Monograph covering the career of artist Rex Ray

These posters were designed for other federal agencies, and as travel posters, education and civic activity posters, health and safety posters, and propaganda posters for World War II.

A deep dive into the ubiquitous world of artist Sam Ryser, a pillar in the the underground NYC punk scene.

Medical centers are widely recognized as vital components of the healthcare system. However, academic medical centers are differentiated from their community counterparts by their mission, which typically focuses on clinical care, education, and research. Nonetheless, community clinics/hospitals fill a critical need and play a complementary role serving as the primary sites for health care in most communities. Furthermore, it is now increasingly recognized that in addition to physicians, physician-scientists, and other healthcare-related professionals, basic research scientists also contribute significantly to the emerging inter- and cross-disciplinary, team-oriented culture of translational science. Therefore, approaches that combine the knowledge, skills, experience, expertise, and visions of clinicians in academic medical centers and their affiliated community centers and hospitals, together with basic research scientists, are critical in shaping the emerging culture of translational research so that patients from the urban as well as suburban settings can avail the benefits of the latest developments in science and medicine.

'Integrating Clinical and Translational Research Networks—Building Team Medicine' is an embodiment of this ethos at the City of Hope National Medical Center in Duarte, California. It includes a series of papers authored by teams of leading clinicians, basic research scientists, and translational researchers. The authors discuss how engaging and collaborating with community-based practices, where the majority of older patients with cancer receive their care, can ensure that these patients receive the highest-quality, evidence-based care. Based on our collective experience at City of Hope, we would like to stress that the success of academic-community collaborative programs not only depends on the goodwill and vision of the participants but also on the medical administration, academic leadership, and policymakers who define the principles and rules by which cooperation within the health care industry occurs. We trust that our experience embodied in this singular compendium will serve as a 'Rosetta Stone' for other institutions and practitioners.

"This catalogue accompanies the exhibition Inventur-Art in Germany, 1943-55, on view at the Harvard Art Museums, Cambridge, Massachusetts, from February 9 through June 3, 2018."

This book presents new research on the histories and legacies of the German Expressionist group Blaue Reiter, the founding force behind modernist abstraction. For the first time Blaue Reiter is subjected to a variety of novel inter-disciplinary perspectives, ranging from a philosophical enquiry into its language and visual perception to analyses of its gender dynamics, its reception at different historical junctures throughout the twentieth century and its legacies for post-colonial aesthetic practices. The volume offers a new perspective on familiar aspects of Expressionism and abstraction, taking seriously the inheritance of modernism for the twenty-first century in ways that will help to recalibrate the field of Expressionist studies for future scholarship. Blaue Reiter still matters, the contributors argue, because the legacies of abstraction are still being debated by artists, writers, philosophers and cultural theorists today.

Auguste Rodin (1840-1917) was a radical sculptor whose unorthodox approach to multiplication, assemblage, industrial production and serial repetition challenged classical sculptural traditions and provided a definitive break in the history of art. Although best known for his bronze and marble sculptures, Rodin's genius was as a modeller, who captured movement, emotion, light and volume in pliable materials such as clay and plaster. Unlike his predecessors, his works include traces of their creation, challenging traditional conceptions of beauty. In line with new thinking on Rodin, this beautifully illustrated book focuses on the artist's use of plaster, a material which enabled him to create sculptures that are never finished, always becoming. United by their whiteness, fragile and experimental pieces will be explored alongside alternative aspects of some of Rodin's signature works. Including an exclusive contribution from sculptor Phyllida Barlow, newly commissioned texts will shed light on Rodin's way of working, the importance of modelling, his use of materiality and sexuality, and the role of photography in his work. For the first time, Rodin will be presented as the father of modern. Exhibition: Tate Modern, London, UK (21.10.2020 - 21.02.2021).

