Mendoza the Jew combines a graphic history with primary documentation and contextual information to explore issues of nationalism, identity, culture, and historical methodology through the life story of Daniel Mendoza. Mendoza was a poor Sephardic Jew from East London who became the boxing champion of Britain in 1789. As a Jew with limited means and a foreign-sounding name, Mendoza was an unlikely symbol of what many Britons considered to be their very own "national" sport.

What is calculus really for? This book is a highly readable introduction to applications of calculus, from Newton's time to the present day. These often involve questions of dynamics, i.e., of how--and why--things change with time. Problems of this kind lie at the heart of much of applied mathematics, physics, and engineering. From Calculus to Chaos takes a fresh approach to the subject as a whole, by moving from first steps to the frontiers, and by focusing on the many important and interesting ideas which can get lost amid a snowstorm of detail in conventional texts. The book is aimed at a wide readership, and assumes only some knowledge of elementary calculus. There are exercises (with full solutions) and simple but powerful computer programs which are suitable even for readers with no previous computing experience. David Acheson's book will inspire new students by providing a foretaste of more advanced mathematics and some of its liveliest applications.

Van Tine and Pierces "Builders of Ohio is composed of twenty-four essays that use biography to explore Ohio's history. Collectively, they provide a historical overview of the state's development from George Croghan's search for fame and fortune on the seventeenth-century frontier through Dave Thomas's more recent creation of a fast-food empire. Each chapter also addresses important events and transformations in the state's history such as: European settlement; Native American resistance; the creation of territorial and state governments; the development of the state's educational and economic institutions; the disruption created by the Civil War; the struggle of African Americans and women to participate in Ohio's public life; efforts to ameliorate the pernicious effects of industrialization; the negotiation of the state's role

in a nation increasingly dominated by the federal government; or the ramifications of de-industrialization and rise of a service economy.
