It is a wild race against time as Lieutenant Lindsay Boxer and the newest member of the Women's Murder Club, attorney Yuki Castellano, lead an investigation into a string of mysterious patient deaths—and reveal a hospital administration determined to shield its reputation at all costs. After witnessing the murder of his wife at the hands of a demon, patriarch John Winchester begins a journey into the dark world of the supernatural, seeking a way to hunt down and kill the creature that took Mary. But what of his two sons - can a newly widowed father balance fighting evil and raising his children?

Twenty-two years ago, Sam and Dean Winchester lost their mother to a mysterious and demonic supernatural force. In the years after, their father, John, taught them about the paranormal evil that lives in the dark corners and on the back roads of America...and he taught them how to kill it. Sam and Dean have set out on a road trip to the Grand Canyon, but this is no vacation for the brothers. On a stretch of deserted ranchland just beyond the canyon's stunning vistas, mysterious murder sprees have occurred every forty years. The area's inhabitants have been few and far between in years past, but a nearby mega-mall is about to celebrate its grand opening—and attract thousands of fresh victims. The Winchester boys are determined to protect locals and shoppers alike, but they never anticipated they'd be fighting a group of killers this vicious, this vindictive, this . . . dead. A deadly horde of animal spirits and human ghosts has arisen to terrorize this tiny corner of the Arizona desert. If Sam and Dean can't figure out why, the wide-open spaces of the West will once again become a desolate frontier . . . and the witch's canyon will be the brothers' final resting place.

How a Show, and the Support of Its Fandom, Changed—and Saved—Lives Supernatural, a three-time People's Choice Award winner for Favorite Sci-Fi/Fantasy TV Show and Tumblr's 2015 Most Reblogged "Live Action TV," has made a name for itself by supporting and encouraging its fans to "always keep fighting," and a memorable line from early in the show's run, "Family don't end with blood," became an inspiring mantra for many who found community in the fandom. In 25 powerful chapters written by Supernatural's actors and fans, including series lead Jared Padalecki, plus special messages from Jensen Ackles, Misha Collins, and Mark Sheppard, *Family Don't End with Blood: Cast and Fans On How Supernatural Has Changed Lives* examines the far reach of the show's impact for more than a decade. Supernatural has inspired fans to change their lives, from getting "sober for Sam" to escaping a cult to pursuing life-long dreams. But fans aren't the only ones who have been changed. The actors who bring the show to life have also found, in the show and its community, inspiration, courage, and the strength to keep going when life seemed too hard. Including essays and special messages from Supernatural's

cast: • Jared Padelecki ("Sam Winchester") • Jensen Ackles ("Dean Winchester") • Misha Collins ("Castiel") • Mark Sheppard ("Crowley") • Jim Beaver ("Bobby Singer") • Ruth Connell ("Rowena MacLeod") • Osric Chau ("Kevin Tran") • Rob Benedict ("Chuck Shurley aka God") • Kim Rhodes ("Sheriff Jody Mills") • Briana Buckmaster ("Sheriff Donna Hanscum") • Matt Cohen ("Young John Winchester") • Gil McKinney ("Henry Winchester") • Rachel Miner ("Meg Masters") Collected and edited by Lynn S. Zubernis, a clinical psychologist, professor, and passionate Supernatural fangirl, *Family Don't End with Blood* provides an insightful and often uplifting look into the way international fan communities become powerful, positive forces in the lives of so many. In keeping with the show's message to "always keep fighting," a portion of the proceeds from the book will be donated to RANDOM ACTS, a nonprofit founded by Misha Collins, and AT TITUDES IN REVERSE, whose mission is to educate young people about mental health and suicide prevention.

When a gruesome murder takes place in Braden Heights, Indiana, the local authorities suspect the disemboweled and eyeless corpse is the result of an animal attack. But when another body is discovered, the eyes gouged out, Sam, Dean and Castiel start looking for connections between the victims—and discover both men were soon-to-be fathers. As the boys hunt the killer, they unearth the town's troubled past, and secrets some would prefer stay buried forever. A brand-new Supernatural novel, set during season 10, that reveals a previously unseen adventure for the Winchester brothers, from the hit CW series!