Sweet Bitter Blues: Washington, DC's Homemade Blues depicts the life and times of harmonica player Phil Wiggins and the unique, vibrant music scene around him, as described by music journalist Frank Matheis. Featuring Wiggins's story, but including information on many musicians, the volume presents an incomparable documentary of the African American blues scene in Washington, DC, from 1975 to the present. At its core, the DC-area acoustic "down home" blues scene was and is rooted in the African American community. A dedicated group of musicians saw it as their mission to carry on their respective Piedmont musical traditions: Mother Scott, Flora Molton, Chief Ellis, Archie Edwards, John Jackson, John Cephas, and foremost Phil Wiggins. Because of their love for the music and willingness to teach, these creators fostered a harmonious environment, mostly centered on Archie Edwards's famous barbershop where Edwards opened his doors every Saturday afternoon for jam sessions. Sweet Bitter Blues features biographies and supporting essays based on Wiggins's recollections and supplemented by Matheis's research, along with a foreword by noted blues scholar Elijah Wald, historic interviews by Dr. Barry Lee Pearson with John Cephas and Archie Edwards, and previously unpublished and rare photographs. This is the story of an acoustic blues scene that was and is a living tradition.

Jeffrey Schnapp and Matthew Battles reflect on what libraries have been in order to speculate about what they will become: hybrid places that intermingle books and ebooks, analog and digital formats, paper and pixels. They combine the cultural history of libraries with innovations at metaLAB, a research group at the forefront of digital humanities.

The overwhelming majority of a software system's lifespan is spent in use, not in design or implementation. So, why does conventional wisdom insist that software engineers focus primarily on the design and development of large-scale computing systems? In this collection of essays and articles, key members of Google's Site Reliability Team explain how and why their commitment to the entire lifecycle has enabled the company to successfully build, deploy, monitor, and maintain some of the largest software systems in the world. You'll learn the principles and practices that enable Google engineers to make systems more scalable, reliable, and efficient—lessons directly applicable to your organization. This book is divided into four sections: Introduction—Learn what site reliability engineering is and why it differs from conventional IT industry practices Principles—Examine the patterns, behaviors, and areas of concern that influence the work of a site reliability engineer (SRE) Practices—Understand the theory and practice of an SRE's day-to-day work: building and operating large distributed computing systems Management—Explore Google's best practices for training, communication, and meetings that your organization can use

A veteran art critic helps us make sense of modern and contemporary art The landscape of contemporary art has changed dramatically during the last hundred years: from Malevich's 1915 painting of a single black square and Duchamp's 1917 signed porcelain urinal to Jackson Pollock's midcentury "drip" paintings; Chris Burden's "Shoot" (1971), in which the artist was voluntarily shot in the arm with a rifle; Urs Fischer's "You" (2007), a giant hole dug in the floor of a New York gallery; and the conceptual and performance art of today's Ai Weiwei and Marina Abramovic. The shifts have left the art-viewing public (understandably) perplexed. In *The Art of Looking*, renowned art critic Lance Esplund demonstrates that works of modern and contemporary art are not as indecipherable as they might seem. With patience, insight, and wit, Esplund guides us through the last century of art and empowers us to approach and appreciate it with new eyes. Eager to democratize genres that can feel inaccessible, Esplund encourages viewers to trust their own taste, guts, and common sense. *The Art of Looking* will open the eyes of viewers who think that recent art is obtuse, nonsensical, and irrelevant, as well as the eyes of those who believe that the art of the past has nothing to say to our present.

"And Yet My Mask is Powerful" emerges from an exhibition by multimedia artists Basel Abbas and Ruanne Abou-Rahme, held at Carroll / Fletcher in London in 2016. Carrying on from their earlier project *The Incidental Insurgents* (2012-2015), the artists address the apocalyptic logic of perpetual crisis that characterizes the contemporary moment. The project takes its title from Adrienne Rich's poem "Diving Into the Wreck," and like that of the poem, its *mise-en-scène* is a field of wreckage. Here, the artists visit destroyed villages in occupied Palestine, documenting groups of Palestinian youths wearing copies of Neolithic masks. These masks, some of the oldest in the world, were originally found in the West Bank and are now stored in private Israeli collections; they have been copied and 3D-printed by the artists from online exhibition photographs. The book uses computer screenshots of images framed in software windows, layering them across the pages along with scans and typographic interventions. The work suggests a sense of collapse and return, but one oriented toward futurity, reworking the Arab world's apocalyptic imaginary into another, parallel, unrealized time. --Printed Matter website, viewed on January 2, 2018.

