The two-volume set IFIP AICT 419 and 420 constitutes the refereed post-conference proceedings of the 7th IFIP TC 5, WG 5.14 International Conference on Computer and Computing Technologies in Agriculture, CCTA 2013, held in Beijing, China, in September 2013. The 115 revised papers presented were carefully selected from numerous submissions. They cover a wide range of interesting theories and applications of information technology in agriculture, including Internet of things and cloud computing; simulation models and decision-support systems for agricultural production; smart sensor, monitoring, and control technology; traceability and e-commerce technology; computer vision, computer graphics, and virtual reality; the application of information and communication technology in agriculture; and universal information service technology and service systems development in rural areas.

MAXON CINEMA 4D R20 Studio: A Tutorial Approach is a tutorial-based book and aims at harnessing the power of MAXON CINEMA 4D R20 Studio software for modelers, animators, and designers. The book caters to the needs of both the novice and the advance users of MAXON CINEMA 4D R20 Studio. Keeping in view the varied requirements of users, the book first introduces the basic features of CINEMA 4D R20 Studio And then progresses to cover the advanced techniques. In this book, two projects based on the tools and concepts covered in the book have been added to enhance the knowledge of users. This book will help you unleash your creativity and transform your imagination into reality with ease. Salient Features: Consists of 13 Chapters and 2 Projects that are organized in a pedagogical sequence covering various aspects of modeling, sculpting texturing, lighting, rendering, and animation. The author has

followed the tutorial approach to explain various concepts of modeling, texturing, lighting, and animation. The first page of every chapter summarizes the topics that are covered in it. Additional information is provided throughout the book in the form of notes and tips. Self-Evaluation Test and Review Questions are given at the end of each chapter so that the users can assess their knowledge. Table of Contents Chapter 1: Exploring CINEMA 4D R20 Studio Interface Chapter 2: Working with Splines Chapter 3: Introduction to Polygon Modeling Chapter 4: Sculpting Chapter 5: Texturing Chapter 6: Lighting Chapter 7: Rigging Chapter 8: Animation Chapter 9: Introduction to UV Mapping Chapter 10: Compositing 3D objects Chapter 11: Rendering Chapter 12: MoGraph Chapter 13: Working with XPresso Project 1: Creating an Indoor Scene Project 2: Texturing an Indoor Scene Index

This publication provides an unparalleled comparative analysis of two "hot topics" in the field of antitrust and unfair competition laws with regard to a number of key countries. The first part of the book examines whether small and middle-sized businesses could or should be subject to specific competition rules. These businesses account for 99% of the enterprises in Europe and the United States, making this a particularly important topic. The papers consider both the public and private enforcement rules across a range of jurisdictions and a detailed international report, prepared by Michele Carpagnano, identifies general trends and highlights differences and the most interesting features of national regulations. The second part of the book gathers contributions from various jurisdictions on the unfair competition question of whether a company could or should be protected against the use of their trademark, distinctive signs and other components of their image and identity on the part of non-competing companies. The papers focus on the fundamental issue of the competitive relationship as a condition of

protection under unfair competition acts and the connection to intellectual property protection. The comprehensive and insightful international report, prepared by Martine Karsenty-Ricard, brings together these reflections by comparing various national positions. The book also includes the resolutions passed by the General Assembly of the LIDC following a debate on each of these topics, which include proposed solutions and recommendations. The International League of Competition Law (LIDC) is a long-standing international association that focuses on the interface between competition law and intellectual property law, including unfair competition issues.

Corporate Communication, 6th Edition shows readers the importance of creating a coordinated corporate communication system, and describes how organizations benefit from important strategies and tools to stay ahead of the competition. Throughout the book, cases and examples of company situations relate to the chapter material. These cases provide readers with the opportunity to participate in real decisions that managers had to make on a variety of real problems.

Present Your Research to the World! The World Congress 2009 on Medical Physics and Biomedical Engineering – the triennial scientific meeting of the IUPESM - is the world's leading forum for presenting the results of current scientific work in health-related physics and technologies to an international audience. With more than 2,800 presentations it will be the biggest conference in the fields of Medical Physics and Biomedical Engineering in 2009! Medical physics, biomedical engineering and bioengineering have been driving forces of innovation and progress in medicine and healthcare over the past two decades. As new key technologies arise with significant potential to open new options in diagnostics and

therapeutics, it is a multidisciplinary task to evaluate their benefit for medicine and healthcare with respect to the quality of performance and therapeutic output. Covering key aspects such as information and communication technologies, micro- and nanosystems, optics and biotechnology, the congress will serve as an inter- and multidisciplinary platform that brings together people from basic research, R&D, industry and medical application to discuss these issues. As a major event for science, medicine and technology the congress provides a comprehensive overview and in-depth, first-hand information on new developments, advanced technologies and current and future applications. With this Final Program we would like to give you an overview of the dimension of the congress and invite you to join us in Munich! Olaf Dössel Congress President Wolfgang C.

