classes in a brick-and-mortar school for some part of the week and homeschool for the rest of the week. Some do two days at home and three days at school, others the inverse, and still others split between four days at home or school and one day at the other. This book dives deep into hybrid homeschooling. It describes the history of hybrid homeschooling, the different types of hybrid homeschools operating around the country, and the policies that can both promote and thwart it. At the heart of the book are the stories of hybrid homeschoolers themselves. Based on numerous in-depth interviews, the book tells the story of hybrid homeschooling from both the family and educator perspective.

This invaluable guide will prove to you that the biggest secret to a successful homeschool is motivation. Because when you choose how to homeschool, there is an elephant in the room. And that's you. You are the parent. But now you are the teacher too. That is potentially an enormous problem on the motivation front. Picture this: What happens when you end up in lots of battles with the kids? The kids aren't interested. They don't want to learn. You are tearing your hair out. This is their future ...Can't they realize that? What if they don't get any exams or qualifications? They will have failed. And you will have failed too. This guide shows you exactly what things you can do in your homeschool to get your kids happy and enthusiastic - and what not to do. Dealing with common homeschool problems like this plea: "Desperate for enlightenment. My kid refuses to do

any work" , the book contains indispensable homeschooling help for all homeschoolers, old and new alike. And, since giving your child the best start in life is something we all have in common, you will find the advice here applies worldwide whether you call it homeschooling or, as in the UK, home education. Based on unique experience from one of the few second generation homeschool families and suggestions from more than 8,500 Facebook fans, *Secrets of Success* will show you: What makes a good homeschool teacher Practical steps to keep your kids motivated and in love with learning How to make a homeschool schedule which works for all of you How to deal with the potential nightmare of homeschooling high school and the responsibility of motivating kids through exams At all times practical, this upbeat guide is essential reading whatever homeschooling method you follow. Whether you stick to a strict schedule with clear academic targets, decide on relaxed homeschooling, or let your child lead the way and unschool, this guide will teach you the essential steps to success using real-life insights from homeschoolers who have 'been there and done that.' With a homeschool son now going to Oxford University and a daughter following an unschooling route as a talented artist, the author argues that most parents misunderstand what makes young people motivated. This problem becomes particularly acute when it comes to homeschooling high school and the responsibility for getting your children through exams. Getting your unmotivated teen on-side is something all parents struggle with. Learning to trust your child and accept

THE COLFAXES DIDN'T START TEACHING THEIR BOYS AT HOME TO GET THEM INTO HARVARD - BUT THAT'S WHAT HOMESCHOOLING ACCOMPLISHED! For over fifteen years, David and Micki Colfax educated their children at home. They don't think of themselves as pioneers, though that's what they became. Unhappy with the public schools, the Colfaxes wanted the best education possible for their four sons: a program for learning that met the evolving needs of each child and gave them complete control of how and what their children learned. The results? A prescription for excellence-Harvard educations for their sons Grant, Drew, and Reed. (Their fourth son is still too young for college.) Now the Colfaxes tell how all parents can become involved in homeschooling. In a straight-talking book that reads like a frank conversation among friends, they tell what they did and how they did it: their educational approaches, the lessons they learned, and what materials-books, equipment, educational aids-proved most useful over the years. Best of all, they show you how you can take charge of your children's education-in an invaluable sourcebook that will help you find a rewarding and successful alternative to our failing schools. For readers of *Democracy in Chains* and *Dark Money*, a revelatory investigation of the Religious Right's rise to political power. For too long the Religious Right has masqueraded as a social movement preoccupied with a number of cultural issues, such as abortion and same-sex marriage. But in her deeply reported investigation, Katherine Stewart reveals a disturbing truth: America's Religious Right has evolved into a Christian nationalist movement. It seeks to gain political

power and to impose its vision on all of society. It isn't fighting a culture war, it is waging a political war on the norms and institutions of American democracy. Stewart shows that the real power of the movement lies in a dense network of think tanks, advocacy groups, and pastoral organizations, embedded in a rapidly expanding community of international alliances with likeminded, anti-democratic religious nationalists around the world, including Russia. She follows the money behind the movement and traces much of it to a group of super-wealthy, ultraconservative donors and family foundations. The Christian nationalist movement is far more organized and better funded than most people realize. It seeks to control all aspects of government and society. Its successes have been stunning, and its influence now extends to every aspect of American life, from the White House to state capitols, from our schools to our hospitals. *The Power Worshippers* is a brilliantly reported book of warning and a wake-up call. Stewart's probing examination demands that Christian nationalism be taken seriously as a significant threat to the American republic and our democratic freedoms. Education began on the most intimate levels: the family and the community. With industrialization, education became professionalized and bureaucratized, typically conducted in schools rather than homes. Over the past half century, however, schooling has increasingly returned home, both in the United States and across the globe. This reflects several trends, including greater affluence and smaller family size leading parents to focus more on child well-being; declining faith in professionals (including educators); and the Internet, whose resources facilitate home education. In the United States, students who are homeschooled for at least part of their childhood outnumber those in charter schools. Yet remarkably little research addresses homeschooling. This book brings together work from 20 researchers, addressing a

range of homeschooling topics, including the evolving legal and institutional frameworks behind home education; why some parents make this choice; home education educational environments; special education; and outcomes regarding both academic achievement and political tolerance. In short, this book offers the most up-to-date research to guide policy makers and home educators, a matter of great importance given the agenda of the current presidential administration. The chapters in this book were originally published as articles in the Journal of School Choice.

Homeschool leader Christopher Klicka documents the modern history of the homeschool resurgence in America, profiling the legal issues as well as the tireless champions of this education movement.

A joyful and accessible approach to homeschooling that harnesses children's natural curiosity and makes learning a part of everyday life, whether they're in elementary or high school. Parents who are deeply invested in their children's education can be hard on themselves and their kids. When exhausted parents are living the day-to-day grind, it can seem impossible to muster enough energy to make learning fun or interesting. How do parents nurture a love of learning amid childhood chaos, parental self-doubt, the flu, and state academic standards? In this book, Julie Bogart distills decades of experience--homeschooling her five now grown children, developing curricula, and training homeschooling families around the world--to show parents how to make education an exciting, even enchanting, experience for their kids, whether they're in elementary or high school. Enchantment is about ease, not striving. Bogart shows parents how to make room for surprise, mystery, risk, and adventure in their family's routine, so they can create an environment that naturally moves learning forward. If a child wants to pick up a new hobby or explore a subject area that the parent knows little about, it's easy to simply say "no" to end the discussion and the parental discomfort, while dousing their child's curious spark. Bogart gently invites parents to model brave learning for their kids so they, too, can approach life with curiosity, joy, and the courage to take

learning risks.

Education has become synonymous with schooling, but it doesn't have to be. As schooling becomes increasingly standardized and test driven, occupying more of childhood than ever before, parents and educators are questioning the role of schooling in society. Many are now exploring and creating alternatives. In a compelling narrative that introduces historical and contemporary research on self-directed education, *Unschooling* also spotlights how a diverse group of individuals and organizations are evolving an old schooling model of education. These innovators challenge the myth that children need to be taught in order to learn. They are parents who saw firsthand how schooling can dull children's natural curiosity and exuberance and others who decided early on to enable their children to learn without school. Educators who left public school classrooms discuss launching self-directed learning

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Look for Brené Brown's new podcast, *Dare to Lead*, as well as her ongoing podcast *Unlocking Us*! **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG** Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we

lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that