WINNER: The 2018 McGannon Center Book Prize and shortlisted for the Goddard Riverside Stephan Russo Book Prize for Social Justice The New York Times Book Review: "Riveting." Naomi Klein: "This book is downright scary." Ethan Zuckerman, MIT: "Should be required reading." Dorothy Roberts, author of *Killing the Black Body*: "A must-read." Astra Taylor, author of *The People's Platform*: "The single most important book about technology you will read this year." Cory Doctorow: "Indispensable." A powerful investigative look at data-based discrimination—and how technology affects civil and human rights and economic equity The State of Indiana denies one million applications for healthcare, foodstamps and cash benefits in three years—because a new computer system interprets any mistake as “failure to cooperate.” In Los Angeles, an algorithm calculates the comparative vulnerability of tens of thousands of homeless people in order to prioritize them for an inadequate pool of housing resources. In Pittsburgh, a child welfare agency uses a statistical model to try to predict which children might be future victims of abuse or neglect. Since the dawn of the digital age, decision-making in finance, employment, politics, health and human services has undergone revolutionary change. Today, automated systems—rather than humans—control which neighborhoods get policed, which families attain needed resources, and who is investigated for fraud. While we all live under this new regime of data, the most invasive and punitive systems are aimed at the poor. In *Automating Inequality*, Virginia Eubanks systematically investigates the impacts of data mining, policy algorithms, and predictive risk models on poor and working-class people in America. The book is full of heart-wrenching and eye-opening stories, from a woman in Indiana whose benefits are literally cut off as she lays dying to a family in Pennsylvania in daily fear of losing their daughter because they fit a certain statistical profile. The U.S. has always used its most cutting-edge science and technology to contain, investigate, discipline and punish the destitute. Like the county poorhouse and scientific charity before them, digital tracking and automated decision-making hide poverty from the middle-class public and give the nation the ethical distance it needs to make inhumane choices: which families get food and which starve, who has housing and who remains homeless, and which families are broken up by the state. In the process, they weaken democracy and betray our most cherished national values. This deeply researched and passionate book could not be more timely.

Sam and Dean Winchester know all the secrets their father recorded in his journal. Now you can, too. On November 2, 1983, Sam and Dean Winchester lost their mother to a demonic supernatural force. In the wake of the tragedy, their father, John, set out to learn everything he could about the paranormal evil that lives in the dark corners and on the back roads of America . . . and how to kill it. In his personal journal, he not only compiled folklore, legend, and superstition about all manner of otherworldly enemies but he also recorded his experiences—hunting the creature that killed his wife even as he raised his two sons. Part prequel, part resource guide, *John Winchester's Journal* finally gives fans the ultimate companion book for Supernatural. It's all here: the exorcism Sam and Dean used in "Phantom Traveler," John's notes on everything from shape-shifters to Samuel Colt, Dean's first hunt, Sam's peewee soccer team . . . and John's single-minded pursuit of a growing and deadly evil.

Twenty-three years ago, Sam and Dean Winchester lost their mother to a demonic supernatural force. Following the tragedy, their father, John, set out to teach his boys everything about the paranormal evil that lives in the dark corners and on the back roads of America . . . and how to kill it. Fans of the blockbuster television phenomenon can rejoice! A one-of-a-kind compilation of all of Sam and Dean's demon-busting knowledge, *The Supernatural Book of Monsters, Spirits, Demons, and Ghouls* contains illustrations and detailed descriptions that catalogue the more than two dozen otherworldly enemies that most people believe exist only in folklore, superstition, and nightmares: vampires, ghosts, revenants, reapers, and even bloody clowns. You'll find within these pages Sam and Dean's notes, observations, and memories interwoven with sections of John Winchester's invaluable journal, making this book the perfect companion to every thrilling episode—and an essential weapon in the secret war against the hidden creatures of the darkness!

