An exciting new volume of letters about the Capital of the World--from George Washington, Kahlil Gibran, Audrey Hepburn, Martin Scorsese, and more--from the author of the bestselling Letters of Note collections Peter Schagen writes to the Dutch West India Company about the purchase of "Manhattes." Mayor Ambrose Kingsland urges the city council to create what became Central Park. E. B. White bemoans taxi cab design to Harold Ross, cofounder of The New Yorker. Bianca Jagger sets the record straight about that white horse in Studio 54. New York City goes by many names--Gotham, Empire City, the City That Never Sleeps--and once served as the capital of America. It came together as we know it in 1898 and has become one of the world's most powerful, most important megacities, shaping art, culture, finance, and media across the globe. This iconic collection of thirty letters smartly explores the history of life in the five boroughs. You'll need more than a New York minute to enjoy it all.

Record your encounters with nature in this fantastic, interactive book! Kids can write about and draw the plants and animals they see. They can paste photos, postcards and feathers found on the ground. Plus, there's great info to learn about nature.

Admired by both Proust and Breton, this, nineteenth century book was also the favourite of, artist Joseph Cornell. An account of the author's, passion for an actress and subsequent descent into, madness, AURELIA is a document of dreams, obsessions, and insanity. One of the original, bohemians, Nerval was well known in his day for, parading a lobster on a blue ribbon through the, gardens of the Palais-Royal, and for his suicide, (1855), hanging from an apron string he called the, garter of the Queen of Sheba.

From the USA Today Bestselling author of The Sword of the Templars and The Aztec Heresy Some secrets are too great to bear... Retired Army Ranger Lt. Col. John Holliday has reluctantly settled into his teaching position at West Point when young Israeli archaeologist Rafi Wanounou comes to him with desperate news. Holliday's niece—and Rafi's fiancé—Peggy has been kidnapped. Holliday sets out with Rafi to find the only family he has left. But their search for Peggy will lead them to a trail of clues that spans across the globe, and into the heart of a conspiracy involving an ancient Egyptian legend and the darkest secrets of the Order of Templar Knights. Secrets that, once known, cannot be survived...

"The problem with crazy is that crazy, by itself, has no context. It can be good crazy, bad crazy ... or "crazy" crazy--like it was when my ex-boyfriend sung about me on the radio." Eighteen-year-old Kate couldn't be more excited about finishing high school and spending the summer on tour with her boyfriend's band. Her dad showing up drunk at graduation,

however, is not exactly kicking things off on the right foot--and that's before she finds out about his mystery illness, certain to end in death. A mystery illness that she could inherit. Kate has to convince everyone around her that her father is sick, not crazy. But who will be harder to convince? Her friends? Or herself? The Problem With Crazy "is a story about love and life; about overcoming obstacles, choosing to trust, and learning how to make the choices that will change your life forever."

A dynamic, all-inclusive overview of the field of health physics If it's an important topic in the field of health physics, you'll find it in this trusted text . . . in sections on physical principles, atomic and nuclear structure, radioactivity, biological effects of radiation, and instrumentation. This one-of-a-kind guide spans the entire scope of the field and offers a problem-solving approach that will serve you throughout your career. Features: A thorough overview of need-to-know topics, from a review of physical principles to a useful look at the interaction of radiation with matter Chapter-ending practice problems to solidify your grasp of health physics topics and their real-world application Essential background material on quantitative risk assessment for health-threatening radiation dangers Authoritative radiation safety and environmental health coverage that supports the International Commission on Radiological Protection's standards for specific populations High-yield appendices to expand your comprehension of chapter material: Values of Some Useful Constants, Table of the Elements, The Reference Person, Specific Absorbed Fraction of Photon Energy, and Total Mass Attenuation Coefficients NEW! Essential coverage of non-ionizing radiation-laser and microwaves, computer use in dose calculation, and dose limit recommendations

Any overview of prehispanic society in the Americas would identify its obsidian core-blade production as a unique and highly inventive technology. Normally termed prismatic blades, these long, parallel-sided flakes are among the sharpest cutting tools ever produced by humans. Their standardized form permitted interchangeable use, and such blades became the cutting tool of choice throughout Mesoamerica between 600-800 B.C. Because considerable production skill is required, increased demand may have stimulated the appearance of craft specialists who played an integral role in Mesoamerican society. Some investigators have argued that control over obsidian also had a significant effect on the development and organization of chiefdom and state-level societies. While researchers have long recognized the potential of obsidian studies, recent work has focused primarily on compositional analysis to reconstruct trade and distribution networks. Study of blade production has received much less attention, and many aspects of this highly evolved craft are still lost. This volume seeks to identify current research questions in Mesoamerican lithic technology and to demonstrate that replication studies coupled with experimental research design are valuable analytical approaches to such questions.

