The HCR (Harvest Cost-Revenue) Estimator is engineering and financial analysis software used to evaluate stand-level financial thresholds for harvesting small diameter ponderosa pine (Pinus ponderosa Dougl. ex Laws.) in the Southwest United States. The Windows-based program helps contractors and planners to identify costs associated with tree selection, residual handling, transportation of raw materials, and equipment used. Costs are compared against total financial return for regionally based market opportunities to arrive at potential net profit. Information is used to identify per-acre cost thresholds, for contract appraisal, and for prioritizing project planning for wildfire fuel reduction treatments and forest restoration efforts.

A Users Guide to Hydraulic Modelling and Experimentation provides a systematic, comprehensive summary of the progress made through HYDRALAB III . The book combines the expertise of many of the leading hydraulic experimentalists in Europe and identifies current best practice for carrying out state-of-the-art, modern laboratory investigations. In addition it gives an inventory and reviews recent advances in instrumentation and equipment that drive present and new developments in the subject. The Guide concentrates on four core areas – waves, breakwaters, sediments and the relatively-new (but rapidly-developing) cross-disciplinary area of hydrodynamics/ecology. Progress made through the 'CoMIBBS' component of HYDRALAB III provides the material for a chapter focussed on guidance, principles and practice for composite modelling. There is detailed consideration of scaling and the degree of relevance of laboratory/physical modelling approaches for specific contexts included in each of the individual chapters. The Guide includes outputs from the workshops and several of the innovative transnational access projects that have been supported within HYDRALAB III, as well as the focussed joint research activities SANDS and CoMIBBS. Its primary purpose is to serve as a shared resource to disseminate the outstanding advances achieved within HYDRALAB III but, even more than this, it is a tribute to the human and institutional collaborations that led to and sustained the research advances, the human relationships that were strengthened and initiated through joint participation in the Programme, and the training opportunities that participation provided to the many young researchers engaged in the projects.

Contains everything from program installation to application for one of the most

exciting software advances in spreadsheet history. This quick and easy guide to Quattro is for use with IBM PC, XT, AT, and compatible computers.

Users Guide to Ecohydraulic Modelling and Experimentation has been compiled by the interdisciplinary team of expert ecologists, geomorphologists, sedimentologists, hydraulicists and engineers involved in HYDRALAB IV, the European Integrated Infrastructure Initiative on hydraulic experimentation which forms part of the European Community's Seventh F

Material flow systems in manufacturing covers a broad spectrum of topics directly affecting issues related to facilities design, material handling and production planning and control. In selecting the papers to include in this book, the scope was limited to the design and operational control aspects related to the physical move ment of parts, tools, containers and material handling devices. Recent develop ments in this area naturally led to concentration on flow systems involving cellular manufacturing, and automated transport equipment such as automated guided vehicles. However, the concepts discussed have general applicability to a wide range of manufacturing flow problems. The book is organized in five major sections: 1. design integration and justification; 2. cell design and material handling considerations; 3. alternative material flow paths; 4. operational control problems; and 5. tooling requirements and transport equipment.

"The MOSS User's Manual has been designed as a reference document for trained users of the Map Overlay and Statistical System (MOSS) interactive graphics software. MOSS is the data analysis component of a Geographic Information System (GIS) originally developed by the Western Energy and Land Use Team (WELUT). Currently, MOSS is being developed under the direction of the U.S. Bureau of Land Management with cooperation from the U.S. Fish and Wildlife Service, the U.S. Bureau of Indian Affairs, the U.S. Geological Survey, the U.S. Forest Service, the Soil Conservation Service, the Minerals Management Service and the U.S. Army Corps of Engineers. This document contains information necessary for a user to access and use the MOSS software. MOSS can address digital map data in two formats, vector and raster, or cell. For convenience, raster processing capabilities are specifically called MAPS (Map Analysis and Processing System), due to differences in the software. It is assumed that the reader of this document is familiar with the GIS and its applications"--leaf iii. This book provides the 5 million GroupWise users with all the details they need to effectively master and manipulate GroupWise, the powerful groupware messaging system. Numerous "power tips" collected from experts worldwide are guaranteed to teach even experienced GroupWise users many new tricks. "Congratulations on the purchase of this exclusive product, tailor-made just for you. It will provide you with years of continuous existence." So begins The Brain: A User's Manual, Marco Magrini's fascinating guide to the inner workings of one of nature's most miraculous but misunderstood creations: the human brain. This user-friendly manual offers an accessible guide to the machine you use the most, deconstructing the brain into its constituent parts and showing you both how they function and how to maintain them for a longer life. Cutting through the noise of modern pop psychology, The Brain: A User's Manual is a refreshingly factual approach to self-help. Written with a deft style and wry humour, it offers tips on everything from maximising productivity to retaining memory and boosting your mood.
