An action-packed series-starter perfect for fans of *The Heroine Complex* and *Not Your Sidekick*. “I didn’t know how much I needed this brave, thrilling book until it rocked my world. *Dreadnought* is the superhero adventure we all need right now.”—Charlie Jane Anders, author of *All the Birds in the Sky* Danny Tozer has a problem: she just inherited the powers of *Dreadnought*, the world’s greatest superhero. Until *Dreadnought* fell out of the sky and died right in front of her, Danny was trying to keep people from finding out she’s transgender. But before he expired, *Dreadnought* passed his mantle to her, and those secondhand superpowers transformed Danny’s body into what she’s always thought it should be. Now there’s no hiding that she’s a girl. It should be the happiest time of her life, but Danny’s first weeks finally living in a body that fits her are more difficult and complicated than she could have imagined. Between her father’s dangerous obsession with “curing” her girlhood, her best friend suddenly acting like he’s entitled to date her, and her fellow superheroes arguing over her place in their ranks, Danny feels like she’s in over her head. She doesn’t have time to adjust. *Dreadnought*’s murderer—a cyborg named *Utopia*—still haunts the streets of New Port City, threatening destruction. If Danny can’t sort through the confusion of coming out, master her powers, and stop *Utopia* in time, humanity faces extinction.

When Buncombe County was formed in 1792, firefighting efforts were left up to individual landowners and helpful neighbors using buckets and a nearby well or body of water. Not until 1882 was an organized, community-sponsored fire department established; this was the Asheville Fire Department. Other fire departments followed, and no two were the same. Stations appeared in the towns of Weaverville and Black Mountain, while others sprang up in the residential communities of Kenilworth, Biltmore Forest, and George Vanderbilt’s Biltmore Village. In September 1953, county commissioners formally passed a resolution for county aid and supervision for rural volunteer fire departments. Through photographs that illustrate firefighting in many of its forms--rescue squads, wildland firefighting units, ladies auxiliaries, and ambulance services--*Firefighting in Buncombe County* showcases and honors the firefighters of this mountainous area who have always worked to keep their communities safe.

Kenneth Waltz’s 1979 *Theory of International Politics* is credited with bringing about a “scientific revolution” in the study of international relations – bringing the field into a new era of systematic study. The book is also a lesson in reasoning carefully and critically. Good reasoning is exemplified by arguments that move systematically, through carefully organised stages, taking into account opposing stances and ideas as they move towards a logical conclusion. *Theory of International Politics* might be a textbook example of how to go about structuring an argument in this way to produce a watertight case for a particular point of view. Waltz’s book begins by testing and critiquing earlier theories of international relations, showing their strengths and weaknesses, before moving on to argue for his own stance – what has since become known as “neorealism”. His aim was “to construct a theory of international politics that remedies the defects of present theories.” And this is precisely what he did; by showing the shortcomings of the prevalent theories of international relations, Waltz was then able to import insights from sociology to create a more comprehensive and realistic theory that took full account of the strengths of old schemas while also remedying their weaknesses – reasoning out a new theory in the process.