A White Side of Black Britain explores the racial consciousness of white women in the United Kingdom who have had children with black men, primarily British-born men of Caribbean heritage. Contending that social scientists do not adequately understand how white members of black families negotiate race, France Winddance Twine describes the everyday lives of white women raising children of African Caribbean descent in a racially diverse mid-size British city. Varying in age, income, and education, the women at the centre of Twine's ethnography share moving stories about how they met the fathers of their children, how they incorporate ideas about race and racism into their parenting, and how their thinking about race and social relations changed over time. Interviewing and observing more than forty multiracial families over the span of a decade, Twine discovered that the white women's sense of belonging and racial consciousness was derived as much from their interactions with their partner's family and friends as it was from their romantic relations with black men. In addition to the white birth mothers, Twine interviewed their children, partners, and extended families, and her book can be read in part as a dialogue about race among black and white members of the same families. It includes intimate photographs of the women and their children, partners, extended families, and community.

Joseph Anderson has been successful in finding brides for his two eldest sons. In this book he finds the perfect bride for his youngest son Mark. Mark has a billion dollar ranch operation that takes many employees to run successfully. He loses his cook and leaves it to his father to find a new one. Little does Mark know that Joseph is far more interested in her marriage potential than her cooking skills. Luckily he finds a woman who can cook and will make the perfect bride for his son. Emily Jackson is on the run from people who want to take her five year old son from her. She ends up in a small town in Washington and is excited to find an ad in the paper for a live in cook. When she starts work at the beautiful ranch, sparks fly with her new boss who is sexier than any cowboy has the right to be. She does not want to risk having an affair with her boss and losing her job so she will fight the attraction until passion overcomes them both. Take the journey with Mark and his family as the youngest Anderson finds his bride.

The Emergence of Pressure Blade Making From Origin to Modern Experimentation Springer Science & Business Media Introduces physics to science students with a wide range of interests. Unlike many other physics texts, the coverage and emphasis here is influenced by the specific needs of science majors, including those in the life sciences, and thus treats topics such as geometric optics, mechanics of fluids and acoustics. The derivative is introduced in Chapter One and integrals are used sparingly until electricity and magnetism are covered. Entire chapters are devoted to applications of physics covering subjects such as nerve conduction, ionizing radiation and nuclear magnetic resonance, demonstrating the widespread utility of physics and the unity of science. To aid in comprehension, calculations involving calculus are

carried out with a good deal of detail and discussion. Each chapter features a checklist of terms to define or explain as well as problems and exercises. Additional problems and exercises are located in the Supplementary Topics section. In his brand new book, Gok Wan shares his favourite recipes for fresh and healthy meals - inspired by the flavours of Asia Gok's recipes draw influence from the East, as he teaches us how to add flavour and a splash of originality through his distinctive style of simple, fast cooking. Chapters cover all occasions from lunch ideas to dinner parties and date nights and include curries, stir-fries, noodles, salads, soups and even desserts. He shares many of his family's traditional recipes too, but gives them a modern twist for today's kitchen tables - try Sweet miso marinated chicken and pak choy, Sweet potato and Brazil nut curry and Poppa Wan's fu yung. And, running throughout, are Gok's words of advice on wok cooking, his favourite ingredients and tips on preparation and entertaining Gok-style. For Gok, great eating should be hassle-free, and these recipes are exactly that - tasty dishes that are low stress, good for you and make minimal mess. With a giggle and an outrageous mouth - perfect for things other than talking - Katie comes flying into Xaphan's life, upsetting centuries of self-inflicted misery. How can he stay true to the one he lost when a bubbly psycho, with mismatched eyes, keeps consuming his thoughts - and awakening his desire? So she was a tad bit nuts, Katie's insanity came in handy as the Devil's favorite problem solver. But killing's not on the menu when a dragon goes missing, and worse, Lucifer teams her up with Hell's grumpiest demon. Xaphan's rejection of her advances only makes her more determined to seduce him. And despite her violent reputation, a part of her is oddly tempted to let him live. Warning: This story centers around a grumpy demon holding on to an ancient vow and a perky psycho (with killer tendencies) who is determined to make him snap. There's cursing, melt-your-screen hotness, messed up religious tropes and snort out loud fun. If you already know you're going to Hell, then dive on in.

