Leadership Theory and Practice SAGE Publications, Incorporated

Toxic leaders, both political, like Slobodan Milosevic, and corporate, like Enron's Ken Lay, have always been with us, and many books have been written to explain what makes them tick. Here leadership scholar Jean Lipman-Blumen explains what makes the followers tick, exploring why people will tolerate--and remain loyal to--leaders who are destructive to their organizations, their employees, or their nations. Why do we knowingly follow, seldom unseat, frequently prefer, and sometimes even create toxic leaders? Lipman-Blumen argues that these leaders appeal to our deepest needs, playing on our anxieties and fears, on our yearnings for security, high self-esteem, and significance, and on our desire for noble enterprises and immortality. She also explores how followers inadvertently keep themselves in line by a set of insidious control myths that they internalize. For example, the belief that the leader must necessarily be in a position to "know more" than the followers often stills their objections. In addition, outside forces--such as economic depressions, political upheavals, or a crisis in a company--can increase our anxiety and our longing for charismatic leaders. Lipman-Blumen shows how followers can learn critical lessons for the future and survive in the meantime. She discusses how to confront, reform, undermine, blow the whistle on, or oust a toxic leader. And she suggests how we can diminish our need for strong leaders, identify "reluctant leaders" among competent followers, and even nurture the leader within ourselves. Toxic leaders charm, manipulate, mistreat, weaken, and ultimately devastate their followers. *The Allure of Toxic Leaders* tells us how to recognize these leaders before it's too late.

Effective Leadership: Theory, Cases, and Applications, by Ronald H. Humphrey, integrates traditional and new leadership theories—including transformational leadership, leader-member exchange, authentic leadership, servant leadership, self-leadership, shared and distributed leadership, identity theory, and the value of emotions and affect—to provide a comprehensive look at the many facets of effective leadership. Practical and fun to read, this innovative book incorporates personal reflections and current business examples to bring the theories of organizational leadership to life. In addition, "Put it in Practice" features help readers see how they can apply the leadership research to their own work lives, while leadership cases throughout demonstrate how real leaders have succeeded by applying the leadership principles discussed in the book.

The Sixth Edition of *Meeting the Ethical Challenges of Leadership: Casting Light or Shadow* explores the ethical demands of leadership and the dark side of leadership. Author Craig E. Johnson takes a multidisciplinary approach to leadership ethics, drawing from many fields of research to help readers make moral decisions, lead in a moral manner, and create an ethical culture. An introductory leadership textbook that guides students through the concept of leadership by design, a theory that involves planning each step of their leadership development, focusing on practical skills and valuable attributes that will maximize their leadership success now and into the future. Organized around five major design challenges, each challenge is explored in a stand-alone module. Students begin the leadership journey with themselves, understanding their own strengths, styles, and skills. The text moves on to relationships, exploring how leadership is a process that involves values, decision-making, motivation, and power. A module on others' success unpacks the most effective practices of leadership and management, this is followed by a module on leading culture, teams, and community, before concluding with a section on how leaders can create lasting, positive change. The book covers foundational leadership topics with a strong emphasis on skill building and helping develop CORE competencies: confidence, optimism, resiliency, and engagement. Students are encouraged to develop these skills through experiential learning, with multiple features

in each chapter such as reflective and scenario-based exercises, and case studies of internationally recognized companies like Amazon and Proctor & Gamble, along with interviews with Fortune 500 Company CEOs. There are online resources for instructors and students, which include: Test bank, PowerPoint slides, an instructor manual, teaching tips, answers to in-text questions, multimedia resources, quiz questions, and flashcards. Suitable reading for first and second year undergraduates on Leadership, Introduction to Leadership, and Leading Organizations courses

