Some academic books for the hospitality industry do exist; however, as the term "hospitality industry" refers to lodging, food & beverage, event planning, transportation, and recreation, the industry is already complex on its own. It explains why such books do not conveniently cater to a hotel's needs. Moreover, these books dedicate many pages to corporate financing, which has little or nothing to do with the property level. Although there are some ground rules within the hospitality industry, the hotel has its unique accounting procedures and techniques, and this is when this book plays a main role. With over twenty years of valuable experience with the best international hotel operators in six countries, the author shares the essential and practical knowledge and guidelines to build a strong Finance Division in hotels. Therefore, this book perfectly caters to all financial professionals, from the start of their careers to becoming finance leaders. The contents of this book are certainly comprehensive and thorough - highly relevant and easy to understand. This makes it suitable for financial professionals, stakeholders including division heads, general managers, auditors, owners, and owner's representatives. All will greatly benefit from it. needed information to understand the hotel finance functions and to build a strong finance division:

Part Seven: Budgeting and Forecasting  
Part Eight: Cash Management  
Part Nine: Hotel Investments  
Part Ten: Hotel Management Software
