Life is not what you get out of it . . . it's what you put back in. Yet our current means for summarizing life's work, from resumes to salaries, are devoid of what matters most. This is why the work we do is often bad for our wellbeing, when it should be making us happier and healthier. What are the most meaningful contributions we can make? This is Life's Great Question. Life is about what you do that improves the world around you. It is about investing in the development of other people. And it is about efforts that will continue to grow when you are gone. Life's Great Question will show you how to make your work and life more meaningful, and greatly boost your wellbeing. In this remarkably quick read, author Tom Rath describes how finding your greatest contribution is far more effective than following talent or passion alone. More than a book, each copy includes a code for an online program that identifies the most significant contributions you can make. This deeply practical book will alter how you look at your work and change the way you live each day.

Thinkers50 Management Thinker of 2015 Whitney Johnson wants you to consider this simple, yet powerful, idea: disruptive companies and ideas upend markets by doing something truly different--they see a need, an empty space waiting to be filled, and they dare to create something for which a market may not yet exist. As president and cofounder of Rose Park Advisors' Disruptive Innovation Fund with Clayton Christensen, Johnson used the theory of disruptive innovation to invest in publicly traded stocks and private early-stage companies. In *Disrupt Yourself*, she helps you understand how the frameworks of disruptive innovation can apply to your particular path, whether you are: a self-starter ready to make a disruptive pivot in your business a high-potential individual charting your career trajectory a manager looking to instill innovative thinking amongst your team a leader facing industry changes that make for an uncertain future We are living in an era of accelerating disruption; no one is immune. Johnson makes the compelling case that managing the S-curve waves of learning and mastery is a requisite skill for the future. If you want to be successful in unexpected ways, follow your own disruptive path. Dare to innovate. Do something astonishing. Disrupt yourself.