An instant national bestseller! Stanley McChrystal, the retired US Army general and bestselling author of *Team of Teams*, profiles thirteen of history's great leaders, including Walt Disney, Coco Chanel, and Robert E. Lee, to show that leadership is not what you think it is—and never was. Stan McChrystal served for thirty-four years in the US Army, rising from a second lieutenant in the 82nd Airborne Division to a four-star general, in command of all American and coalition forces in Afghanistan. During those years he worked with countless leaders and pondered an ancient question: "What makes a leader great?" He came to realize that there is no simple answer. McChrystal profiles thirteen famous leaders from a wide range of eras and fields—from corporate CEOs to politicians and revolutionaries. He uses their stories to explore how leadership works in practice and to challenge the myths that complicate our thinking about this critical topic. With Plutarch's *Lives* as his model, McChrystal looks at paired sets of leaders who followed unconventional paths to success. For instance. . . . Walt Disney and Coco Chanel built empires in very different ways. Both had public personas that sharply contrasted with how they lived in private. . . Maximilien Robespierre helped shape the French Revolution in the eighteenth century; Abu Musab al-Zarqawi led the

jihadist insurgency in Iraq in the twenty-first. We can draw surprising lessons from them about motivation and persuasion. • Both Boss Tweed in nineteenth-century New York and Margaret Thatcher in twentieth-century Britain followed unlikely roads to the top of powerful institutions. • Martin Luther and his future namesake Martin Luther King Jr., both local clergymen, emerged from modest backgrounds to lead world-changing movements. Finally, McChrystal explores how his former hero, General Robert E. Lee, could seemingly do everything right in his military career and yet lead the Confederate Army to a devastating defeat in the service of an immoral cause. Leaders will help you take stock of your own leadership, whether you're part of a small team or responsible for an entire nation.

Tools and techniques from the trailblazers in data-based education reform Over a period of several years, Amanda Datnow and Vicki Park visited public schools with a reputation for being ahead of the pack in data-driven decision making. The results of this pioneering study reveal how education leaders can make data work for students and teachers, rather than against them. This book is an essential guide to meeting the challenges of high-stakes accountability, building performance-based schools, and improving student outcomes. By following the advice in this book, you'll be able to transform data overload into a data-positive school culture. You'll learn the difference between "data-driven leadership" and "data-informed leadership," and how to use distributed leadership to inspire collaboration and guided analysis. Incorporating narrative reflections drawn from real educators and administrators, the authors refine their observations and interviews into practical conclusions that leaders can put to use immediately. This book empowers leaders to support inquiry, build trust in data-based initiatives, establish goals for evidence use, and provide educators with the skills they need to mobilize data for the good of all stakeholders. "Datnow and Park's ideas are easily accessible and grounded in clear examples, and their seven 'calls' about what needs to be done nail the problem and the solutions. Use this book as your action guide and you'll be rewarded with better results in student learning." —Michael Fullan, professor emeritus, University of Toronto "Datnow and Park uncover, at last, what it means to use data to inform leadership. Documenting the four P's (people, policies, practices, and patterns) in schools, we learn about the organization and dynamics of reform informed by data. A must read!" —Ann Lieberman, senior scholar, Stanford University

Imagine a company where people love coming to work and are highly productive on a daily basis. Imagine a company whose top executives, in a quest to create the most "fun" workplace ever, obliterate labor-management divisions and push decision-making responsibility down to the plant floor. Could such a company compete in today's bottom-line corporate world? Could it even turn a profit? Well, imagine no more. In *Joy at Work*, Dennis W. Bakke tells the true story of this extraordinary company--and how, as its co-founder and longtime CEO, he challenged the business establishment with revolutionary ideas that could remake America's organizations. It is the story of AES, whose business model and operating ethos -"let's have fun"-were conceived during a 90-minute car ride from Annapolis, Maryland, to Washington, D.C. In the next two decades, it became a worldwide energy giant with 40,000 employees in 31 countries and revenues of \$8.6 billion. It's a remarkable tale told by a remarkable man: Bakke, a farm boy who was shaped by his religious faith, his years at Harvard Business School, and his experience working for the Federal Energy Administration. He rejects workplace drudgery as a noxious remnant of the Industrial Revolution. He believes work should be fun, and at AES he set out to prove it could be. Bakke sought not the empty "fun" of the Friday beer blast but the joy of a workplace where every person, from custodian to CEO, has the power to use his or her God-given talents free of needless corporate bureaucracy. In *Joy at Work*, Bakke tells how he helped create a company where every decision made at the top was lamented as a lost chance to delegate responsibility--and where all employees were encouraged to take the "game-winning shot," even when it wasn't a slam-dunk. Perhaps Bakke's most radical stand was his struggle to break the stranglehold of "creating shareholder value" on the corporate mind-set and replace it with more timeless values: integrity, fairness, social responsibility, and a sense of fun. Corporate Social Responsibility: Definition, Core Issues and Recent Developments offers a well-structured and thorough introduction to corporate social responsibility (CSR). Author Brent D. Beal introduces the basic concept of CSR, briefly discusses the

