With the clarity of a physicist and the compassion of a gifted healer with fifteen years of professional experience observing 5,000 clients and students, Barbara Ann Brennan presents the first in-depth study of the human energy field for people who seek happiness, health and their full potential. Our physical bodies exist within a larger "body," a human energy field or aura, which is the vehicle through which we create our experience of reality, including health and illness. It is through this energy field that we have the power to heal ourselves. This energy body -- only recently verified by scientists, but long known to healers and mystics -- is the starting point of all illness. Here, our most powerful and profound human interactions take place, the precursor and healer of all physiological and emotional disturbances. Hands of Light is your guide to a new wholeness. It offers:

- A new paradigm for the human, in health, relationship, and disease
- An understanding of how the human energy field looks, functions, is disturbed, healed, and interacts with friends and lovers.
- Training in the ability to see and interpret auras
- Medically verified case studies of healing people from all walks of life with a variety of illnesses.
- Guidelines for healing the self and others.
- The author's personal and intriguing life adventure which gives us a model for growth, courage and possibilities for expanded consciousness

“A Cuban Girl’s Guide to Tea and Tomorrow is an absolute delight. Cozier than a hand-knit gray cardigan and richer than Abuela’s pastelito recipe, Namey takes you from Miami to Winchester, and leaves your heart belonging to both.”

—Rachael Lippincott, #1 New York Times bestselling author of Five Feet Apart Love & Gelato meets Don’t Date Rosa Santos in this charming, heartfelt story following a Miami girl who unexpectedly finds love—and herself—in a small English town. For Lila Reyes, a summer in England was never part of the plan. The plan was 1) take over her abuela’s role as head baker at their panadería, 2) move in with her best friend after graduation, and 3) live happily ever after with her boyfriend. But then the Trifecta happened, and everything—including Lila herself—fell apart. Worried about Lila’s mental health, her parents make a new plan for her: Spend three months with family friends in Winchester, England, to relax and reset. But with the lack of sun, a grumpy inn cook, and a small town lacking Miami flavor (both in food and otherwise), what would be a dream trip for some feels more like a nightmare to Lila...until she meets Orion Maxwell. A teashop clerk with troubles of his own, Orion is determined to help Lila out of her funk, and appoints himself as her personal tour guide. From Winchester’s drama-filled music scene to the sweeping English countryside, it isn’t long before Lila is not only charmed by Orion, but England itself. Soon a new future is beginning to form in Lila’s mind—one that would mean leaving everything she ever planned behind. This well-organized comprehensive treatment of the popular Panzer General Gamewill include strategies for military and fantasy role-playing gamers. This is a difficult and complex game to play as it places the player in a fantasy universe. Every unit and scenario will be covered.

Stargazing is among the most peaceful and inspiring outdoor activities. Night Sky, the award-winning book by Jonathan Poppele, makes it more fun than ever! Take a simple approach to finding 62 constellations by focusing on one constellation at a time, instead of attempting to study dizzying charts. Start with the easy-to-find constellations during each season and work toward the more difficult ones. Better yet, you'll learn how to locate any constellation in relation to the Big Dipper, the North Star and the top of the sky. With two ways to locate each constellation, you'll know where in the sky to look and what to look for! Along the way, you'll be introduced to mythology, facts and tidbits, as well as details about the planets, solar system and more! As an added bonus, the book comes with a red-light flashlight for night reading. This is an important, and in some ways revolutionary, book. The Banzai Method advanced by David Jackson and Ron Klinger improves on Milton Work by reassessing the relative values of the honour cards but also adds a further dimension to accurate hand evaluation by including the tens and is of crucial importance when assessing balanced hands. "Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create

feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in the book, working through each one to create the feel described.
