When global pop star Kelly Rowland became a mom for the first time, giving birth to her son Titan, she felt the most incredible love she had ever experienced. But after spending nine months so focused on the baby growing inside her, she was caught completely off guard by how much she had changed. Like many first-time moms, she was not ready for what had happened to her body and for so many overwhelming new thoughts and emotions. She wondered: Will I Ever Walk Again? Will I Ever Sleep Again? Are My Boobs Always Going to Be Like This? Rowland had questions about everything from postpartum bleeding, skin and hair changes, and dealing with aches and pains to getting back in shape and sex after baby. She also weighed the larger notions about what she wanted out of motherhood and the rest of her life. It was a good thing that Rowland's longtime OB/GYN Dr. Tristan Emily Bickman was right there to answer every single crazy question that popped into her head. Nothing fazed Dr. Bickman and she provided Rowland with the answers she so desperately needed, telling her over and over that, in the months after a woman gives birth, nothing is exactly strange, but nothing is necessarily normal either. It's all just part of the "miracle" of birth. In *Whoa, Baby!* Rowland and Dr. Bickman team up to share this reassuring information with new moms everywhere. Often hilarious and always down-to-earth, Rowland and Dr. Bickman cover every surprising challenge that new moms face. It's the only book you'll need in your baby's first year. Packed with practical advice, *Baby on Board* is a must-read for all mums and dads. Babies have basic biological needs, which parents must meet. 'Baby on Board' outlines these needs clearly and explains the biological science underpinning them. This wonderful book gives parents the confidence they need to derive for themselves how to parent their baby successfully. It helps them navigate the endless advice directed their way by well-meaning family, friends, and passers-by. One issue that causes parents the most anguish - how to settle their distressed and crying baby - is explored in detail. Written in an accessible and frequently humorous way, Dr Chilton explains the fundamentals of parenting based on science and his forty years' experience as a neonatologist. He also explores the fascinating subject of how babies evolved over the millennia, what they perceive and how they are programmed for survival. This expanded edition has new chapters on the introduction of solids, how to play with your baby, and the essential drivers of baby sleep and how to enhance them. Many other chapters have been revised and updated. Dr Chilton's daughter, Georgina Dowden, with whom he collaborates professionally, has extensively rewritten the breastfeeding chapter. She has also contributed many useful additions, with her influence evident throughout the book.

Now every night I'm getting more sleep than I've gotten in years! 'Beautiful, evocative, authoritative.' Professor Brian Cox 'Important reading not just for anyone interested in these ancient cousins of ours, but also for anyone interested in humanity.' Yuval Noah Harari Kindred is the definitive guide to the Neanderthals. Since their discovery more than 160 years ago, Neanderthals have metamorphosed from the losers of the human family tree to A-list hominins. Rebecca Wragg Sykes uses her experience at the cutting-edge of Palaeolithic research to share our new understanding of Neanderthals, shoving aside clichés of rag-clad brutes in an icy wasteland. She reveals them to be curious, clever connoisseurs of their world, technologically inventive and ecologically adaptable. Above all, they were successful survivors for more than 300,000 years, during times of massive climatic upheaval. Much of what defines us was also in Neanderthals, and their DNA is still inside us. Planning, co-operation, altruism, craftsmanship, aesthetic sense, imagination, perhaps even a desire for transcendence beyond mortality. Kindred does for Neanderthals what Sapiens did for us, revealing a deeper, more nuanced story where humanity itself is our ancient, shared inheritance.
