While architecture and filmmaking have clearly distinct disciplinary outputs and filmmaking is a much younger art than architecture, the intersection between them is less defined. This book investigates the ways in which architectural researchers, teachers of architecture, their students and practising architects, filmmakers and artists are using filmmaking uniquely in their practice.

This is the first full-length study of how contemporary entertainment technologies and media—from cable television and VHS to DVD and the Internet—shape our encounters with the movies and affect the aesthetic, cultural, and ideological definitions of cinema. Barbara Klinger explores topics such as home theater, film collecting, classic Hollywood movie reruns, repeat viewings, and Internet film parodies, providing a multifaceted view of the presentation and reception of films in U.S. households.
