Razor’s Edge was written for my family. It is based on events that a family struggles with leading up to a second civil war in the United States. The name of Razor’s Edge comes from three things. First, Razor is for the Arkansas Razorbacks. Edge is for the overlook located in Devil’s Den, Arkansas. Second, Razor’s Edge represents the division of the country by the actions of the Government and the general public not standing for their actions. Razor’s Edge shows how one person can unite the masses under one strong belief. This is one man’s opinion about how the Government’s wasteful spending, policies, and actions can cause chaos throughout the country. The main family characters in the book are named

after actual members of my family.

It's one of life's first rites of passage- somewhere around the age of 26 months, toddlers are introduced to the potty. Some take to it right away; some need a little more time or encouragement. Some, however, seem to have no interest in training at all or, indeed, seem bound and determined to resist it. And no matter how often a neighbour or relative tells you "No one ever packs diapers when they go way to college," you're beginning to think your child might be destined to enter the Guinness Book of Records for longest continuous use of Pampers and Pull-Ups. In *The Pocket Idiot's Guide to Potty Training Problems*, Alison D. Schonwald, also known as "The Poop Doctor" of Boston's Children's Hospital, addresses the needs of parents and their reluctant toddlers in a warm, reassuring manner that will calm nerves and ease tension all around.

operative procedure. The persons concerned with and/or contributing to surgical patient care are many. The practical nurse shares a special experience with the patient at this time of great stress and need in his life. Their relationship encompasses feelings, attitudes, and behavior approaches. The nurse's first objective is to promote and establish a meaningful, therapeutic relationship, enabling the provision of individualized care. He, then, is to provide the perioperative nursing care that is required for the safest possible care of the patient and production of a favorable surgical outcome. Any patient who is scheduled to have surgery poses special challenges to personnel entrusted with his care. Every procedure done by (OR) operating room personnel for the patient's operation--from the preoperative skin prep to final closure of the incision--requires thorough mastery of many precision techniques and uncompromising attention to detail in order to safeguard the patient. While in the OR, the patient is cared for by a highly trained team that must function as a unit if the patient's best interest is to be served. You, the OR specialist, are a member of this team. While each patient brings new challenges to the surgical team, there are certain problems and techniques associated with particular kinds of special surgery that can be anticipated. By preparing for these peculiarities of the various specialties, the team can circumvent a great many problems that would otherwise arise. In this subcourse, a large number of operations in various specialties are described, along with special dangers that may attend these particular procedures. The more familiar you become with these, the more effectively you will be able to do your part as a member of the operating room team. Also, in this course, you will study wound healing and wound care, contaminated wounds, and burns. Information you read in this course will aid you in maintaining and improving the health of soldiers.

ABOUT THE BOOK Those pants you cut into knee shorts five years ago are getting threadbare: The fringes are so long they flutter in the wind like little strips of crepe paper. When you look in the mirror, you ignore stuff you don't think is important, like nose hairs, a few zits here and there, bushy eyebrows. You've probably spent your entire life not really caring about personal grooming other than showering,

shaving and using deodorant. And you've always thought, why should you? It's the women who need to look good for you, right? Women like their men to look manly, and that means rough hands and filthy fingernails...right? Yeah, not so fast, buddy. See, when a woman sees you, she instantly makes a decision about whether you are a potential partner based on how you look. If you make a habit of looking like a homeless man in raggedy clothes, you might have more luck panhandling on the corner than finding a date. What you think doesn't matter does, and women are funny creatures, they notice little things that you've never given a second thought, like that monobrow you're sporting. So how do you go about improving your grooming habits? You listen to the experts. Learn from women, take a few hints from men who always seem to look good. Or, you can read this easy grooming guide and apply the lessons you learn here to your daily life. Trust us, the ladies will thank you for it. EXCERPT FROM THE BOOK 1. Rock the bald look. If you choose to go bald, do it the right way. Cut your hair close to the skull, and then shave it off with a good quality razor. Don't use a cheap one, use one of those triple-blade razors to get the smoothest, closet shave. You might nick yourself here and there, but once you get the hang of shaving your head little injuries like that will be fewer and farther between. A bald head does come with some responsibilities. You have to take care of your new hairless pate, otherwise you could end up with sunburn, sun spots, freckling, and even wrinkles! Every morning, massage your head with a blend of aloe vera gel, cocoa butter, and coconut oil. This will leave your head so smooth you'll think it's a baby's butt. After all this, spray it with some strong sunscreen. Use a waterproof or sporting-strength sunblock in an SPF 50 or higher. Remember, the skin on your head is more sensitive, and it's the first thing on your body the sun's rays hit. Keep it covered, and keep it