This ambitious work focuses on the world of Chinese thought during the two and a half centuries directly preceding and partly overlapping the time of Confucius. Ideas developed by Chunqiu statesmen and thinkers formed the intellectual milieu of Confucius and his disciples and contributed directly to the intellectual flowering of the Zhanguo (Warring States) era (453-221 B.C.E.), the formative period of the Chinese intellectual tradition. This study is the first attempt to systematically reconstruct major intellectual trends in pre-Confucian China. *Foundations of Confucian Thought* is based on an exploration of the *Zuo zhuan*, the largest pre-imperial historical text. Relying on meticulous textual and linguistic analysis, Yuri Pines argues that hundreds of the speeches of Chunqiu statesmen recorded in the *Zuo zhuan* were not invented by the compiler of the treatise but reproduced from earlier sources, thus making it an authentic reflection of the Chunqiu intellectual tradition. By tracing changes in ideas and concepts throughout the Chunqiu period, Pines reconstructs the dynamics of contemporary political and ethical discourse, distilling major intellectual impulses that Chunqiu thinkers bequeathed to their Zhanguo descendants.

Ezra Pound referred to 1922 as Year One of a new era. It was the year that began with the publication of James Joyce's *Ulysses* and ended with the publication of T. S. Eliot's *The Waste Land*, two works that were arguably "the sun and moon" of modernist literature, some would say of modernity itself. In *Constellation of Genius*, Kevin Jackson puts the titanic achievements of Joyce and Eliot in the context of the world in which their works first appeared. As Jackson writes in his introduction, "On all sides, and in every field, there was a frenzy of innovation." It is in 1922 that Hitchcock directs his first feature; Kandinsky and Klee join the Bauhaus; the first AM radio station is launched; Walt Disney releases his first animated shorts; and Louis Armstrong takes a train from New Orleans to Chicago, heralding the age of modern jazz. On other fronts, Einstein wins the Nobel Prize in Physics, insulin is introduced to treat diabetes, and the tomb of Tutankhamun is discovered. As Jackson writes, the sky was "blazing with a 'constellation of genius' of a kind that had never been known before, and has never since been rivaled." *Constellation of Genius* traces an unforgettable journey through the diaries of the actors, anthropologists, artists, dancers, designers, filmmakers, philosophers, playwrights, politicians, and scientists whose lives and works—over the course of twelve months—brought a seismic shift in the way we think, splitting the cultural world in two. Was this a matter of inevitability or of coincidence? That is for the reader of this romp, this hugely entertaining chronicle, to decide.

In the thick of the Second World War, the Cairo-based Surrealist collective *Art et Liberté* were pioneering new art forms and mounting subversive exhibitions that sent shockwaves across local artistic circles. Born with the publication of their *Manifesto Long Live Degenerate Art* on December 22nd, 1938, the group rejected the convergence of art and nationalism, aligning themselves with a complex, international and evolving Surrealist movement spanning cities such as Paris, London, Mexico City, New York, Beirut and Tokyo. *Art and Liberty* created a distinct reworking of Surrealism, which provided a generation of disillusioned Egyptian and non-Egyptian artists and writers, men and women alike, with a platform for cultural reform and anti-Fascist protest. *Surrealism in Egypt* is the first comprehensive analysis of *Art and Liberty's* artworks, literature and critical writings on Surrealism. By addressing the group's long-lost and often misconstrued legacy, and drawing on a substantial body of previously unpublished primary documents and more than 200 field interviews, the author charts *Art and Liberty's* significant contribution towards a new definition of Surrealism. Moving beyond the polarizing dichotomies of Saidian Orientalism, this book rewrites the history of Surrealism itself - advocating for a new definition of the movement that reflects an inclusive vision of art history.

An expansive collection catalogue that offers a multiplicity of fresh perspectives on recent modern and contemporary art acquisitions in *The Phillips Collection*

Until the nineteenth century, "risk" was a specialized term: it was the commodity exchanged in a marine insurance contract. *Freaks of Fortune* tells how the modern concept of risk emerged in the United States. Born on the high seas, risk migrated inland and became essential to the financial management of an inherently uncertain capitalist future.