The story says that one day a Fisher King will rise to heal the land. In the 1950s, they're still waiting. . . . "A captivating historical thriller, a great spine-tingling romp through history in search of the Holy Grail. Fans of *The Da Vinci Code* will love this!"—Kevin Baker, author of *Dreamland* and *Paradise Alley* At the turn of the twentieth century, a baseball player named George Gibson embarks upon a mystical journey to the Congo. His mission: to shepherd a powerful relic to its home in Abyssinia. But poet-turned-grail seeker Arthur Rimbaud is after what Gibson possesses—as others before him have been for millennia. A half century later, after receiving an honorable discharge from the Korean War, twenty-year-old Lance Porter vows to put his civilian life back together—which means heading to commie-infested Berkeley to see his high school sweetheart, Ellie. But after Lance gets cold feet, he encounters instead a drunk, gay poet named Jack Spicer, who spews crazy stories about Lance being the Fisher King. It appears that the bearing of the grail has been bequeathed to young Lance, much to his shock and disbelief. Can a legacy born in the deserts of Ethiopia truly be reemerging in the bohemian bars of New York City and San Francisco? And is a vet with a lost soul really worthy of its care? Alexander C. Irvine has breathed a refreshing burst of air into the Arthurian legend. In *One King, One Soldier*, ancient characters and Irvine's pitch-perfect historical accuracy merge with a gritty, dark portrait of America in the cold-war '50s. Here, three stories come brilliantly together in an edgy mix of baseball, imperialism, poetry, and grail mythology.

Not near as many as there need to be. I've learned everything I can about every damned critter that

My last will and testament. Ya idjits.

Marie Brennan begins a thrilling new fantasy series in A Natural History of Dragons, combining adventure with the inquisitive spirit of the Victorian Age. You, dear reader, continue at your own risk. It is not for the faint of heart—no more so than the study of dragons itself. But such study offers rewards beyond compare: to stand in a dragon's presence, even for the briefest of moments—even at the risk of one's life—is a delight that, once experienced, can never be forgotten. . . . All the world, from Scirland to the farthest reaches of Eriga, know Isabella, Lady Trent, to be the world's preeminent dragon naturalist. She is the remarkable woman who brought the study of dragons out of the misty shadows of myth and misunderstanding into the clear light of modern science. But before she became the illustrious figure we know today, there was a bookish young woman whose passion for learning, natural history, and, yes, dragons defied the stifling conventions of her day. Here at last, in her own words, is the true story of a pioneering spirit who risked her reputation, her prospects, and her fragile flesh and bone to satisfy her scientific curiosity; of how she sought true love and happiness despite her lamentable eccentricities; and of her thrilling expedition to the perilous mountains of Vystrana, where she made the first of many historic discoveries that would change the world forever. In 480 BC, Xerxes, the King of Persia, led an invasion of mainland Greece. Its success should have been a formality. For seventy years, victory - rapid, spectacular victory - had seemed the birthright of the Persian Empire. In the space of a single generation, they had swept across the Near East, shattering ancient kingdoms, storming famous cities, putting together an empire which stretched from India to the shores of the Aegean. As a result of those conquests, Xerxes ruled as the most powerful man on the planet. Yet somehow, astonishingly, against the largest expeditionary force ever assembled, the Greeks of the mainland managed to hold out. The Persians were turned back. Greece remained free. Had the Greeks been defeated at Salamis, not only would the West have lost its first struggle for independence and survival, but it is unlikely that there would ever have been such an entity as the West at all. Tom Holland's brilliant new book describes the very first 'clash of Empires' between East and West. Once again he has found extraordinary parallels between the ancient world and our own. There is no competing popular book describing these events.

From award-winning author Alexander C. Irvine comes a compelling, fantastical riff on history and World War II. Spared fighting in Europe because of a bum hand, Jared wishes he could join the cause, instead of mindlessly sifting clay to be made into golems. But there is something that preys on his dreams: the devilish dwarf known as the Nain Rouge. In his youth, Jared once actually saw the Dwarf—a chilling creature that shows itself to individuals just before their demise. Now the Nain Rouge appears to be coming back for Jared himself. Many have a profound interest in Jared's childhood run-in with the Dwarf—including a German spy, Jared's hateful foreman at the golem factory, and a shape-shifting Indian shaman. But what could a simple man who earns a meager living possibly have to do with espionage and dark deeds? While Jared toils invisibly in the bowels of Henry Ford's plant, the answer is about to reveal itself in a cataclysm of mythic and sinister proportions.
