Developed to prepare students in the combined elementary and intermediate algebra course for a college-level curriculum, *Elementary and Intermediate Algebra*, 4/e, retains the hallmark features for which the Larson team is known: abundant, high-quality applications; the use of real data; the integration of visualization (figures and graphs) throughout; and extensive opportunities for self-assessment (mid-chapter quizzes, review exercises, tests, and cumulative tests). What You Should Learn orients students to each section by listing the main objectives. Why You Should Learn It provides a motivational explanation for learning the given objectives. What Did You Learn? following each chapter highlights key mathematical terms and concepts. For easy reference, Key Terms are correlated to the chapter by page number, while Key Concepts are correlated by section number. Integrated Review Exercises appear before section exercises in every section. They offer a review of skills, definitions, and problem solving from previous chapters. Eduspace, powered by Blackboard, for the Larson/Hostetler Elementary and Intermediate Algebra course features algorithmic exercises, test bank content in question pools, an online study guide, interactive tutorials for appropriate sections and video explanations.

Think of it as portable office hours! The Interactive Video Skillbuilder CD-ROM contains more than eight hours of video instruction. The problems worked during each video lesson are shown next to the viewing screen so that student can try working them before watching the solution. To help students evaluate their progress, each section contains a 10-question Web quiz (the results of which can be emailed to the instructor) and each chapter contains a chapter test, with answers to each problem on each test. Also includes MathCue Tutorial software. This dual-platform software presents and scores problems and tutor students by displaying annotated, step-by-step solutions. Problem sets may be customized as desired.

Kaseberg presents an effective, nontraditional approach to traditional algebra curriculum. The first edition has gained a strong following among instructors who find that Kaseberg's use of guided discovery and problem solving facilitates learning new concepts and strengthens skill retention. In the second edition, Kaseberg's informal, interactive style makes algebra more accessible to students while maintaining rigorous mathematical accuracy. To reduce preparation time for course leaders, and facilitate use by adjuncts, the new Instructor's Resource Manual accompanies the second edition. The manual provides a structured lesson and group-activity worksheet for each section in the textbook; incorporates materials from the textbook with supplemental projects and activities; suggests core homework assignments; and furnishes guided-discussion questions. This resource serves to bridge the gap between traditional pedagogy and a reform approach.

As in previous editions, the focus in ESSENTIAL MATHEMATICS with APPLICATIONS remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. "Contrary to the old adage about finding new names for old things, Writing Online: Rhetoric for the Digital Age gives new life and new meaning to old names. The book and its companion website transform ancient rhetoric as a process of oral composition—invention, arrangement, memory, style, and delivery—into a digital rhetoric, a dynamic process of writing for the World Wide Web: dynamic because it shows not only how to write in a Web-based medium but, more importantly, how to learn and adapt to a medium that is constantly evolving and changing. Unlike conventional books that provide specific solutions to specific problems, Writing Online reenacts the process of solving Web-based writing problems, explaining everything from how to create a simple web page to how to develop a sophisticated content management system and everything in between: HTML, HTML5, CSS, JavaScript, PHP, and much more. As a digital rhetoric, moreover, Writing Online recreates the ancient processes of oral composition for a digital era. Digital invention becomes a push-pull process of transmitting information via searches, alerts, news aggregators, and read-write algorithms. Digital arrangement becomes a question-and-answer process inviting multiple responses via intuitive navigation systems and dynamic patterns of organization. Digital memory transforms the ancient memory palace into a dynamic, programmable content management system. Digital style provides computer-based tools to enhance writers' word choice, argumentative structures, and feedback. Digital delivery resituates speakers and writers in onscreen environments that balance functionality and aesthetics for optimum responsiveness and usability." —James P. Zappen, Professor, Department of Communication and Media, Rensselaer Polytechnic Institute
