The Cold War period saw a dramatic expansion of state-funded science and technology research. Government and military patronage shaped Cold War technoscientific practices, imposing methods that were project oriented, team based, and subject to national-security restrictions. These changes affected not just the arms race and the space race but also research in agriculture, biomedicine, computer science, ecology, meteorology, and other fields. This volume examines science and technology in the context of the Cold War, considering whether the new institutions and institutional arrangements that emerged globally constrained technoscientific inquiry or offered greater opportunities for it. The contributors find that whatever the particular science, and whatever the political system in which that science was operating, the knowledge that was produced bore some relation to the goals of the nation-state. These goals varied from nation to nation; weapons research was emphasized in the United States and the Soviet Union, for example, but in France and China scientific independence and self-reliance dominated. The contributors also consider to what extent the changes to science and technology practices in this era were produced by the specific politics, anxieties, and aspirations of the Cold War. Contributors Elena Aronova, Erik M. Conway, Angela N. H. Creager, David Kaiser, John Krige, Naomi Oreskes, George Reisch, Sigrid Schmalzer, Sonja D. Schmid, Matthew Shindell, Asif A. Siddiqi, Zuoyue Wang, Benjamin Wilson

A lavishly illustrated volume that views Russian avant-garde art through the lens of Dada. This is the first book to approach Russian avant-garde art from the perspective of the anti-art canons associated with the international Dada movement. The works described and documented in Russian Dada were produced at the height of Dada's flourishing, between World War I and the death of Vladimir Lenin--who, incidentally, was a frequent visitor to Cabaret Voltaire in Zurich, the founding site of Dada. Like the Dadaists, the Russian avant-gardists whose works appear in this volume strove for internationalism, fused the verbal and visual, and engaged in eccentric practices and pacifist actions, including outrageous performances and anti-war campaigns. The works featured in this lavishly illustrated volume thrive on negation, irony, and absurdity, with the goal of constructing a new aesthetic paradigm that is an alternative to both positivist and rationalist Constructivism as well as metaphysical and cosmic Suprematism. The text and images show that, while not neglecting the serious project of public agitation for Marxist ideology, the artists often pushed the Dadaesque into Russian mass culture, in the form of absurdist and chance-based collages and designs. In such works, Russian "da, da

The Paris Wife was only the beginning of the story . . . A New York Times Book Review Editor's Choice A Richard & Judy UK Pick Paula McLain's New York Times--bestselling novel piqued readers' interest about Ernest Hemingway's romantic life. But Hadley was only one of four women married, in turn, to the legendary writer. Just as T.C. Boyle's bestseller The Women completed the picture begun by Nancy Horan's Loving Frank, Naomi Wood's Mrs. Hemingway tells the story of how it was to love, and be loved by, the most famous and dashing writer of his generation. Hadley, Pauline, Martha and Mary: each Mrs. Hemingway thought their love would last forever; each one was wrong. Told in four parts and based on real love letters and telegrams, Mrs. Hemingway reveals the explosive love triangles that wrecked each of Hemingway's marriages. Spanning 1920s bohemian Paris through 1960s Cold War America, populated with members of the fabled "Lost Generation," Mrs. Heminway is a riveting tale of passion, love, and heartbreak.

As readers of Russian literature know, the nineteenth century was a time of pervasive financial anxiety. Russians of all classes were enmeshed in networks of credit and debt, and borrowing and lending shaped perceptions of material and moral worth. Sergei Antonov recreates this imperial world of borrowers, bankrupts, lenders, and loan sharks.

Chronicles the history of Everest exploration throughout the twentieth century, from early surveys and reconnaissance expeditions, through the first successful ascent, to contemporary attempts.

Darkness descends over St. Louis, a city already rocked by the Great Depression. More and more people are disappearing, and some have turned up dead. A sinister secret society is putting forward their plan known as "The Winnowing," designed to wipe out those they consider "undesirable." After Stanley and Hazel foil the diabolical plans of Charles Chouteau, they become instant celebrities. Hazel is thrust into the role of debutante, and risks loses herself in it. Meanwhile, Stanley must deal with the horrific tragedy of his best friend's death while being threatened by the unseen forces of the Veiled Prophet. With things spiraling out of control, Stanley and Hazel's relationship is tested, possibly beyond repair. As bodies pile up, people become more desperate. The divide between wealthy and poor grows ever wider, threatening to tear their worlds apart. Now, the two must find a way to work together if there is any hope at all of saving their relationship and their futures.