An undisciplined, story-centric, off-beat, and honest approach to demystifying what it takes to become a full-time artist. This book is all about blazing your own trail and creating your career as an artist, instead of waiting around to be discovered.

The 9th Edition of the *Masonry Designers' Guide*, designated as the MDG-2016 so that readers know it is based on the 2016 TMS 402/602 has been completely updated. Numerous additions and changes have been made, including a new Chapter on Reinforcement and Connectors, discussion and examples on new TMS 402-16 provisions, information related to masonry design requirements in the 2018 International Building Code (IBC), and updates related to new loading requirements in ASCE 7-16.

This lavish book documents the developments in the field of fiber-related art over the past half century. The 1960s saw a revolution in fiber art. Where once the focus was on knotting, twining, and coiling thread into works that were immediately recognizable, and therefore connected to utilitarian crafts, fiber artists of the later 20th-century began to experiment with abstract forms that were closer to sculpture than craft. Influenced by postmodernist ideas, these works are the product of experimentation with materials and technique while at the same time confronting important cultural issues. This book traces that

development from the mid-twentieth century to the present. In the words of Bauhaus weaver Anni Albers, the expressive quality of fiber is essentially a "language of thread." That language is beautifully displayed in full-color spreads and individual illustrations in this book. Scholarly essays address the feminist movement of the 1970s; the expanded use of materials in the '80s and '90s; and the more recent employment of fiber as one more material in the creation of freestanding works. In addition to a section of full color illustrations, this book also includes profiles of all of the genre's most influential artists. The Routledge Companion to Expressionism in a Transnational Context is a challenging exploration of the transnational formation, dissemination, and transformation of expressionism outside of the German-speaking world, in regions such as Central and Eastern Europe, the Baltics and Scandinavia, Western and Southern Europe, North and Latin America, and South Africa, in the first half of the twentieth century. Comprising a series of essays by an international group of scholars in the fields of art history and literary and cultural studies, the volume addresses the intellectual discussions and artistic developments arising in the context of the expressionist movement in the various art centers and cultural regions. The authors also examine the implications of expressionism in artistic practice and its influence on modern and contemporary cultural production. Essential for an in-depth understanding and discussion of expressionism, this volume opens up new perspectives on developments in the visual arts of this period and challenges the traditional narratives that have predominantly focused on artistic styles and national movements.

Can a system be considered truly reliable if it isn't fundamentally secure? Or can it be considered secure if it's unreliable? Security is crucial to the design and operation of scalable systems in production, as it plays an important part in product quality, performance, and availability. In this book, experts from Google share best practices to help your organization design scalable and reliable systems that are fundamentally secure. Two previous O'Reilly books from Google—Site Reliability Engineering and The Site Reliability Workbook—demonstrated how and why a commitment to the entire service lifecycle enables organizations to successfully build, deploy, monitor, and maintain software systems. In this latest guide, the authors offer insights into system design, implementation, and maintenance from practitioners who specialize in security and reliability. They also discuss how building and adopting their recommended best practices requires a culture that's supportive of such change. You'll learn about secure and reliable systems through: Design strategies Recommendations for coding, testing, and debugging practices Strategies to prepare for, respond to, and recover from incidents Cultural best practices that help teams across your organization collaborate effectively

An Edgar Award finalist for Best Fact Crime, this "impressive...open-eyed investigative inquiry wrapped within a cultural history of rural America" (The Wall Street Journal) shows legendary statistician and baseball writer Bill James applying his analytical acumen to crack an unsolved century-old mystery surrounding one of the deadliest serial killers in American history. Between 1898 and 1912, families across the country were bludgeoned in their sleep with the blunt side of an axe. Some of these cases—like the infamous Villisca, Iowa, murders—received national attention. But most incidents went almost unnoticed outside the communities in which they occurred. Few people believed the crimes were related. And fewer still would realize that all of these families lived within walking distance to a train station. When celebrated true crime expert Bill James first learned about these horrors, he began to investigate others that might fit the same pattern. Applying the same know-how he brings to his legendary baseball analysis, he empirically determined which crimes were committed by the same person. Then after sifting through thousands of local newspapers, court transcripts, and public records, he and his daughter Rachel made an astonishing discovery: they learned the true identity of this monstrous criminal and uncovered one of the deadliest serial killers in America. "A suspenseful historical account" (Publishers Weekly, starred review), *The Man from the Train* paints a vivid, psychologically perceptive portrait of America at the dawn of the twentieth century, when crime was regarded as a local problem, and opportunistic private detectives exploited a dysfunctional judicial system. James shows how these cultural factors enabled such an unspeakable series of crimes to occur, and his groundbreaking approach to true crime will convince skeptics, amaze aficionados, and change the way we view criminal history. "A beautifully written and extraordinarily researched narrative...This is no pure whodunit, but rather a how-many-did-he-do" (Buffalo News).

