A guide to herbal and holistic medicine for brain health and neurologic disorders • Provides detailed herbal, antioxidant, and nutritional strategies for Alzheimer's, Parkinson's, multiple sclerosis, stroke, migraine, and seizures • Supported by scientific studies and years of successful clinical practice • Discusses potential side effects, counter-indications, and the proper dosages to reduce symptoms, slow disease progression, and lessen the chances of recurrence Numerous medical journals have published studies supporting the use of herbs and nutrients in the treatment of neurodegenerative disorders. Yet in practice most neurologists rarely include them as part of their protocols. In this practical guide, Sidney Kurn, M.D., and Sheryl Shook, Ph.D., explain how to safely and easily incorporate herbs, antioxidants, and nutritional supplements into the standard conventional treatments for 6 common neurologic disorders: Alzheimer's, Parkinson's, multiple sclerosis, stroke, migraine, and seizures. For each condition, the authors provide detailed strategies supported by scientific evidence and years of successful clinical practice. They examine the biochemical role of each recommended herb, nutrient, or antioxidant and discuss potential side effects, counter-indications, and proper dosages to reduce symptoms, slow disease progression, and--in the case of stroke, migraine, and seizures--lessen the chances of recurrence. The authors explore the nutrient deficiencies and physiological mechanisms, including inflammation, heavy metal toxicity, and mitochondrial dysfunction, that can cause oxidative injuries and initiate neurologic disorders. They reveal which common substances, such as aspartame and glutamate, can trigger these mechanisms at the cellular level and recommend specific herbs and antioxidants, such as turmeric, cannabinoids, resveratrol, and N-acetyl cysteine, to counteract their effects. They discuss the importance of sleep to overall well-being, especially for those suffering from neurologic disorders, and offer tips to help ensure a good night's sleep. Integrating neuroscience, biochemistry, herbalism, and decades of clinical experience, the authors lay the scientific foundation for a holistic, naturopathic approach to neurologic disorders and a way to enhance the quality of life for those suffering from these conditions. The use of dietary vegetables and medicinal herbs to improve health is a phenomenon that is taking society by storm. Herbal products are now a multi-billion dollar business. Even more important, this business is built upon extremely little research data. The FDA is pushing the industry—with Congress' help—to base their claims and products on scientific phenomena. Vegetables, Fruits, and Herbs in Health Promotion discusses the most effective ways of conducting research geared toward deriving maximum nutritional benefit from vegetables, fruits, and herbs. The book addresses such questions as:

- o How much vegetables and herbs should be consumed?
- o Can extracts or components be useful replacements for vegetable consumption?
- o Does red wine reduce the risk of heart disease, and if so, what are the active agents and mechanisms?

Increased consumption of vegetables and herbs promotes health, increases longevity, and reduces the risk of cancer and heart disease. Vegetables, Fruits, and Herbs in Health Promotion is an invaluable reference for providing you with the knowledge necessary for fostering positive changes in dietary habits.

Detailed and evidence-based, this comprehensive guide presents interactions between drugs and herbs and selected herbs and nutrients, including foods and dietary factors. The material looks in detail at the mechanisms of interaction and assesses the research available. Extensive references are also provided and key references are thoroughly annotated.

All you need to know about herbs, nutrients, and yoga for enhancing mental health. Many physicians and therapists agree that herbs and mind-body practices enhance health, but many more are reluctant to integrate them into their clinical work because of a lack of training or, given how long it takes to master the use of hundreds of different herbs, a lack of time. But the trend is clear: clients and consumers alike want control over their health care choices, making the time ripe for a practical resource that guides

both the clinician and the consumer on complementary and alternative medicine (CAM). This book answers that call. Three noted experts in integrative medicine, Drs. Brown, Gerbarg, and Muskin, demystify the complexities of alternative mental health care, giving readers a comprehensive yet accessible guidebook to the best treatment options out there. From mood, memory, and anxiety disorders to ADD, sexual enhancement issues, psychotic disorders, and substance abuse, every chapter covers a major diagnostic category. The authors then present a range of complementary and alternative treatments-including the use of herbs, nutrients, vitamins, nootropics, hormones, and mind-body practices- that they have found to be beneficial for various conditions within each category. For example, B complex vitamins and folate have been shown to help with depression; omega-3 fatty acids can offer relief for bipolar sufferers; coherent and resonant breathing techniques-used by Buddhist monks-induce healthy alpha rhythms in the brain to relieve anxiety; the elderly can boost their memory by taking the ancient medicinal herb *Rhodiola rosea*; and those with chronic fatigue syndrome can find comfort in acupuncture and yoga. Focusing on evidence-based approaches, the research, the authors' clinical experience, and the potential risks and benefits of each treatment are carefully examined. Brown, Gerbarg, and Muskin have distilled an otherwise daunting field of treatment down to its basics: their overriding approach is to present the CAM methods that are most practical in a clinical setting, easy to administer, and low in side effects. With helpful summary tables at the end of each chapter, clinical pearls, and case vignettes interspersed throughout, this is a must-have resource for all clinicians and consumers who want the best that alternative medicine has to offer.
