MCQs for ENT: Specialist Revision Guide for the FRCS is a key resource for candidates preparing to sit the FRCS (ORL-HNS). It contains over 300 single best answer questions and over 70 extended matching questions to help candidates prepare for all aspects of ENT they may face in this challenging exam. Written by expert consultants who have succeeded in the exam, this resource provides comprehensive coverage of theory and practice, including new questions on challenging topics such as electroneurography and voice clinic procedures, and questions on rare topics such as oropharyngeal cancers. All answers have full explanations, providing candidates with high-quality self-assessment in order to maximize exam success. Providing a thorough assessment of the reader's ENT knowledge, this is an essential revision book for any candidate facing the FRCS ORL-HNS exam.

A unique resource for passing the rigorous American Board of Plastic Surgery oral board exam Passing the plastic surgery board examinations necessitates meeting extremely demanding criteria. Certification from the ABPS is the gold standard – a significant milestone requiring intensive study, passing the written exam, and the highly challenging two-day oral board component. Acing the plastic surgery boards means a plastic surgeon has already demonstrated a high level of training and education, essential elements for achieving optimal results and patient satisfaction. Plastic Surgery Oral Board Prep: Case Management Questions and Answers by Devra Becker restructures core plastic surgery knowledge into the conceptual framework needed for mastery of the plastic surgery oral board exam. It fills a gap in the literature, exploring levels of knowledge such as analysis, synthesis, and evaluation, as well as practical applications including fluid management, intraoperative and postoperative challenges, and ethical considerations. Questions and answers on key reconstructive, aesthetic, and elective procedures are encompassed throughout 22 chapters, enabling readers to synthesize knowledge and articulate it efficiently and effectively. Key Highlights Nearly 400 Q&A mirror the type and sequencing of questions on the oral board exam Reconstruction topics include skin cancer, facial defects and trauma, back and trunk, traumatic hand injuries, lower extremity wounds, cleft lip and palate, and craniosynostosis syndromes Aesthetic and elective surgery chapters cover the aging face, breast, body and trunk, and hand Current recommendations for management of coexisting medical conditions such as thromboembolism prophylaxis and perioperative management of cardiac disease This is an invaluable board study resource for plastic surgery residents and surgeons preparing for the oral board exam. Its comprehensive core curriculum content will also benefit clinicians prepping for in-service exams.

Multiple Choice Questions in Plastic Surgery provides over 400 questions, answers and explanations covering the breadth of plastic and reconstructive surgery including burns. The expansive array of questions with detailed explanations and references will provide a solid foundation for those preparing for final specialty examinations such as the American Boards, the FRCS (Plast), EBOPRAS, MCh and others. The questions are drawn from international experts and are up-to-date with the latest concepts and techniques, including face transplantation, new trends in reconstructive and aesthetic surgery, and recent scientific advances. It will therefore appeal to those interested in plastic surgery education globally. In particular, it will help plastic surgeons to keep up-to-date in the specialty, and demonstrate this through continuing medical education (CME) and for processes of revalidation.

This illustrated textbook is an essential and invaluable guide to young clinicians and researchers of Trauma and Orthopaedics, reporting all classification systems which are currently utilised in the clinical setting. It includes classifications relevant to both Elective Orthopaedic Practice and Orthopaedic Trauma. Clear graphic illustrations accompany the description of all different classification schemes in a comprehensive manner, together with a structured presentation of existing clinical evidence. In this manner each chapter of the different anatomical sites and pathologies assists the decision making of the readers regarding treatment strategy as well as informed consent of their patients. It is envisaged that this textbook will be a point of reference not only to the surgeons in training (residents) but also to senior surgeons and academic clinicians.
