Paper airplanes as serious science? No longer shamefully relegated to the back rows of elementary-school sports stadiums, paper airplanes come into their own with this amusing -- and instructive -- book. The Great International Paper Airplane Book documents the proceedings of the first (and possibly only) International Paper Airplane Competition conducted by Scientific American. In addition to the behind-the-scenes story and official records of the Competition, readers will discover intriguing mini-essays on the historical, aesthetic, technological, and folkloric aspects of the paper airplane and on its startling implications for the future of aviation. Best of all, there are dozens of cut-fold-and-fly-them-yourself planes to experiment with. Combining real science with outright fun, this book appeals to paper airplane enthusiasts and would-be aviators of every age.

The Complete Paper Aeroplane Book is packed with diagrams, instructions and graphics that will help you to build your own paper aircraft that really fly. From origami fighter jets to tin foil helicopters, and paper Spitfires, there are hundreds of different ways of building successful flying devices from waste paper. Hours of fun can be had following this book's clear instructions and using the colour templates provided. The customised graphics for each model make sure that your aircraft will look great as well as flying better than any paper dart you have ever folded. All of the fantastic flying machines featured have been built and tested by the author to ensure that, with little more than a few folds and a couple of snips, your new creation can get airborne.

When we say these are the best, we're not kidding. The folding instructions are, of course, Klutz-clear and the trimming and flying information is fully field-tested and approved.

Following on the success of 100 paper planes, this title features new planes based on four different layouts, each decorated with its own unique colours, motifs and patterns - ranging from Aztec prints to fighting tigers to sci fi. It features clear and concise instructions on how to fold and throw the planes.

The world of Harry Potter is full of magical flying things. So, how does one enjoy some of the most amazing magical flyers in the Wizarding world without heading to Hogwarts? By building paper replicas, of course! From Harry to Hedwig, this book is full of beautifully illustrated flyers on sturdy cardstock that are sure to be a hit with any Harry Potter fan.

A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Big dragons, baby dragons, and a dragon you design yourself Introducing Paper Flying Dragons, fantastic flyers unmatched in the world of paper airplanes. They swoop, they glide, they dive and crash... and then they fly again. That's because these five breeds of dragon are made of sturdy card stock - beautifully illustrated punch-outs, ready to fold and assemble. Every one of them is kid-tested for durability, ease of building, and spectacular flight. You also get six foldable paper hatchlings, speedy little baby dragons just out of the egg. Best of all, with our Klutz-engineered construction system, you can build a dragon of your own invention. Assemble the parts however you want, flight test, and then follow our expert tips to modify your creation for better aerodynamic performance. To quote our kid testers, the results are "awesome!"

The book also features fascinating true facts about dragons. (Please don't let the fact that author Pat Murphy is a Nebula Award®-winning science fiction writer cast doubt on the authenticity of her research.) If topping our best-selling The Klutz Book of Paper Airplanes inspired us to get galactic with Star Wars® Folded Flyers, topping that is going to take something positively legendary. Fortunately, here there be dragons.

Each sheet of this bumper, tear-off pad can easily be folded into a brightly patterned paper plane. The cover folds out to reveal simple instructions for making each type of plane and flying tips are included at the back.
