"The 50 years since the publication of 'Fabric of Geology,' edited by C.C. Albritton Jr., have seen immense changes in both geology and philosophy of science. 'Rethinking the Fabric of Geology' explores a number of philosophical issues in geology, ranging from its nature as a historical science to implications for geological education"--Provided by publisher. This text blends traditional introductory physics topics with an emphasis on human applications and an expanded coverage of modern physics topics, such as the existence of atoms and the conversion of mass into energy. Topical coverage is combined with the author's lively, conversational writing style, innovative features, the direct and clear manner of presentation, and the emphasis on problem solving and practical applications.

two systematic and well-written chapters, this book covers the AIEEE syllabus completely and will also prove a useful guide for students appearing for state-level engineering tests (PETs).

Originally published in 1972, the emphasis of this book is on psychological and cultural understanding of education, in terms of persons and relationships, rather than processes. The book: Deals with issues of continuing relevance for educational thought and practice, such as the education and training of teachers and diminishing the gap between schooling and education. Considers the nature and function of educational research, the conflict between arts and sciences in education and the concept of guidance. Examines teaching in its interpersonal context, and at the revolt of youth and the sexual revolution. Assesses the influence of Freud, Winifred Mercier, William Boyd and Herbert Read.