This book provides a brief overview of noninvasive vascular tests used to diagnose and quantify vascular problems. Also, it reports on tests concerning prevention and screening. volume includes Book 1, *Revenge of the Witch*, and Book 2, *Curse of the Bane*, of the *Last Apprentice* series. Only the Spook has the knowledge and skill to face ghosts, bind witches, and bargain with boggarts. Now he needs an apprentice—Tom Ward, who is the seventh son of a seventh son. Other apprentices have come before. All have failed, or fled, or died. Will Tom learn what they could not? Can he trust anyone, even his one true love? He will find out—and soon, for the dark is getting powerful, and the Spook's time has come. Will Tom survive to carry on his master's battle? Will he be the Last Apprentice? Soon to be a major motion picture, *Seventh Son*, starring Jeff Bridges, Ben Barnes, Alicia Vikander, Kit Harington, Olivia Williams, Antje Traue, Djimon Hounsou and Julianne Moore as Mother Malkin. The *Last Apprentice* series is "tantalizingly creepy" (*Publishers Weekly*), and "anything but tame" (*Horn Book*). But don't read it after dark!

This thorough revision of Babbie's standard-setting text presents a succinct, straightforward introduction to the field of research methods as practiced by social scientists. Contemporary examples, such as terrorism, Alzheimer's disease, anti-gay prejudice and education, and the legalization of marijuana, introduce students to the how-tos and whys of social research methods. Updated with new data, expanded coverage of online research and other topics, and new Learning Objectives for each chapter to focus students' attention on important concepts, this edition continues to be authoritative yet student-friendly and engaging as it helps students connect the dots between the world of social research and the real world. This well illustrated, full-color, site-by-site survey of prehistory captures the popular interest, excitement, and visual splendor of archaeology as it provides insight into the research, interpretations, and theoretical themes in the field. The new edition maintains the authors' innovative solutions to two central problems of the course: first, the text continues to focus on about 80 sites, giving students less encyclopedic detail but essential coverage of the discoveries that have produced the major insights into prehistory; second, it continues to be organized into essays on sites and concepts, allowing professors complete flexibility in organizing their courses..

This volume provides a timely and useful introduction to the theory and practical application of image analysis in histology. This powerful research technique can be used to detect not only stored products in a cell (immunocytochemistry) but the synthetic machinery and the genes that control it (in situ hybridisation), as well as the specific binding sites that act as receptors for a molecule following its release (in vitro autoradiography). The book provides a good introduction for beginners before looking in greater detail at more advanced material in selected areas. The volume highlights the importance of technique in gathering quantitative information. The book is divided into four sections: introductory material, image acquisition, image processing, and applications. The applications areas include quantitative

immunochemistry, quantification of nerves and neurotransmitters and automated grain counting in in situ hybridisation histochemistry.

This volume covers the fundamental theory of Cellular Neural Networks as well as their applications in various fields such as science and technology. It contains all 83 papers of the 7th International Workshop on Cellular Neural Networks and their Applications. The workshop follows a biennial series of six workshops consecutively hosted in Budapest (1990), Munich, Rome, Seville, London and Catania (2000).

Presents basic concepts in physics, covering topics such as kinematics, Newton's laws of motion, gravitation, fluids, sound, heat, thermodynamics, magnetism, nuclear physics, and more, examples, practice questions and problems.

This book constitutes selected and revised papers from the 7th International Conference Logistics and Supply Chain Management, held in December 2020 in Tehran, Iran. Due to the COVID-19 pandemic the conference was held online.

This volume publishes the proceedings of the WACBE World Congress on Bioengineering 2015 (WACBE 2015), which was held in Singapore, from 6 to 8 July 2015. The World Association for Chinese Biomedical Engineers (WACBE) organizes this World Congress biannually. Our past congresses have brought together many biomedical engineers from over the world to share their experiences and views on the future development of biomedical engineering. The 7th WACBE World Congress on Bioengineering 2015 in Singapore continued to offer such a networking platform for all biomedical engineers. Hosted by the Biomedical Engineering Society (Singapore) and the Department of Biomedical Engineering, National University of Singapore, the congress covered all related areas in bioengineering.

The MCPC 2014 is a multi-track conference featuring a combination of high profile keynotes with expert talks, panel discussions, paper sessions, workshops, receptions, and much more. While it is devoted to sharing and discussing the latest research in the field, the MCPC conference has a strong focus on real life applications. Since its beginning, the MCPC conference has had an equal share of participants, practitioners and academics/researchers. This makes the MCPC conference truly unique among many conferences. It strives to connect MCPC

thinkers, first movers, entrepreneurs, technology developers, and researchers with people applying these strategies in practice. Twenty years ago Mass Customization was acknowledged as the "New Frontier in Business Competition". Ever since, industry has been applying the concept and researchers have developed the topic into a well-established research area and businesses have formed new strategies. More knowledge, methods and technologies are available now than ever before. Along with general Mass Customization topics, this conference addresses Mass Customization from a historical perspective, looking at both mass customization in the past 20 years and towards the new frontiers in the 20 years to come. This book presents the latest research from the worldwide MCPC community bringing together the new thoughts and results from various disciplines within the field.
