In this haunting tale of love and learning, the existential chaos of a life ravaged by circumstance takes on a rhythm of its own, one bound by loss and loneliness, but also an intelligent awareness of self. Sometimes melancholy, sometimes brutal, occasionally funny and infuriating, a journalist-comrade-lover caught up in the shade and shadow of politics and social injustice faces treachery and betrayal on every level. Set against the backdrop of a cityscape that taunts and tantalises, this is where love fails and passion wanes, "where suffering has no meaning", where an individual escapes death only to find himself confronted with choices wrought by remorse and retribution, by conscience and character. And yet, with all trauma, there is a distinct musicality to the lyrical unpacking that follows a string of small things ...

Defending Assessment Security in a Digital World explores the phenomenon of e-cheating and identifies ways to bolster assessment to ensure that it is secured against threats posed by technology. Taking a multi-disciplinary approach, the book develops the concept of assessment security through research from cybersecurity, game studies, artificial intelligence and surveillance studies. Throughout, there is a rigorous examination of the ways people cheat in different contexts, and the effectiveness of different approaches at stopping cheating. This evidence informs the development of standards and metrics for assessment security, and ways that assessment design can help address e-cheating. Its new concept of assessment security both complements and challenges traditional notions of academic integrity. By focusing on proactive, principles-based approaches, the book equips educators, technologists and policymakers to address both current e-cheating as well as future threats.

Consumer behaviour has an increasing impact on business decisions through various individual and environmental factors. This phenomenon can be observed through the different buying patterns of generations and cultures when acquiring products and services. The study of consumer behaviour provides insight into consumer information processing, decision making and consumption patterns and is, therefore, critical to marketing planning and strategies, public policy and ethics. This fascinating subject also helps us understand our own consumer patterns: when, why and where we buy certain items, why we use them in certain ways, and how we dispose of them. Consumer behaviour is an essential component of both marketing and industrial psychology courses.

What would it mean for Christian counseling and pastoral care to take seriously the idea that God intervenes in the world? What would it look like for therapists and pastors to see themselves as opening the door to a miraculous divine encounter? How would counseling change if the intervention of God was not merely a theoretical idea but a lived experience? Building on Gary Collins's classic work, *The Rebuilding of Psychology*, the essays in this volume explore what a God-centered model of Christian counseling or pastoral care would look like. The contributors share the conviction that God is able to bring about lasting psycho-spiritual change here and now. Some of the topics discussed in the book include: Inner healing Prayer ministry Deliverance Christian holism Contemplative prayer Cognitive-behavioral therapy Emotion-focused therapy Group therapy Forgiveness Visualization and EMDR Addiction Life coaching This book seeks to encourage and aid counselors, pastors, church staff, clinical practitioners, academics and students in developing this kind of God-encountering, Christ-centered ministry of miraculous change.

discourse on virtue for the past 30 years.

Brutally dragged 780 metres beneath a taxi, a young woman's inspiring story of survival, courage, and the will to live. 13 September 2011. The story would shock thousands and be remembered by many for years to come. It would be plastered all over the papers and continue to attract interest well after the shock factor of what happened had passed. Reports and articles would be written, and "facts", as given to reporters by some of those involved and willing to be interviewed, would be recounted and repeated in all forms of public media over the months and even years that followed. And although these versions would generate widespread outrage, none was entirely accurate. The stories were about me. I was there. I am Kim McCusker, "the girl who was dragged by a taxi". This, as I experienced it, is the true version of events.