challenges of defining it, and summarizes important conceptual models. CSR is examined in the context of the perfect competition market model, market failure, and social dilemmas. Three different types of CSR—systemic, strategic, and philanthropic—are highlighted. Finally, arguments both for and against CSR are outlined and several conceptual frames are proposed. Readers are encouraged to think about what businesses should be responsible for in society and how a society's economic system should be structured, bounded, and ultimately, controlled. This text is appropriate for any business course in which the introduction of CSR would complement other course content.

'What makes this book stand out in the crowd is the engaging approach the authors have taken to present their argument and the novel treatment they offer of diversity and diversity management...a must-read for anyone in a leadership position or interested in investigating education leadership and diversity' - Gender and Education 'The authors should be congratulated for tackling the crucial topic of diversity within educational leadership....the book makes a major contribution to the small but emergent body of studies in this area' - Journal of Educational Administration & History 'This book sets out a central aim of stimulating reflection on diversity and implications for leaders in education. It also aims to support the development of practice. It is a useful book for those involved in educational management and for policy makers at all levels' - ESCalate 'The authors challenge the reader to reconsider leadership theory in light of notions of social justice and diversity, and to put into place newly articulated frameworks for action...The text is richly supported by strong empirical research and a sometimes-intricate philosophical approach in making its case for justice and fairness in education and beyond' - Choice Magazine What do we mean by diversity? Why is it an important issue for leaders of schools, colleges and universities? As society becomes increasingly diverse, there is significant international awareness in education about how this impacts on leaders and leadership. For decades the emphasis has been placed on increasing the number of leaders with specific attributes, such as women or those from ethnic minorities, to encourage a true representation of society. This far-reaching book takes a wider view, challenging the reader to recognise the importance of diversity issues and to embed diversity as central within leadership theory and practice. Drawing on their extensive research the authors establish a clear understanding of what diversity means and use this to develop a distinct approach to conceiving leadership, preparing leaders and acting as leaders. They explain how diversity should be a holistic issue which touches every aspect of leadership and is vital to ensuring effective and appropriate leadership for education in pluralist societies. The authors explore the history of approaches to addressing inequities in access to leadership positions and the experience of leadership, from equal opportunities, to diversity and inclusion, to capabilities approaches. The book also proposes fundamental and concrete changes that leaders can undertake both in their own and their organisation's practice, to reflect a real commitment to social justice in a diverse society.

Is there a process to provide the opportunity for people to connect in the essence of "spiritual humanism" to undertake great and difficult tasks, provide holistic contexts from which we can create our future together, and cause us to take charge of our own evolution as we transcend? Could this be the true nature of leadership? The purpose of this book is to suggest that leadership theories are inadequate unless they include transcendence as an essential element influencing human behavior. "It is believed that if transcendence is included in leadership theories, an ebb and flow relationship will exist, providing opportunities where introspection and reflection of one's role can cause individual transcendence to a higher level of consciousness, while at the same time causing transforming change in the individual and the organization." This book examines theories of the evolution of consciousness as the context for understanding transcendence. Utilizing the elements of transcendence and consciousness as a foundation, these concepts could help further not only the study, but the practice of leadership as well.

Draws from surveys of 60,000 leaders and constituents at all organizational levels to identify and describe the recurring patterns and practices leaders use to

turn challenges into successes.