Are the Writings a miscellaneous collection of books, as is so often asserted, or do they have a purposeful design or arrangement? Over the past 35 years, there has been

a significant amount of scholarly interest in the shape of the Law, Former Prophets, Twelve Minor Prophets and the Psalms, while examinations of the shape of the Writings were almost nonexistent until very recently. The 11 essays in this volume explore this often-neglected issue from a variety of critical perspectives—reader-centered approaches, canonical, structural-canonical, and redactional—made more robust by the mix of German- and English-language scholarship on this question, including 4 articles translated from German into English. Essays range from the historical development of the collection, to analysis of the collection's different arrangements, to the relationship of books and subcollections within the Writings, to the reception of the collection in Jewish and Christian sources. Every book in the Writings is discussed, with particular attention given to Job, Ruth, and 1 and 2 Chronicles. The volume closes with 3 critical responses from John Barton, Tamara Cohn Eskenazi, and Christopher Seitz.

This traditional Russian tale is about Peter's triumphant capture of the Wolf. The retelling is based on the familiar musical version of Peter and the Wolf that introduces children to instruments of the orchestra.

Retells the orchestral fairy tale of the boy who, ignoring his grandfather's warnings, proceeds to capture a wolf.

"As industrial and scientific developments in early-twentieth-century Japan transformed the meaning of "objective observation," modern writers and poets struggled to capture what they had come to see as an evolving network of invisible relations joining people to

the larger material universe. For these artists, literary modernism was a crisis of perception before it was a crisis of representation. When *Our Eyes No Longer See* portrays an extraordinary moment in the history of this perceptual crisis and in Japanese literature during the 1920s and 1930s. The displacement in science of “positivist” notions of observation by a “realist” model of knowledge provided endless inspiration for Japanese writers. Gregory Golley turns a critical eye to the ideological and ecological incarnations of scientific realism in several modernist works: the photographic obsessions of Tanizaki Jun’ichiro’s *Naomi*, the disjunctive portraits of the imperial economy in Yokomitsu Riichi’s *Shanghai*, the tender depictions of astrophysical phenomena and human–wildlife relations in the children’s stories of Miyazawa Kenji. Attending closely to the political and ethical consequences of this realist turn, this study focuses on the common struggle of science and art to reclaim the invisible as an object of representation and belief.”

The arrest of Mikhail Khodorkovsky, the head of the Yukos oil company, on 25 October 2003, was a key turning point in modern Russian history. At that time Khodorkovsky was one of the world’s richest and most powerful men, while Yukos had been transformed into a vast and lucrative oil company that was set to go global. On all counts, this looked like a success story, but it was precisely at this moment that the Russian authorities struck. After two controversial trials, attracting widespread international condemnation, Khodorkovsky was sentenced to fourteen years in jail. In this book,

Richard Sakwa examines the rise and fall of Yukos, and the development of the Russian oil industry more generally. Sakwa analyses Russia's emergence as an energy superpower, and considers the question of the 'natural resource curse' and the use of energy rents to bolster Russia as a great power and to maintain the autonomy of the regime. Crucially this book also examines the relationship between Putin's state and big business during Russia's traumatic shift from the Soviet planned economy to the market system. It is a detailed analysis of one of the most dramatic confrontations between economic and political power in our era, full of human drama and moral dilemmas. It is also a study of political economy, with the market and state coming into confrontation. Above all, the 'Yukos affair' continues to shape contemporary Russian politics, with a weakened judiciary and insecure property rights. It traces the struggles of the Putin era as two visions of society came into conflict. The attack on Khodorkovsky had - and continues to have - far-reaching political and economic consequences but it also raises fundamental questions about the quality of freedom in Putin's Russia as well as in the world at large.

Traditional security concerns, historical aspirations, and human agency are all examined to illustrate Russia's need for collective self-esteem and desire for international status which drives their international, national, and security interests and policy. A theory of "aspirational constructivism" is presented as to how Russia has formed this new national identity with reconfigured national interests.

From Cinderella to comic con to colonialism and more, this companion provides readers with a comprehensive and current guide to the fantastic, uncanny, and wonderful worlds of the fairy tale across media and cultures. It offers a clear, detailed, and expansive overview of contemporary themes and issues throughout the intersections of the fields of fairy-tale studies, media studies, and cultural studies, addressing, among others, issues of reception, audience cultures, ideology, remediation, and adaptation. Examples and case studies are drawn from a wide range of pertinent disciplines and settings, providing thorough, accessible treatment of central topics and specific media from around the globe. As the activities of individuals, organizations, and nations increasingly occur in cyberspace, the security of those activities is becoming a growing concern. Political, economic and military leaders must manage and reduce the level of risk associated with threats from hostile states, malevolent nonstate actors such as organized terrorist groups or individual hackers, and high-tech

accidents. The impact of the information technology revolution on warfare, global stability, governance, and even the meaning of existing security constructs like deterrence is significant. These essays examine the ways in which the information technology revolution has affected the logic of deterrence and crisis management, definitions of peace and war, democratic constraints on conflict, the conduct of and military organization for war, and the growing role of the private sector in providing security. This book was previously published as a special issue of the journal Contemporary Security Policy.