In her acclaimed novels, Susan Vreeland has given us portraits of painting and life that are as dazzling as their artistic subjects. Now, in *The Forest Lover*, she traces the courageous life and career of Emily Carr, who—more than Georgia O'Keeffe or Frida Kahlo—blazed a path for modern women artists. Overcoming the confines of Victorian culture, Carr became a major force in modern art by capturing an untamed British Columbia and its indigenous peoples just before industrialization changed them forever. From illegal potlatches in tribal communities to artists' studios in pre-World War I Paris, Vreeland tells her story with gusto and suspense, giving us a glorious novel that will appeal to lovers of art, native cultures, and lush historical fiction.

Rex Ray celebrates life, work, and legacy of iconic San Francisco fine artist Rex Ray (1956–2015). This comprehensive volume features more than 100 of his works on canvas, wood, and paper—including never-before-seen pieces courtesy of the Rex Ray estate. His playful painted-paper-collages and organic, abstract forms have earned him comparisons to artists like Paul Klee and Henri Matisse. • Essays by celebrated writer Rebecca Solnit, art critic Christian Frock, and Ray's gallerist and friend Griff Williams • Ray's collages and paintings are both playful and geometric. • This vibrant book pays tribute to Ray's life and work. Rex Ray was a successful and prolific fine artist whose art has been shown at major museums and galleries throughout the United States. Now, longtime collectors and new fans alike can revel in the beauty of Ray's inimitable body of work. Ray's exuberantly colorful paintings and collages are a testament to the prolific artist's joy in the creative process. • This fine art monograph is perfect for Ray's fans and collectors, as well as those discovering the power and beauty of his work for the first time. • A perfect book for lovers of pop art and modern design, museumgoers, fine art fans, artists, designers, and those interested in the San Francisco art scene and local history • Great for those who loved Rex Ray: *We Are All Made of Light* by Griff Williams, Kevin Killa, and Rene Paul Barilleaux; *House Industries: The Process Is the Inspiration* by House Industries; and *Barry McGee* by Aaron Rose and Barry McGee

"Edited by Max Schumann, Director of Printed Matter, and with a foreword and afterword by art writer and Colab member Walter Robinson, the book traces the output of Collaborative Projects Inc. (aka Colab), the highly energetic gathering of young New York downtown artists active from the late 1970's through the mid 1980's."--Printed Matter website.

An intimate account of everyday life and art in 1970s New York from a pioneering feminist artist Rosemary Mayer (1943-2014) produced a vast body of work that includes sculptures, outdoor

installations, drawings, illustrations, artist's books, lyrical essays and art criticism. In 1971 she began to focus on the use of fabric as a primary medium for sculpture and to participate in a feminist consciousness-raising group which contributed to her involvement in A.I.R., the first cooperative gallery for women in the US. This was a pivotal period in Mayer's life and career, and she documented it in remarkable detail in her 1971 journal, where her plans, enthusiasms, ambitions and insecurities, as well as her opinions about the art around her, are recorded with self-awareness and honesty, along with her concerns about friendship, money and love. This illustrated edition of Excerpts from the 1971 Journal of Rosemary Mayer--previously published in a limited run of 300 copies--includes a new introduction and is expanded to twice the size of the first edition.

