A devastating and lyrical work of nonfiction, *Young Men and Fire* describes the events of August 5, 1949, when a crew of fifteen of the US Forest Service's elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. Two hours after their jump, all but three of the men were dead or mortally burned. Haunted by these deaths for forty years, Norman Maclean puts together the scattered pieces of the Mann Gulch tragedy in *Young Men and Fire*, which won the National Book Critics Circle Award.

Alongside Maclean's now-canonical *A River Runs through It and Other Stories*, *Young Men and Fire* is recognized today as a classic of the American West. This twenty-fifth anniversary edition of Maclean's later triumph—the last book he would write—includes a powerful new foreword by Timothy Egan, author of *The Big Burn* and *The Worst Hard Time*. As moving and profound as when it was first published, *Young Men and Fire* honors the literary legacy of a man who gave voice to an essential corner of the American soul.

NEW 2021 EDITION of the best-selling notary prep guide to the difficult Louisiana exam. The Louisiana Notary Exam has a 20% pass rate. The Notary Exam has an official Study Guide you use during the exam. But the Study Guide has no index, no big picture, no study strategies, no exam-day tips, not enough cross-references . . . and few of the forms notaries use that they test. It doesn't explain most-tested subjects, past exams, or recent changes to the Guide. It's got the law and notary rules, but it's missing essentials for any such textbook. This book has all that—and much more that anyone contemplating the exam should read. It even includes crucial information about notary practice for the newbie notary, and is useful to experienced notaries for its expanded cross-

references, complete index, and summary lists. Basically it's the rest of the official Study Guide they somehow omitted. Why would they leave out the index, of all things? Reminder: a 20% pass rate. As a senior law teacher and member of two state bars, Professor Childress still needed to pass the Louisiana Notary Exam to practice as one. It's a challenging exam for everyone, yet he found in the 'Study Guide' lots of trees but little forest—and even less real guidance. Determined that current test-takers can do better with more real help, he wrote this book and geared the page numbers—including an index, cross-references, lists, and illustrated explanation of successions, community property, and authentic acts—to the latest edition of the state's official text, *Fundamentals of Louisiana Notarial Law and Practice*. An affordable addition to the Self-Study Sherpa Series from Quid Pro Books, that actually pays for itself six-times-over with its 'one weird trick' saying how to save \$65 in fees in the notary qualification process.

for the position, difficult written examinations are an effective way to narrow the field. There is no excuse for a firefighter candidate to fail a written exam. Those who are committed to their goal will plan and prepare for the written exam to improve their chances of success. While there are other self-help books devoted to helping aspiring firefighters, they only provide questions and answers. These books are useless if you do not understand how to work out the problems. Smoke Your Firefighter Written Exam goes beyond providing sample questions and answers. It teaches the reader the basic rules and principles behind the questions; in other words, how to solve each complex problem. Each section begins with an overview of how to solve the problem. The reasoning behind the correct answer is presented in clear, easy-to-understand language. The reader will become proficient in: mathematics (word problems, geometry, addition, subtraction, multiplication); mechanical aptitude (gears, levers, pulleys, incline planes, screws); language (reading, spelling, grammar, vocabulary); perceptual ability; spatial relations; matching parts and figures; map reading. Illustrations are used throughout the book to teach basic principles and present problems to solve.