NEW YORK TIMES BESTSELLER - From the author of Uprooted and Spinning Silver comes the first book of the Scholomance trilogy, the story of an unwilling dark sorceress who is destined to rewrite the rules of magic.

"The dark school of magic I've been waiting for."

Katherine Arden, author of Winternight Trilogy I decided that Orion Lake needed to die after the second time he saved my life. Everyone loves Orion Lake. Everyone else, that is. Far as I'm concerned, he can keep his flashy combat magic to himself. I'm not joining his pack of adoring fans. I don't need help surviving the Scholomance, even if they do. Forget the hordes of monsters and cursed artifacts, I'm probably the most dangerous thing in the place. Just give me a chance and I'll level mountains and kill untold millions, make myself the dark queen of the world. At least, that's what the world expects. Most of the other students in here would be delighted if Orion killed me like one more evil thing that's crawled out of the drains. Sometimes I think they want me to turn into the evil witch they assume I am. The

school certainly does. But the Scholomance isn't getting what it wants from me. And neither is Orion Lake. I may not be anyone's idea of the shining hero, but I'm going to make it out of this place alive, and I'm not going to slaughter thousands to do it, either. Although I'm giving serious consideration to just one. With flawless mastery, Naomi Novik creates a school bursting with magic like you've never seen before, and a heroine for the ages--a character so sharply realized and so richly nuanced that she will live on in hearts and minds for generations to come. Praise for *Deadly Education* "The can't-miss fantasy of fall 2020, a brutal coming-of-power story steeped in the aesthetics of dark academia. . . . A *Deadly Education* will cement Naomi Novik's place as one of the greatest and most versatile fantasy writers of our time."--BookPage (starred review) "A must-read . . . Novik puts a refreshingly dark, adult spin on the magical boarding school. . . . Readers will delight in the push-and-pull of El and Orion's relationship, the fantastically detailed world, the clever magic system, and the matter-of-fact diversity of the student body."--Publishers Weekly (starred review)

This book aims to develop a sophisticated understanding of propaganda. It begins with a brief history of early Western propaganda, including Ancient Greek classical theories of rhetoric and the art of persuasion, and traces its development through the Christian era, the rise of the nation-state, World War I, Nazism, and Communism. The core of the book examines the ethical implications of various forms of persuasion, not only hate propaganda but also insidious elements of more generally acceptable

communication such as advertising, public relations, and government information, setting these in the context of freedom of expression. Propaganda and the Ethics of Persuasion examines the art of persuasion but it also hopes to establish a "self-defense" resistance to propaganda. As Jacques Ellul warned in 1980, any new technology enters into an already existing class system and can be expected to develop in a way favourable to the dominant interests of that system. The merger of AOL and Time-Warner confirms the likelihood of corporate interests dominating the future of the Internet, but the Internet has also opened up new possibilities for a politically effective counter-culture, as was demonstrated at the meeting of the World Trade Organization in Seattle in late 1999 and numerous similar gatherings since.

Decades after its initial publication, Symbolic Immortality retains its status as the most comprehensive analysis of the mortuary practices of the Tlingit Indians of southeastern Alaska--or any other indigenous culture of the Northwest Coast. This updated and expanded edition furthers our understanding of the potlatch (koo.ex') as a total social phenomenon, with emotional and religious as well as economic and sociopolitical dimensions. The result is a major contribution to both Northwest Coast ethnology and theoretical literature on the anthropology of death.

Early in the twenty-first century, a quiet revolution occurred. For the first time, the major developed economies began to invest more in intangible assets, like design, branding, and software, than in tangible assets, like machinery, buildings, and computers. For all sorts of businesses, the ability to deploy assets that one can neither see nor touch is increasingly the main source of long-term success. But this is not just a familiar story of the so-called new economy. *Capitalism without Capital* shows that the growing importance of intangible assets has also played a role in some of the larger economic changes of the past decade, including the growth in economic inequality and the stagnation of productivity. Jonathan Haskel and Stian Westlake explore the unusual economic characteristics of intangible investment and discuss how an economy rich in intangibles is fundamentally different from one based on tangibles. *Capitalism without Capital* concludes by outlining how managers, investors, and policymakers can exploit the characteristics of an intangible age to grow their businesses, portfolios, and economies.

Using the same musical sense of language she applies to her translations, Nancy Naomi Carlson masterfully interprets herself in *An Infusion of Violets*. The sometimes erotic, sometimes melancholy landscapes she creates as the self-appointed sitar's "ragged throat, pitched / between here and when, / caught in quartertones," take our breath away. Carlson describes an interior world where tears can produce "so much salt a body floats away," where "music tuned to loss descends with rain," and where hope is placed in the "kill-cure." Here we encounter Carlson's ex-husbands and luminaries such as Rachmaninoff and Monet, among others. Filled with striking images and sensuous language, *An Infusion of Violets* is an evocative mix of formal and free-verse poems.