This new edition builds on the explosion of research on sustainable agriculture since the late 1980s. By separating myth from reality, Miguel Altieri extracts the key principles of sustainable agriculture and expounds on management systems that "really work." Providing case studies of sustainable rural development in developing countries, he goes beyond a mere description of practices to include data that reveal the socioeconomic and environmental impacts of alternative projects. Each chapter of Agroecology has been enriched and updated with the latest research results from around the world. New emphasis has been placed on such issues as the ecological economics of agriculture, policy changes needed for promoting sustainable agriculture, rural development in the Third World, the role of biodiversity in agriculture, and new research methodologies.

The friendship between Franz Marc (1880-1916) and August Macke (1887-1914) was of vital importance to both painters. Their close bond lasted four years and came to an abrupt end with the death of Macke shortly after the outbreak of World War I. This catalogue brings together paintings, watercolors, drawings, handcrafts, objects and documents from these two artists, demonstrating the extent to which they influenced one another in their work. While Macke, seven years younger than Marc, took a sensual and spontaneous approach to the visual world, his friend possessed an elevated, theoretical vision, seeking the spiritual unity of existence through the image. Despite conceptual, cultural and political differences, a deep mutual affection characterized their joint undertakings, such as the exhibitions of the Blaue Reiter or their conversations on Fauvism, Cubism, Futurism and the work of their contemporaries.

Jeanetta Rich is a mother and poet based in Los Angeles. Her work focuses on the emotional lives of voiceless women, those who have been silenced through poverty and/or lack of education. Her work was recently featured in Texte zur Kunst 30th Anniversary issue, "The Feminist." Black Venus Fly Trap is her debut poetry collection.

Silliness takes center stage in this laugh-out-loud book from the creator of The Very Hungry Caterpillar?--now available as a board book Yes, there's something strange, something funny and even downright preposterous on every page of this book. But it's not a mistake - it's nonsense Nonsense lies at the heart of many beloved nursery rhymes. Children readily accept odd statements like "the cow jumped over the moon" and "the dish ran away with the spoon." This fanciful bending of reality is also basic to surrealism. In this book, nonsense and surrealism combine to spark creativity and imagination. What's true? What's impossible? What's absolutely absurd? From Eric Carle, creator of the classic, The Very Hungry Caterpillar, comes a book to make children laugh and think, preparing them for a lifetime of loving both words and art. Praise for The Nonsense Show A TIME Magazine Top 10 Children's Book of 2015 * "Carle creates fun and laughter in this homage to the surrealist artist Ren Magritte. A beautiful collection of the legendary thinker's short stories The Storyteller gathers for the first time the fiction of the legendary critic and philosopher Walter Benjamin, best known for his groundbreaking studies of culture and literature, including Illuminations, One-Way Street and The Arcades Project. His stories revel in the erotic tensions of city life, cross the threshold between rational and hallucinatory realms, celebrate the importance of games, and delve into the peculiar relationship between gambling and fortune-telling, and explore the themes that defined Benjamin. The novellas, fables, histories, aphorisms, parables and riddles in this collection are brought to life by the playful imagery of the modernist artist and Bauhaus figure Paul Klee.

****NAMED ONE OF THE BEST ART BOOKS OF THE DECADE BY ARTNEWS**** The first and definitive biography of the celebrated collectors Dominique and John de Menil, who became one of the greatest cultural forces of the twentieth century through groundbreaking exhibits of art, artistic scholarship, the creation of innovative galleries and museums, and work with civil rights. Dominique and John de Menil created an oasis of culture in their Philip Johnson-designed house with everyone from Marlene Dietrich and René Magritte to Andy Warhol and Jasper Johns. In Houston, they built the Menil Collection, the Rothko Chapel, the Byzantine Fresco Chapel, the Cy Twombly Gallery, and underwrote the Contemporary Arts Museum. Now, with unprecedented access to family archives, William Middleton has written a sweeping biography of this unique couple. From their ancestors in Normandy and Alsace, to their own early years in France, and their travels in South America before settling in Houston. We see them introduced to the artists in Europe and America whose works they would collect, and we see how, by the 1960s, their collection had grown to include 17,000 paintings, sculptures, drawings, photographs, rare books, and decorative objects. And here is, as well, a vivid behind-the-scenes look at the art world of the twentieth century and the enormous influence the de Menils wielded through what they collected and built and through the causes they believed in.
