This book is written for classroom teachers who want to know more about e-learning and who would like to experiment with designing e-learning material to use in their own classrooms. It is primarily targeted at secondary teachers but there is no reason why primary school teachers and adult education teachers should not find it useful too. The other group we had in mind were those of you still undertaking initial teacher training. Although there are some exemplary courses, a depressing number of trainee teachers continue to arrive in the classroom having barely heard the words 'e-learning', still less have hands on experience of it.

digitale, un gruppo sempre più ampio di studiosi si sta interrogando con crescente preoccupazione su come salvare la memoria storica dell'umanità dal rapido avanzamento della tecnologia. Se, infatti, un foglio di carta può resistere per secoli, un cd, invece, è già illeggibile in 5-10 anni, i floppy, e i relativi lettori, sono praticamente scomparsi e gli hard disk si smagnetizzano. Per non parlare del rapido succedersi dei formati dei file, per cui, ad esempio, un documento scritto con Wordstar appena una ventina d'anni fa è ormai illeggibile con gli applicativi di oggi. Come fare quindi per conservare a lungo termine un documento digitale? Il problema è tuttora aperto e coinvolge archivisti, informatici e giuristi che sono prima di tutto pressati dalla necessità di superare le barriere tra le varie discipline verso la formazione di nuove figure professionali con le giuste competenze. Questo testo nasce con l'obiettivo di fare il punto sull'argomento, raccogliendo le best practice e le metodologie adottate nei migliori archivi digitali e dando ampio risalto agli standard e ai progetti internazionali, nonché alla legislazione in materia.