Human development is a long and steady process that began with stone tool making. Because of this skill, humans were able to adapt to climate changes, discover new territories, and invent new technologies. "Pressure knapping" is the common term for one method of creating stone tools, where a larger device or blade specifically made for this purpose is used to press out the stone tool. Pressure knapping was invented in different locations and at different points in time, representing the adoption of the Neolithic way of life in the Old world. Recent research on pressure knapping has led for the first time to a global thesis on this technique. The contributors to this seminal work combine research findings on pressure knapping from different cultures around the globe to develop a cohesive theory. This contribution to this volume represents a significant development to research on pressure knapping, as well as the field of lithic studies in general. This work will be an important reference for anyone studying the Paleolithic, Mesolithic, and Neolithic periods, lithic studies, technologies, and more generally, cultural transmission.

Kale Rollins' life has become a living nightmare. As if it wasn't awkward enough being an adopted normal kid in a family of purebred shapeshifters, he was now being transferred to a new school made solely for their kind. And it gets worse. He must attend this school under the pretense that he too is a shapeshifter, in order to "babysit" his fourteen year old brother who has suddenly shifted a year earlier than expected. However, with the new found knowledge that shapeshifting families are mysteriously disappearing, Kale wonders if attending Emerson Fox Academy is actually as safe as it seems. Before he even reaches the school, he finds himself in the middle of a feud that could become life-threatening to him and his brother. Unexpectedly friendships are formed as he chooses a side - so are enemies. There is one girl though who through it all that makes him want to stay. Except the closer he gets to Lavallette Waters, the harder it is to keep up his facade. As secrets start to unravel around him, Kale wonders what will happen next... Will "babysitting" his brother be the death of him? Can he really trust Lavallette? And how much more time do they have before someone they care about disappears? Be sure to get Full Moon on the Rise, Book II of the Emerson Fox Academy Series from Tell-Tale Publishing Group. Available Now!

The day the blizzard started, no one knew that it was going to keep snowing for a week. That for those in its path, it would become not just a matter of keeping warm, but of staying alive. . . . Scotty and his friends Pete and Jason are among the last seven kids at their high school waiting to get picked up that day, and they soon realize that no one is coming for them. Still, it doesn't seem so bad to spend the night at school, especially when distractingly hot Krista and Julie are sleeping just down the hall. But then the power goes out, then the heat. The pipes freeze, and the roof shudders. As the days add up, the snow piles higher, and the empty halls grow colder and darker, the mounting pressure forces a devastating decision. . . . Set in Guyana, this is the story of Mama King, trapped by age and infirmity, but ultimately indomitable. It is a protest at institutions that isolate, and a way of life that denies respect and responsibility for the weak.

"My heart wandered through the world constantly seeking after my cure, but the sweet and delicious water of life had to break through the granite of my heart." When the words of Rumi enter your heart, something softens, breaks, and is subtly reborn. That he wrote the words seven hundred years ago in a medieval Persian world that bears little resemblance to ours makes their uncanny resonance to us today just that much more remarkable. Here is a treasury of daily wisdom from this most beloved of all the Sufi masters—both his prose and his ecstatic poetry—that you can use to start every day for a year, or that you can dip into for inspiration any time you need to break through the granite of your heart.

In this darkly satirical send-up of academia and the Midwest, we are introduced to Moo University, a distinguished institution devoted to the study of agriculture. Amid cow pastures and waving fields of grain, Moo's campus churns with devious plots, mischievous intrigue, lusty liaisons, and academic one-upmanship, Chairman X of the Horticulture Department harbors a secret fantasy to kill the dean; Mrs. Walker, the provost's right hand and campus information queen, knows where all the bodies are buried; Timothy Monahan, associate professor of English, advocates eavesdropping for his creative writing assignments; and Bob Carlson, a sophomore, feeds and maintains his only friend: a hog named Earl Butz. Wonderfully written and masterfully plotted, Moo gives us a wickedly funny slice of life.
