's Guide includes standards-based lessons, scoring rubrics, examples of corrected practice tests, and complete background information.
